“A Struggle to Survive”**The Muscogee Women: Keepers of the tradition and culture of the nation.**

Since the beginning of time the women of this nation have played a major role in the existence of the Muscogee people and to this day their contribution has successfully allowed this nation to survive.

Today, this struggle is yours to bear, and today’s challenge is made more difficult by the fact that now you must be able to walk in two worlds and still maintain your balance.

The structure of our ancient society is still intact in some parts of our nation today, and you, the Muscogee women, must protect this to ensure that future generations of Muscogee people have a foundation to build on and an identity to be proud of.

In your educational experience you have learned that listening is a key ingredient for learning. As a student of this nation, you have learned the ways of our people and now as you move forward to represent this Nation of people, you must also expose the humbleness that our ancestors also displayed in their daily lives.

As you learn the history of our people, both in the written and oral form, you can feel and touch the spirit that they possessed and this spirit is among us today. This is the same spirit that compelled you to be here today.

History tells us, that we, the Muscogee people, have endured tremendous tribulations, from ethnic cleansing, forced removal and religious genocide, to the dissolving of tribal governments and then finally, the attempt to separate the Indian from the person through enrollment of young Muscogee (Creek) children to “Finishing School,” later called “Boarding Schools.”

The horror stories that have been relayed to us by the ones that have gone on before us, we must not dwell on or forever hold a grudge. Their stories must never be forgotten. We must listen to these stories and learn from them so that history does not repeat itself.

The road that we travel today was planned out for us many, many years ago by a Creek leader named Opothle Yahola in a speech given at Asbury Mission on the North Fork in November, 1859.

He said: “My brothers, many, many, many years ago, when I was a child, there was a beautiful island in the Chattahoochee River. It was covered with stately trees and carpeted with green grass. When the Indian was hungry and could not find game elsewhere, he could always go to the island and kill a deer. An unwritten law forbade the killing of more than one deer, and even then, the hunter might resort to the island only when he had failed elsewhere. But the banks of that island were of sandy soil. As the floods of the river rolled on this side and on that, the banks wore away and the island shrunk in size. When our people left the country, the island had become so small that there was only room for two or three of the great trees and most of the green grass was gone. The deer, once so plentiful there had entirely disappeared.

“I have since learned that there is a kind of grass which, if it had been planted on the banks of that beautiful island, might have saved it. The grass strikes its roots deeply into the sandy soil and binds it so firmly that the waters of the flood cannot wear it away.

“My brothers, we Indians, are like that island in the middle of the river. The white man comes upon us as a flood. We crumble and fall, even as the sandy banks of that beautiful island in the Chattahoochee. The Great Spirit knows, as you know, that I would stay that flood which comes thus to wear us away, if we could. As well might we try to push back the flood of the river itself.

“As the island in the river might have been saved by planting the long rooted grass upon its banks, so let us save our people by educating our boys and girls and young men and young women in the ways of the white man. Then they may be planted and deeply rooted about us and our people may stand unmoved in the flood of the white man.”

So let us not forget, from where we came.

Today starts another chapter in our history, as we continue down this path that our forefathers had planned for us. For this nation to survive with its traditions, culture and language, it is incumbent for the Muscogee women to regain its strength and to inspire other women to step forward and say “Yes, I am a Muscogee Creek woman, I know who I am, I know where I’ve been and I know where I am going.”

As a role model for the next group behind you, how many will you inspire? How many will follow in your footsteps? Let’s hope and pray there will be many.

MVTO

God Bless All

Wilbur Chebon Gouge

Muscogee History

PRE-REMOVAL: THE SOUTHEASTERN HOMELANDS

The Creation Story

The creation of the Muscogee (Creek) as described by Chaudhuri begins with the seeds of life slowly stirring deep inside the darkness of the earth. Mother earth was completely covered by water in the beginning. The seeds of life, mixed with the earth's soil and the water, generated the first traces of life. Heated by the sun, those traces of life formed into the living beings inside the earth. Eventually, the living beings needed more warmth and light for their development. Eager for knowledge, the inhabitants needed to escape from the confines of the earth's center. The crawfish tried to lead the journey out from the depths of the earth and to the outside world. However, the crawfish was unable to break through the mud, and become stuck between the earth's inner and outside worlds. The escape route was blocked for all the inhabitants by the struggling crawfish.

The turtle, very well suited for the muddy conditions between the two worlds, decided to lead the way to the next world. The turtle pushed its way from the center of the earth, and into the next world, all of the other living beings climbed up on its back. The turtle with all the living beings on its back gradually emerged through the mud and water into a world of darkness, fog and air. All the living beings had made the journey to a new world of enlightenment atop the great transporter, the turtle. Unfortunately, this world was blanketed with a dense fog, caused by the elements of the sun and water. Eventually, the water receded and the living beings left the turtle's back for dry land. Again, the animals and humans lived in the dark and cold, wandering around the vastness of the earth. Frightened by the darkness caused by the dense fog, the animals and humans began to call out to one another. The animals and humans gathered together in groups to comfort each other. All at once, the animals and humans began to pray and chant to the creator for help from the darkness of the fog.

Hesaketvmese, the master of breath, answered the prayers of the animals and humans and gave relief from the haze of the fog. A strong wind from the east began to blow and pushed the dense fog away. The removal of the fog signaled the beginning of a new world. The animals and humans were able to see one another for the first time. The animals and humans were very appreciative of one another for coming together in a time of despair. Animals and humans continued the kinship bonds which had formed between them. Humans became clan brothers of the specific animals which were present when the fog lifted. Humans learned from the animal's keen sense of their environment and took on characteristics that would facilitate survival. Thus began the life of the Muscogee (Creek) people and the life of the clans. Remembering, honoring, and respecting these values of animals and humans are a sacred tradition.

The people utilized the clans to establish a society with values and norms. The people took on characteristics of their animal brothers and sisters. The bear clan is generally considered tribal leaders because of the strength and integrity possessed by both the animal and person. Deer clan members were generally council members and council leaders because of their adaptability and wisdom. Wolf clan members were the tribe's war leaders and hunters because of their strength and resourcefulness. Wind clan members are the spiritual leaders because Hesaketvmese came from the east.

The norms that governed the clans were simple and basic so as not to be confused. First, a person is born into the clan by matrilineal descent. Second, marriage among two people of the same clan is forbidden. Third, keeping with the same concept of marriage, when a man and a woman are married the man goes to live with the woman and her family. This is to ensure that the woman, or the female element, the giver of life, is treated with the greatest of respect. The man must then work, hunt and provide protection for all the members of his new family. The values and norms established were taught to the children by the child's aunts and uncles on the mother's side.

The Mississippian Era

Our Muscogee (Creek) ancestors lived for thousands of years in southeastern North America, in what are now the states of Georgia, Alabama, Tennessee, South Carolina and Florida. Over time, their culture evolved into what is now called the **Mississippian Culture**. During the Mississippian time period they built huge earthen mounds. These mounds were built for various purposes. Some were platforms for the homes of chiefs, some were for religious ceremonies and some were for burials. They are the only structures that remain of the many highly organized and flourishing tribal towns of the Mississippian society. As many as 2,000 to 3,000 people inhabited these tribal towns. The time period of the Swift Creek Period through Mississippian Period was 100 AD to mid/late 1500's AD.

Mound Sites

Although many of the ancient mounds have been destroyed by farming and development, some have been preserved. They are the only visible remains of the Mississippian Culture that can be found throughout the southeastern United States. One of the best preserved of these town sites is the **Ocmulgee National Monument** near present-day Macon, Georgia. (See photo below.)

The earth floor of this “earth lodge” with an eagle platform is well over one thousand years old.
Ocmulgee National Monument, Macon, Georgia.

127 miles northeast of Ocmulgee National Monument is the site of the **Etowah Mounds**, another Muskogean site.

Southeastern Ceremonial Complex

One notable aspect of the Mississippian culture, was the artwork that was produced. Today it is referred to as the **Southeastern Ceremonial Complex**. It includes engraved copper, finely carved stone and shell necklaces and pendants, stone statues, and intricately wrought stone maces, clubs and hatchets as well as pottery.

Creek Trading: European Contact Era

In 1540, Hernando De Soto's expedition spent a year traveling through the Muscogee territory. They could see by the large towns and the prosperous countryside that our ancestors lived well. They had plenty of food, they were strong and healthy, and they did not have to work very hard to survive in the resource-rich region.

To ensure his safe passage through the tribal towns, De Soto routinely would arrest the local Chief and take him along as hostage to the border of the next chiefdom. He chained up many of the people to carry his cargo and made the tribal towns along the way use their stored food to feed his army of several hundred men and animals. Thousands of Native people were killed by De Soto's army. Thousands more died from the diseases his expedition brought from Europe, such as measles, small pox and "the plague".

After De Soto's expedition, there were more Spanish expeditions. Tristan De Luna came in 1560 and Juan Pardo in 1566. Both were in search of the lush life of the Coosa chiefdom that De Soto had described. They were disappointed and dismayed to see that Coosa was on the decline. The population was much smaller and thistles and weeds grew in place of the previously cultivated fields that had stretched from one town to the next.

The English founded Charlestown in 1670 as the capital of the colony of Carolina. They became well acquainted with the Muscogean people through trade. The Creek people traded captives and deerskins for European goods. When the slave trade was outlawed in the colonies, the focus shifted to deerskins. Over time the English came to refer to them as "Creeks", although the Muscogees continued to refer to themselves by their tribal town names, such as Tukvpcce, Coweta, Cussetah, Abihka, Alabama, etc. In the 1600's, the Muscogee people adopted horses, guns, metal utensils and cloth. In the late 1690's, the Spanish established the town of Pensacola from which they also traded with the "Creeks".

In the late 17th century, after hearing the reports from early explorers of the riches and bounty in North America, the Spanish, English and French began to colonize the region and establish towns and farms. To promote diplomacy, the Creeks agreed to friendly relations with all three of their trading partners: England, France, and Spain. Creek tribal leaders established commerce with their neighbors to build the tribe's economy. In 1717, the French established Fort Toulouse as their trading post in Alabama where the Tallapoosa and Coosa rivers meet.

In the 1700's, Europeans started calling the Muscogee, Creeks, because they resided near rivers, streams, and creeks. Eventually they referred to the tribal towns as "Upper" and "Lower" Creeks. The "Upper Creek" towns were those located along the Coosa and Tallapoosa rivers. Many Upper Towns were close to Ft. Toulouse and supported the French. The "Lower Creek" towns were those located along the Catv Hvtce and Flint rivers. Many Lower Towns were close to Florida and were friendly to the Spanish. With the exception of the Yamassee War in 1715, relations between the Europeans and the "Creeks" were, for the most part, friendly for many years; later that would change.

Not since De Soto had there been such a devastating effect on the Muscogee culture. After about three generations of trading, the "Creeks" became dependent on the trade goods. They discarded their traditional ways of making tools, clothing and cooking & water vessels. They became

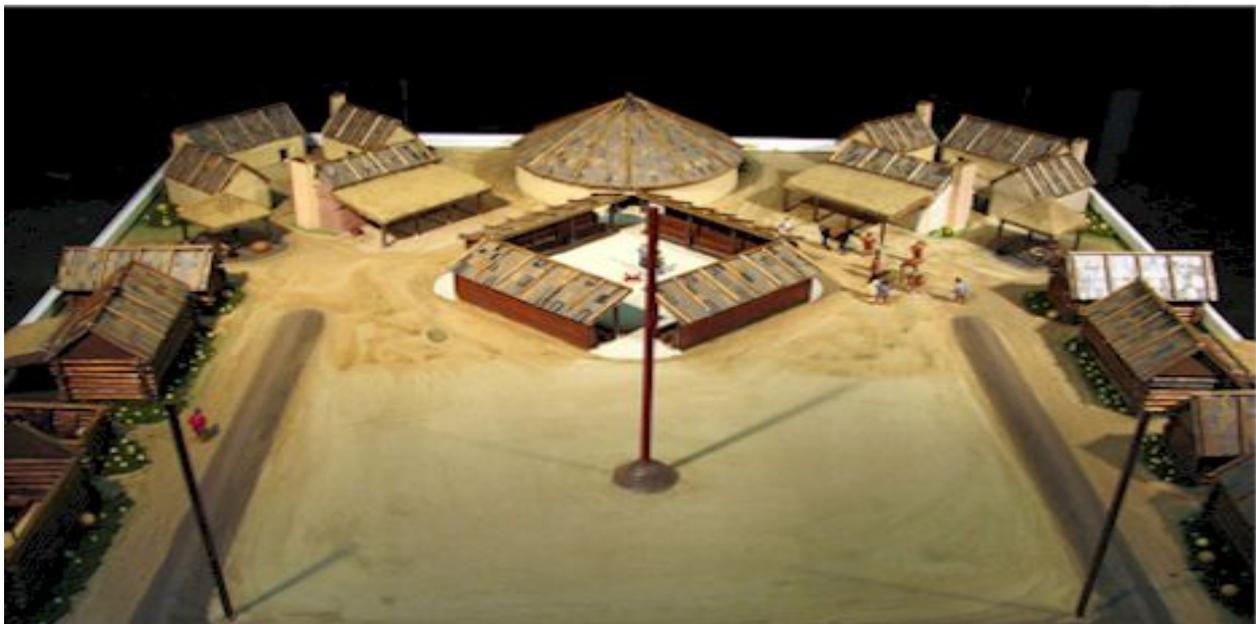

dependent on the trade industry to the extent that they were depleting their hunting grounds of deer. They had to travel farther and stay gone longer from their homes to find deer.

During the last half of the 1700's, the Creeks found themselves embroiled in the wars between the Europeans. In the French and Indian War, the Spanish, British and French were each trying to gain control of the entire region and each wanted the Creeks' loyalty. They would raise the prices of their goods or withhold them completely in order to sway the Creeks.

When the English colonists won the French and Indian War in 1763, they won the battle for complete control and opened up the Mississippi Valley for "westward expansion", meaning that the Europeans population would continue to grow. The Treaty of Paris, drawn up at the conclusion of the war, included trading Creek lands. Creek leaders were appalled that the Europeans would presume to give away their land without their consent.

In 1733, the Lower Creeks permitted General Oglethorpe to establish the colony of Georgia. Creek leaders, recognizing the inevitable pressure of the Europeans, negotiated treaties in the best interest of Creek people. Other nation's entered into the treaties with the Creek Nation as did England in the treaty of 1733, which promised friendship, protection and acknowledged that the area did, by ancient right, belonged to the Creek Nation.

Features of a Historic Creek Town

Model of William Bartram's 1789 drawing of a Creek Tribal Town

A Creek town square consisted of an open area surrounded by terraces or banks and was representative of the Creek's ability to incorporate culture into the design. There was a circular mound topped with a rotunda and a square terrace upon which a public square stood.

Residential buildings in Creek towns mirrored the organization of the public square. Family plots consisted of small compounds of up to four houses enclosing a courtyard, with the number

of houses depending upon the size of the family. The Creeks had large fields of corn, beans, squash and other vegetables.

The towns consisted of groups of houses owned by women. Women were considered head of the households. Within Creek society women held a most prominent place. Their daughters built houses on family land or nearby after they were married.

Creek clans were dispersed through several communities, with each town containing members of several clans. Clan identity influenced where members lived, as clan members' houses were generally located together in a household group.

Older towns were called 'mother towns'. When a town's population overgrew, a split would occur and half the people would move to a new location and start a new town, a 'daughter town'. Tribal towns were also designated as a 'red town' or a 'white town'. Red towns were war towns and white towns were peace towns. The red towns would choose a war chief and white towns would conduct peace talks after a war.

The Creek's Relation with the U.S.

The colonist's victory over Great Britain in the 1776 American Revolutionary War created a new power for the Creeks to deal with. Without the aid of the French or Spanish, they were at the mercy of this new government.

The federal government in its first treaty with the Creeks, the Treaty of New York, 1790, guaranteed Creek claim to their land and promised protection against Georgian encroachment. Land cessions of 1783, 1785, and 1786 were approved in this treaty.

Alexander McGillivray (Creek/Scottish), a dynamic tribal leader, worked to change the great Council from a loose association of town governments to a more centralized, forceful, and active institution. To effect this change, however, required the towns to relinquish control over their political and cultural life.

In 1796, President Washington appointed Benjamin Hawkins as the Southeastern Indian Superintendent. Hawkins implemented an assimilation policy. For 20 years he was able to destruct the traditional Creek system of government. He encouraged the council to create an executive committee and appoint a national police force, who was to arrest and punish tribal members who violated tribal law. He also urged them to allow missionaries to establish schools and instruct the Muscogee children in Christian religion, the English language, mathematics and the English farming and social practices. Hawkins also wanted to change the social structure by switching the roles of women and men. In order to survive, many "Lower Creeks" did make this change as the deerskin industry declined. But only a few of the "Upper Creeks" did. This created some resentment among the "Upper Creeks" who wanted to maintain the traditional Muscogee way of life.

This division between the two groups of "Creeks" was made worse by the U.S. Government's plan to convert an old trading path into a Federal Road that would cut right through the Creek Nation. The road was first intended to be a postal route from Washington to New Orleans. The Upper Creeks knew that the road would enable more and more white settlers to come with their families, herds, and slaves and kill their game, cut their trees, foul their water, sell whiskey to

their young and settle in their land. The mounting assaults on their lands, hunting grounds and culture increased their anxiety.

To preserve their traditional existence, Creeks emulated their white neighbors to convince the alien society that Native people were being assimilated, in hopes that they would be left alone and in peace. Based on what he saw among the Creeks, Benjamin Hawkins, Indian agent, believed that he was bringing civilization to the Muscogee's. Individualism, cash crops, and the steel plow were introduced to Creek families in the 1790's.

A century of trading, intermarriages and factions produced fertile ground for the agitations of Tecumseh. In 1811, Tecumseh and his followers came to Tuckabatchee, a major Creek population and political center located on the west bank of Tallapoosa River, to ask the main Upper Creek town to join in his revolution against the U.S. A group of Koasati warriors accompanied Tecumseh to his home in Shawnee territory. In the spring of 1812, on their return home, they executed several white settlers in Tennessee. As a result, the Secretary of War instructed the Tennessee governor to retaliate, which was a precursor to the conflict between the Creeks and Andrew Jackson.

The Red Stick Warriors

Tecumseh's speech struck a chord with many of the warriors at Tukvpvce. Angered by the events of the last 15 years, a group of "Upper Creeks" emerged to ward off the impending destruction of the Muscogee nation. Hillis Hadjo (Josiah Francis), Cussetah Tustenuggee (High Head Jim), Paddy Walsh and Peter McQueen, among others, advocated the return to traditional ways, severing all ties with Americans, expelling all whites and mixed-blood Creeks who lived like whites, and overthrowing the leaders who responded to Hawkins more than their own people. This group came to be known as the Red Stick Warriors. For two years, the Red Sticks fought twelve major battles known as the Creek War of 1813-1814. The more traditional Creeks were against the new life that was being introduced. Encroachment of the whites into the traditional lands of the Upper Creeks instigated the Red Stick War. This conflict was looked upon by the U.S. as a means to weaken Creek people by pitting one side against the other (divide and conquer).

The Battle of Horseshoe Bend

The Red Sticks at Horseshoe Bend were led by the respected war leader Menawa. The previous December, he led the inhabitants of six Upper Creek towns (Nuyaka, Okfuskee, Eufaula, Fish Pond, Okchaya and Helvpe), to a bend in the Tallapoosa River where they built a fortified town. They constructed a village of 300 log homes at the southern toe of the bend, and a fortified log & mud wall across the neck of the bend for protection. Calling the encampment Tohopeka, Menawa hoped that the wall would hold off attackers or at least

delay them long enough for the 350 women and children in the camp to escape across the river if necessary. To defend Tohopeka, he had around 1,000 warriors of whom about a third possessed a musket or rifle; the rest fought using bows & arrows, tomahawks and war clubs.

Approaching the area early on March 27, 1814, Commander Andrew Jackson split his command of 3,300 men and ordered Brigadier General John Coffee to take the 1,300 mounted militia and the allied Creek and Cherokee warriors downstream to cross the river at the toe of the bend. From this position, they were to act as a distraction and cut off the Red Sticks' line of retreat. Jackson moved towards the fortified wall with the remaining 2,000 men of his command.

At 10:30 AM, Jackson's army opened fire with two cannons. For 2 hours they shot 6-pound and 3- pound cannon balls at the wall, but could not penetrate it. The 1,000 Red Sticks stood on the inside of the wall shouting at Jackson's army to come and fight them in hand to hand combat. While the American guns were firing, three of Coffee's Cherokee warriors swam across the river, stole several Red Stick canoes and canoed their Cherokee and Lower Creek comrades across the river to attack Tohopeka from the rear. Once across the river, they set fire to several of the homes.

Around 12:30 PM, when Jackson saw the smoke rising from the burning houses, he knew that Coffee was attacking from the rear. He ordered his men forward and they scaled the walls. In the brutal fighting, the Red Sticks were outnumbered and out gunned, but they fought fearlessly. "Arrows, spears and balls were flying, swords and tomahawks were gleaming in the sun." Seeing that there was no way for them to defeat his army, Jackson offered them a chance to surrender, but they fought even harder. Fighting in the camp raged through the day as the Red Sticks made a valiant final stand. At the end of the day, over eight hundred Red Sticks were slain, 557 on the battlefield, 300 shot in the river. Menawa lay wounded and unconscious until nightfall, when he crawled to the river and escaped by climbing into a canoe. Having lost so many warriors, the Red Sticks would never again be able to pose a military threat to the South.

After The Battle of Horseshoe Bend

Andrew Jackson built Fort Jackson at the confluence of the Coosa and Tallapoosa, right in the heart of the Red Stick's Holy Ground. From this position, he sent out word to the remaining Red Stick forces that they were to sever their ties to the British and Spanish or risk being wiped out. Noted Red Stick leader William Weatherford (Red Eagle) was not present at Horseshoe Bend, but he was wanted for the attack on Fort Mims. Understanding his people to be defeated, he walked into Fort Jackson and surrendered, telling Jackson that if he had warriors, he would still fight and contend till the last. As a matter of vengeance, 22 million acres of land, what was determined to be equivalent to the expenses of the war, was ceded to the U.S. under the Treaty of Ft. Jackson in 1814.

After Horseshoe Bend, Jackson became president and began the process of moving all the Creeks out of the southeast and into Indian Territory, now known as Oklahoma. This process included many treaties in which the Creeks were required to give up large amounts of their land.

The Muscogee's strengthened and centralized their National Council by codifying tribal laws in 1818. A law was passed that no tribal lands could be sold without the approval of the council under the penalty of death.

In 1825, William McIntosh, speaker of the Lower Towns, signed the Treaty of Indian Springs, which ceded all Muscogee lands in Georgia and 2/3 of their Alabama lands in return for new land in what is now Oklahoma. McIntosh was executed under National Council laws. The new Treaty of Washington in 1826 declared the 1825 treaty null and void and ceded Georgia lands. The remaining lands in the Creek Nation were ceded in the treaty of 1827.

REMOVAL ERA

The Indian Removal Act

In 1829, Andrew Jackson became president and immediately went to work on The Removal of all tribes in the east. Although opponents of Removal claimed it was an immoral violation of the spirit of the treaties that the U.S. had signed with the tribes, Jackson still won. On May 26, 1830, the Removal Act was signed into law. Jackson appointed commissioners to negotiate Removal treaties, targeting the Southeastern tribes first because of their rich cotton land and gold mines. For the next 4 years, the Muscogee continued to fight for their ancestral homelands, but the Alabamians passed laws and committed such heinous acts against them that eventually some began to realize that Removal was inevitable. Realizing that they would never receive justice, the Muscogee only left after being pushed out of their homes and into the woods, having had their crops destroyed, their land, livestock and possessions stolen by the Alabamians. Removal became necessary for their survival. Even so, they fought Removal every step of the way. In December of 1834, the first 630 Creeks left Alabama. It took over two years to complete the removal. A Little Rock, Arkansas observer wrote in December of 1836 as some Creeks passed through Arkansas, "Thousands of them are entirely destitute of shoes or cover of any kind for their feet; many of them are almost naked, and but for a few of them have anything more on their persons than a light summer dress calculated for summer, or for a warm climate. In this destitute condition, they are wading in cold mud, or are hurried on over the frozen ground, as the case may be. Many of them have in this way had their feet frost-bitten; and being unable to travel, fall in the rear of the main party, and in this way are left on the road to await the ability or the convenience of the contractors to assist them...". This scenario occurred repeatedly until over 21,000 Muscogee people were removed to Indian Territory. Many died on the way.

In 1830, the U.S. Congress passed the Indian Removal Act. A 2nd Treaty of Washington ceded Alabama lands and dividing the remaining lands between Creeks who did not want to join McIntosh's group in Indian Territory. Forbidden by Georgia state law for Indians to testify in court, the Muscogee's were legally powerless to protect their lands.

In 1827-38, approximately 23,000 tribal members were forcibly marched on the 1,200-mile painful journey to Indian Territory, an estimated 3,500 Creeks died on the trail. An estimated 2,500 Creeks considered to be prisoners, were shackled and placed on board steam boats at Montgomery, Alabama. Three hundred died tragically on the steamboat Monmouth in the Mississippi River. The final removal took place in the winter of 1838 when 500 Creek families were forced to leave their homes.

Many of the Tribal Towns brought with them their sacred fire which helped them persevere on their long journey from the homeland. This fire was the focal point for many of the Tribal Towns as they established roots in their new lands.

Even though each and every Creek encountered great tragedy and trauma during the Removal to Indian Territory, they remained courageous and hopeful that the new land would bring peace for them. The Creek identity remained strong through this ordeal that brought enormous personal loss-the Creek spirit was not broken.

The Sinking of the Monmouth

As told by Dave Barnett, Tuckabatchee Tribal Town

“When we boarded the ship, it was at night time and it was raining, cloudy and dark. There were dangerous waves of water. The people aboard the ship did not want the ship to start on the journey at night but to wait until the next day. The men in command of the ship disregarded all suggestions and said, “The ship is going tonight.”

The ship was the kind that had an upper and lower deck. There were great stacks of boxes which contained whiskey in bottles. The officers in charge of the ship became intoxicated and even induced some of the Indians to drink. This created an uproar and turmoil.

Timbochee Barnett, who was my father, and I begged the officers to stop the ship until morning as the men in charge of the steering of the ship could not control the ship and keep it on its course but was causing it to go around and around.

We saw a night ship coming down the stream. We could distinguish these ships as they had lights. Many of those on board our ship tried to tell the officers to give the command to stay to one side so that the night ship could pass on by. It was then that it seemed that the ship was just turned loose because it was taking a zig-zag course in the water until it rammed right into the center of the night boat.

Then there was the screaming of the children, men, women, mothers and fathers when the ship began to sink. Everyone on the lower deck that could was urged to go up on the upper deck until some of the smaller boats could come to the rescue. The smaller boats were called by signal and they came soon enough but the lower deck had been hit so hard it was broken in two and was rapidly sinking and a great many of the Indians were drowned. Some of the rescued Indians were taken to the shore on boats, some were successful in swimming to shore and some were drowned. The next day the survivors went along the shore of the Mississippi river and tried to identify the dead bodies that had been washed ashore. The dead was gathered and buried and some were lost forever in the waters.”

INDIAN TERRITORY ERA

Arriving In Indian Territory

The Treaty of 1832 was the precursor to forced removal, where thousands of Creeks lost their lives. The sacrifices that were made could never be compensated within the treaty, however, Creek leaders pushed for larger and more allotments and insisted on funds for public works projects in the new land.

Creeks erected new homes, transplanted their religious and political institutions, and worked hard to strengthen their independent republic. The survival of Creek families, from the homelands to Indian Territory, depended on their ability to adapt to a new environment and persevere against adversity. Creek communities replicated as much as they could, the life left behind in the East, by staying close to the rivers and planting corn fields in their new towns. Upper Creeks resided in the southern half of the Muscogee Nation with the Lower Creeks living predominately in the northern half. The Lower (non-traditional) Creeks resided near the Arkansas and Verdigris rivers, while the Upper (traditional) Creeks settled near the Canadian river.

The last of the remaining Creeks, led by Opothle Yahola, began to arrive at Fort Gibson, Indian Territory in December of 1836. They were suffering badly after their long and painful journey. The McIntosh faction of Lower Creeks had already re-established their lives. They had built towns and farms along the Three Forks area of the Arkansas River and along the Verdigris River, where, under the leadership of Roley McIntosh (William's brother), they were beginning to prosper. They had worked hard and fought hard to survive. Having adopted the ways of the whites, they were uneasy about accepting the new arrivals from the east. The troops at Fort Gibson were on the alert, expecting there might be trouble, but Roley McIntosh and Opothle Yahola were able to avoid conflicts by agreeing that the new arrivals would live in the southwestern portion of the Creeks' reserved lands and build their towns along the North Fork, Deep Fork, and Canadian River. The two groups came to be known as the Arkansas Creeks and the Canadian Creeks.

Government in the New Creek Nation

Government became the one unifying factor in the new Creek Nation. According to the agreement made between Opothle Yahola and McIntosh in 1836, the two groups governed themselves according to their own values and in separate councils. In 1840, they decided to re-establish the National Council. They established a new capital near High Springs, the halfway point between the two settlements and met there once a year. They each selected their own principal chief who guided the headmen in conducting national business. Roley McIntosh represented the Arkansas Creeks for many years, but the Canadian Creeks sent their traditional tribal town Chiefs. Although Opothle Yahola was the most influential leader, he was never the official chief. They began the process of rebuilding the Creek Nation and in 1859 the National Council prepared a written constitution. The American Civil War brought a halt to the growing prosperity and the rebuilding of the Nation.

The American Civil War (1861-1865) was disastrous for the Muscogee people. Early attempts to remain neutral crumbled under pressure from Texas and Arkansas and clever Confederate diplomacy. Arkansas Creeks signed Confederate treaties and organized military companies to serve as a home guard. Opothle Yahola believed that the Creeks should remain neutral in what he saw as a white man's war. Still, the Canadian Creeks were drawn into the war out of self-defense. Opothle Yahola and over 7,000 followers packed up everything they had, and tried to escape to Union lines in Kansas, but they were attacked at Round Mountain by the Confederate Creek Regiment. After two sharply fought battles, Opothle Yahola's group, also known as Loyal Creeks, managed to slip away, only to be attacked again at Chustenalah. This time they lost everything they had and became scattered in the blinding snow. They stumbled into Kansas

freezing, hungry and exhausted. The Union Camp was not equipped to help them, so Opothle Yahola rode to another outpost to obtain the aid his people needed but found no relief. He returned to his people, but he became sick and never fully recovered. He wanted to meet with President Lincoln about his tribal members, however, before this could happen, the great Muscogee Chief and hero passed away suddenly. Upon returning home after the war, many survivors found their homes burned.

Rebuilding After the War

The Reconstruction Treaty of 1866 that ended the Civil War required Creek Nation to give up 3.2 million acres, approximately half of the Muscogee domain. In October of 1867, the nation adopted a new constitution and code of laws, an effective framework of government for Creek citizens. The new government was patterned after the U.S. system, it included three branches: the executive, legislative and judicial. The Creek government was presided over by an executive branch. The executive branch consisted of a principal chief and second chief, elected by male citizens over the age of 18. Samuel Checote was the first elected Principal Chief. A judicial branch and a bicameral legislature composed of a House of Kings and a House of Warriors. Representation in both houses of this legislative assembly was determined by tribal town. This "constitutional" period lasted for the remainder of the 19th century.

Creek Nation 1867 Constitution

The Civil War facilitated the creation of a new Creek constitution in 1867 that included the adoption of freed slaves (Freedmen) into the nation as citizens. One of the greatest changes brought about by the 1867 constitution was the system of voting by secret ballot rather than visible show of hands.

The legislative branch, or National Council, was a bicameral form of government made up of a House of Kings (like the Senate) and a House of Warriors (like the House of Representatives). The leaders of the individual tribal towns chose National Council members according to the traditional system of representation. The Muscogee Creek had for hundreds of years been governed by their local tribal towns and participation in a form of regional councils. The nation was composed of 6 Districts: Muskogee, Coweta, Arkansas (Eufaula), Deep Fork, North Fork (Okmulgee) and Wewoka. The judicial branch consisted of a national Supreme Court composed of 5 judges chosen by the council, 6 prosecuting attorneys and a law-enforcement agency.

The Treaty of 1866 was the final treaty between United States and Creek Nation and was punishment for the Lower Creeks signing the 1861 treaty with the Confederate States of America. In 1889, the Creek Nation was paid \$2.3m for land ceded in the 1866 treaty.

The Upper Creeks perpetuated their economic system in which the town leaders took charge of the harvest and the tribe's annuity payments. Annuity money was used for public works projects including gristmills and ferries. Creeks were known for budgeting their tribal funds wisely. The Lower Creeks were influenced by mainstream American culture which affected their perception of economics, social, and political issues.

Creek Schools

The tribal school system of the Creek Nation, funded from annuities, consisted of 7 boarding schools for Indian children, 3 boarding schools for the descendants of Freedman and 65 day schools. Tullahassee Manuel Labor School was located ten miles north of Muskogee. The Koweta Mission day school was opened in 1843. Loughridge Boarding School was opened in 1851. Asbury Manual Labor School was opened by the Methodist northeast of Eufaula. Harrell Institute, a Methodist school was awarded a charter in 1881 as the Creek Nation’s first higher education institution in Muskogee. Bacone College (Indian University) was awarded a charter and a land grant from Creek Nation in 1885. In the 1890’s, Levering Mission operated near Wetumka, Nuyaka Mission was west of Okmulgee and Yuchi Mission was in Sapulpa. Wealaka replaced Tullahassee, which burned in 1880.

Teachers were appointed at a uniformed salary of \$25 a month with the requirement of an average of 10 pupils. An additional \$2 a month for each additional pupil was added to the average. Creeks built a reputation for having a well-developed system of education. In the early 1900’s, the Superintendent for Creek schools estimated the literacy rate for Creeks who could read and write the language to be 95%. In 1853, a national alphabet was adopted by the Creek Nation, previously, several alphabets were in use.

Political Parties

Political parties were formed in the Creek Nation elections of 1879, one known as the Pin, later reorganized as the Nationalist Party, were supporting Samuel Checote. A second party, known as the Muskogee Party was led by Ward Coachman and mainly opposed the Pins. The third was the Loyal Party that nominated Isparhecher. The primary differences in the parties were both the Loyal and National Parties favored more traditional forms of government, with the Muskogee Party being more moderate and willing to compromise over white immigration into Creek Territory, which the other two were not prepared to do.

In 1883, the three political parties were in existence during the election for Chief, Second Chief, members of the House of Kings and Warriors. The party nominees were as follows: Pin Party-Samuel Checote for Principal Chief and Coweta Mekko for Second Chief; Muskogee Party-JM Perryman for Principal Chief and Sam Brown for Second Chief; Loyal Party-Isparhecher for Principal Chief and James Fife for Second Chief.

Pre-Allotment

With the treaties, the U.S. had recognized Indian nations, as well as the Creeks, as independent sovereigns. Even though the federal government had acknowledged the tribes as distinct political communities with full authority and rights to manage their own affairs, the U.S. took on a paternalistic attitude towards Native people. The federal philosophy was one of assimilation, in which the ownership of land would be owned individually and not in common.

To bring about assimilation, the federal government gained legal control over the tribes through legislation such as the Dawes Allotment Act. An 1871 act ending treaty making provided the first legal groundwork necessary to begin assimilationist lawmaking. In 1887, Congress passed its most assimilative law, the Land in Severalty Act, also known as the Dawes Act or the Allotment Act. The act's aim was to assimilate Indians into white society by teaching them the techniques of farming and the values of individualism and private ownership.

The Dawes Act divided communal Indian lands into individual allotments, eradicating tribal governments and opening reservation land to white settlement. It was believed this legislation would "civilize" Indians. Units of acres allotted were as follows: head of a family = 160 acres; single person 18 years old and older = 80 acres; boys under 18 years old = 40 acres. Married Indian women were not entitled.

Allotment in Indian Territory, 1887-1907

In regard to allotment, full bloods were not allowed to sell their allotments for 25 years, allotments were held in "trust" by the Federal Government for 25 years, mixed bloods were allowed to sell immediately, and guardians were appointed to handle the allotments of full bloods and orphans. The allotment process proved disastrous for tribes culturally, politically, and economically. Culturally, the notion of private ownership seriously conflicted with the deeply held Creek tribal belief that land was a sacred resource to be used communally. Politically, the allotment process seriously eroded the role and authority of the Creek tribal government. Economically, 60 million acres of land had been sold as "surplus" in accordance with the Dawes Act. Government officials often intentionally allotted poorer land to Indians and labeled more desirable parcels "surplus" for sale to settlers.

Opposing Allotment

In 1895, Creek Chief Isparhecher opposed allotment because he believed that it would break up tribal government. The Creek Nation, hoping that compromise would save their government from extinction, finally agreed to the allotment of their lands in 1900. William A. Jones, Commissioner of Indians Affairs, approved regulations that enabled a Creek allottee to sell all of his land, except for the 40 acres homestead. However, this regulation was unsuccessful and was replaced by a requirement that the Indian office supervised any sales. Many full bloods refused to accept their allotments and a separate government was formed. At this point in Creek history, the Crazy Snake Rebellion had its beginning.

The Curtis Act (1898) in conjunction with the Dawes Act was written specifically for the Five Civilized Tribes under which Creek lands were allotted. It also dissolved tribal courts, put tribal funds under the control of the Secretary of the Interior and required presidential approval of all tribal laws. That act provided for forced allotment and termination of tribal land ownership without tribal consent, unless the tribe agreed to allotment. It also made tribal laws unenforceable in Indian Territory. In 1898, Principal Chief Pleasant Porter signed the first and second Creek agreements which allowed for allotment of Creek lands.

Chitto Harjo led a traditional movement against allotment and was an advocate for the traditional clan and Creek government that the U.S. was attempting to eliminate. The followers of Chitto Harjo established a traditional Creek government at Hickory Ground. They cited the Creek Nation's previous treaties with the U.S., especially the treaty of 1832, which had guaranteed them self-government. Many Creeks rejected the terms proposed by the Dawes Commission. The American press referred to Crazy Snake's men, and any other Creeks who opposed allotment as "Snake Indians." The traditionalists set up a National Council that passed laws prohibiting allotment, forbidding Creeks from hiring whites to work for them or encouraging whites to move into the Nation.

The Curtis Act of 1898

In 1898, the United States Congress passed the Curtis Act in which they gave themselves the power to dismantle the national governments of the Five Civilized Tribes. The Dawes Commission was established for the purpose of negotiating with the Muscogee Nation for tribal landholdings to be broken up into individual household allotments, still attempting to encourage the adoption of the European-American style of subsistence farming.

In 1900, the noted statesman Chitto Harjo heroically lead organized opposition to the Curtis Act. In his efforts, he epitomized the view of all Muscogee people that they possessed an inherent right to govern themselves. For Chitto Harjo and those like him, it was unimaginable that the Muscogee government could be dissolved by an act of a foreign government. This perception proved to be correct. In the early 20th century the process of allotment of the national domain was completed. However, the dismantling of the Muscogee government was only partially completed. The Muscogee Nation still maintained a Principal Chief (appointed by the U.S. Presidents) throughout this stormy period.

A large number of Creeks were opposed to any further tampering with their method of government by internal or external elements. Most of the people, who felt this way lived in tribal towns, still practiced original customs and continued to embrace traditional Creek culture.

At the last Creek Nation constitutional election held in 1903, Pleasant Porter was re-elected as Principal Chief and Moty Tiger was elected Second Chief, Concharta were the election officials.

Five Civilized Tribes Proposal for an Indian State

In 1904, the Five Civilized Tribes drew up a constitution and requested that the Indian Territory be admitted to the union as an Indian state named Sequoyah. Muscogee Creek people, known for being leaders, played a significant role in the development of the proposed Indian State. Chief Porter presided over the Sequoyah Convention. Alexander Posey, Creek poet and journalist, suggested the name Sequoyah.

Despite all the efforts, in 1907, the Oklahoma and Indian territories were combined and admitted to the Union as the state of Oklahoma.

STATEHOOD ERA

U.S. Citizenship

All members of the Five Civilized Tribes were made US citizens in 1901. Tribal members, including Creeks, did not lose their tribal citizenship or rights when they became American citizens. The Creek people maintained a strong tribal identity. In 1903, the final elections for Principal Chief and National Council were held. In 1906, the Five Civilized Tribes Act attempted to dissolve the tribal governments, timeline extended to June 1907.

In 1907, the final National Council meeting at the Council House on 6th Street in downtown Okmulgee was conducted. The meeting lasted for 3 days as the council sought to resolve all pending issues of national importance before closing the tribal government. At this point, the Creek government was not recognized and a period of federally appointed chiefs begins. Creek Nation could no longer elect its own head of government but was forced to accept the Bureau of Indian Affairs' choice for Principal Chief. Contrary to the rights guaranteed to the Creeks in their treaties, the federal actions were deemed illegal and denied the Nation's inherent rights of sovereignty. For several decades, Creek leaders continued to fight for status to elect our tribal leaders and reestablish the government.

In an attempt to reorganize Creek government in 1909, the Tribal Towns elected delegates and convened the Creek Convention. However, the U.S. did not recognize the tribal government.

The Meriam Report of 1928 on Indian economic and social conditions revealed an existence of poverty, suffering, and discontent. It was concluded that Indians suffered from disease and malnutrition, a life expectancy of 44 years, and an average annual per capita income of only \$100. Many Creeks participated in this study.

The impact of this report led to the Indian Reorganization Act of 1934, allowing Indian tribes throughout the country to establish tribal governments-later resulting in the Oklahoma Indian Welfare Act that would affect Creek government.

Commissioner of Indian Affairs, John Collier, believed that Indian cultures and values had much to offer non-Indian society and that Indian problems were best solved by Indians. Congress passed the Oklahoma Indian Welfare Act on June 26, 1936 for tribes in Oklahoma. The OIWA was similar in objectives to the Indian Reorganization Act (IRA).

The Oklahoma Indian Welfare Act

The Oklahoma Indian Welfare Act affected Creek Nation in the following ways: stopped the allotment process, ended the loss of Indian lands, and reestablished tribal governments.

The Creeks recognized that the Oklahoma Indian Welfare Act, which was modeled after the Indian Reorganization Act, was written without tribal input, its ratification was highly irregular, and that the tribal governments would contradict the tribal cultures.

A typical Oklahoma Indian Welfare Act constitution established a governing board, often called a business committee and did not provide for a separation of powers. The executive, legislative, and in many instances, judicial functions were performed by the governing board. Adult tribal members make up the general council membership with each having voting privileges.

Creeks refused to adopt the Oklahoma Indian Welfare Act, fearing that the Federal government would force an alien government on citizens of the Creek Nation. It was believed by the Creeks that the citizens would best benefit by not accepting the requirements of the Oklahoma Indian Welfare Act. Creek leaders petitioned Commissioner Collier to allow for an election of the Principal Chief and the Second Chief.

Thlopthlocco Tribal Town adopted its own government in 1938 under the Oklahoma Indian Welfare Act, also, Alabama-Quassarte Tribal Town in 1939 and Kialegee Tribal Town in 1941. These three Tribal Towns located in or near Wetumka were developed during the administration of Creek Chief Roley Canard, also a Wetumka resident.

In 1934, delegates of 42 tribal towns elected their first Principal Chief in 31 years. In 1939, the Secretary of Interior sent a letter to the President recognizing the Creek Convention as the Legislative body of the tribe; the convention at this time was functioning much as the council had earlier. In 1944, the Muscogee General Convention adopted a new constitution and bylaws. Under the new constitution, the executive and legislative branches were merged into one body, the Creek Indian Council. The Creek Indian Council, through the 1944 Constitution, followed a pattern of self-government that evolved over the course of more than a century. This government never received BIA approval because the new governing document excluded the Freedmen without giving Creek citizens the opportunity to vote on that provision.

In 1950, Chief John Davis did not recognize the Creek Indian Council on the basis that their credentials were improper and irregular and repudiated the 1944 Constitution. He immediately appointed members of the various Tribal Towns as the new Creek Indian Council, reversing the trend of having Tribal Towns elect the Chief.

Less than 15 years after passing the Indian Reorganization Act/Oklahoma Indian Welfare Act legislation to rebuild tribal nations, Congress reversed its goal to strengthen Indian sovereignty and tribal governments by terminating federal governmental responsibilities to the tribes and to integrate Indians into the white communities of their resident states.

The Bureau of Indian Affairs, in dealing with the Creek government, began to favor termination policies under House Concurrent Resolution 108, which would terminate the office of Principal Chief and eliminate any further elections of the Chiefs. In the mid 1950's, the Bureau of Indian Affairs refused the Creeks the right to elect a Chief and the office was filled by BIA appointees until 1970.

Since the appointment of the Creek Tribal Council in the early 1950's, the council served as advisory more than legislative capacity in regard to conduct of tribal affairs by the Chief and the Bureau of Indian Affairs.

Relocation and Activism

Indian Adult Vocational Training Act of 1956 provided funds for institutional and on-the-job training available only to Indians who relocated to urban areas. Many Creeks who moved to cities to achieve economic opportunities for their families continued to maintain ties with their relatives in the Creek Nation.

In 1961, the American Indian Chicago Conference involved more than 500 Indian tribal members that drafted the Declaration of Indian Purpose, a blueprint for future federal Indian relationships. Much of the activism began with the National Indian Youth Council, followed by the founding of the American Indian Movement (AIM) in 1968 which ushered in a new period of Indian militancy. In 1968, Indian Civil Rights Act provides a Bill of Rights to protect individual Indians from abuses of power by tribal governments. In 1969, a group of Indians occupied Alcatraz Island in San Francisco Bay. The activists claimed rights to the land under the terms of the Fort Laramie Treaty of 1868.

RE-ESTABLISHING SOVEREIGNTY

Tribal Development

Tribal Towns begin to assert more control over social and political life due to general mistrust of federally appointed chiefs. In 1964, the Indian Claims Commission awards Creek Nation \$2.9m in recompense of federal violation of an 1814 treaty. In 1965, a further award of \$1 million is made for violation of an 1856 treaty. The Office of Economic Opportunity allows Creek Nation to begin creating/funding own community programs. Termination had clearly failed to "liberate" Indians or to solve the "Indian Problem."

The major recommendation of each report was that Indians be given greater self-determination, that is, greater control in governing their reservations and greater participation in planning federal Indian policy. President Nixon, in a speech to Congress denounced termination and pledged federal government resources "to strengthen the Indian's sense of autonomy without threatening his sense of community."

In 1971, the Muscogee people, for the first time since the partial dismantling of their national government, freely elected a Principal Chief without U.S. Presidential approval. During the 1970s, the leadership of the Muscogee Nation drafted and adopted a new constitution, revitalized the National Council and began the challenging process of political and economic development. In the 1980s, the U.S. Supreme Court decisions affirmed the Nation's sovereign rights to maintain a national court system and levy taxes. The federal courts have also consistently re-affirmed the Muscogee Nation's freedom from state jurisdiction.

Tribal Government 1970's

In 1970, the Principal Chiefs Act granted Creek Nation permission to vote for Principal Chief. In 1971, Claude Cox was the first elected Principal Chief under the new Constitution since 1903. In 1975, the Self-Determination and Indian Education Act passes certain rights of sovereignty and right to education back to Indian nations. The Harjo v. Kleppe decision, in 1976, acknowledges Creek right to self-governance by ensuring the creation of a legally constituted Creek national legislature. Tribal governments can now manage their own housing, law-enforcement, education, health, social service, and community development programs.

Indian Child Welfare Act of 1978 and the American Indian Religious Freedom Act, passed in 1978, further solidified the government's attempt to recognize and respect tribal cultural rights.

Muscogee (Creek) Nation 1979 Constitution

In 1979, the Nation adopted a new constitution under the Oklahoma Indian Welfare Act. The new Muscogee (Creek) Nation Constitution continued the 1867 constitutional organization of the executive, legislative, and judicial branches of the government, with distinct separation of powers among the three. The current Constitution (1979) was the first Constitution for the Muscogee (Creek) Nation since 1867.

The Principal Chief has the authority to appoint an Election Board, Supreme Court members, College of the Muscogee Nation's Board of Regents and other tribal boards. The Principal Chief shall create and organize the executive office, prepare the annual budget and administer appropriated funds in accordance with the Constitution. Principal Chiefs are required to present a State of the Nation address each year.

The National Council consists of one house with two representatives from each of the eight districts. Every bill shall have passed the National Council and be presented to the Principal Chief for approval before it becomes ordinance.

The Judicial power of the Nation is vested in the Supreme Court. All litigations between tribal officers shall originate in the District Court with the right of appeal to the Supreme Court.

Tribal Government under the New Constitution

The Muscogee (Creek) Nation government is divided into three major branches, as determined by the Constitution and are described as follows:

- The Legislative Branch is comprised of the National Council of the Muscogee (Creek) Nation and oversees proposed legislation.

- The Executive Branch includes the Office of the Principal Chief, Second Chief, Tribal Administrator and Chief of Staff who oversee the daily operations of the tribe.
- The Judicial Branch is divided into two court levels, the Muscogee (Creek) Nation District Court and Supreme Court.

The Supreme Court is the tribe's highest court with original jurisdiction over challenges to the Constitution of the Muscogee (Creek) Nation, and appellate jurisdiction over cases appealed from the District Court. The Supreme Court is the final authority on the Constitution and Laws of the Muscogee (Creek) Nation. In 1982, the tribe passed an ordinance allowing tribal courts to enforce criminal and civil jurisdiction over tribal members and subsequently sought funding from the Bureau of Indian Affairs for the tribal courts and a law enforcement program, the funding denied by the BIA and Dept. of Interior resulted in *MCN v. Hodel*. In 1988, the Creek Nation retained its court system in *MCN v. Hodel*, citing the Oklahoma Indian Welfare Act, which states, any recognized tribe or band of Indians residing in Oklahoma shall have the right to organize for its common welfare and to adopt a constitution and bylaws.

Despite tragedies and drastic changes through the years, the Muscogee (Creek) Nation has survived. Through a series of rebuilding stages, the culture, the language, the hymns, the medicine songs, and the traditions are still alive in the 21st century. Our people continue to celebrate the rich cultural heritage passed down from our ancestors. We still perform the sacred ceremonies and sing sacred songs to the Creator or offer hymns to the Savior. Our language, although endangered, is being preserved. The Muscogee people learned lessons of perseverance and overcoming adversity, which is the hallmark of the Muscogee people of the old southeast.

HEREOS OF THE MUSCOGEE PEOPLE

ALEXANDER MCGILLIVRAY, also known as Hopere Micco, was born around 1750, near present day Montgomery, Alabama. McGillivray was born to a Scot fur trapper, Lachlan McGillivray and to a half-Creek, half French woman named Sehoy Marchand.

Alexander grew up during a very important time for the Creek people. Spain had been the most powerful foreign country trying to expand in America during the late 1700's. At the same time, the American Revolution was occurring, where English Colonists were challenging Great Britain's power and the French had established a trading post at Fort Toulouse. The Creeks had dealings with all three groups.

Alexander worked at his father's trading post until he was about fourteen. The trading post was located near the Tallapoosa River in Alabama. During the 1760's, Lachlan sent Alexander to schools in Savannah and Charleston to receive his education. Lachlan McGillivray fled to Scotland in the early 1770's. He had been loyal to Britain, and the American colonists had seized many properties of British sympathizers. Since he was left behind with his mother, Alexander was able to explore the ties with his Creek relatives. By 1775, he was recognized as a young leader among the Upper Creek tribal towns. Alexander, who never got

over his father's losses at the hands of the United States, led some Creek warriors in a British attack on Georgia in 1779.

In 1780, British forces were attacked by Spain in Florida. McGillivray again led Creek warriors in aiding the British. He refused to deal with the new American government, and entered into a treaty relationship with Spain in 1784. McGillivray helped organize Upper and Lower Creeks in resisting white intrusion into the Creek country, and was a part of the Creek people's declaration of war upon the state of Georgia in 1786.

Alexander McGillivray experienced many changes in the Creek way of life during his lifetime. His leadership made it possible for the Creek people to have formal, governmental relations with Great Britain and Spain. By 1787, the United States Constitution was adopted, and the agreements the Creek people had with foreign governments began to weaken. President George Washington wanted to begin a United States federal Indian policy. In 1790, Washington's cabinet representatives negotiated the Treaty of New York with McGillivray and 29 Mekkos of the Creek Nation. The treaty recognized borders of the Creek country; the United States promised to remove white trespassers from Creek lands, but called for the Creek people to cede lands to the United States. This treaty set a pattern which would continue into the next century where tribal peoples would give up lands for promises made by the United States; promises that were often broken or ignored.

McGillivray continued to provide leadership for Creek concerns, and resisted white intrusion into the Creek country until his death in 1793.

MENAWA was born in 1766. During the Creek War of 1813, he was the Heneha (Second Chief) of Okfuskee tribal town. According to William Weatherford, as Heneha of Okfuskee, he controlled the Red Sticks, so named for the painted red sticks they carried, one of which was thrown away each day to count down the days to an important event.

Menawa led the Red Sticks into battle against an American army of 3,300 soldiers led by Andrew Jackson. Even after realizing that his strategy was not going to work, he and the Red Stick Warriors went head to head with the American army, in what is known as the Battle of Horseshoe Bend. He was wounded seven times and laid unconscious among the dead until nightfall. Under the cover of darkness, he crawled to the river where he found a canoe. Later, he told the remainder of the survivors to return to their home towns and make peace as best they could.

The Creek Nation was split on how best to deal with the overrun of their lands by the whites. William McIntosh was for the American side. McIntosh, along with other lesser leaders, signed the illegal Treaty of Indian Springs, agreeing to sell Muscogee lands. Menawa and others were outraged. They executed McIntosh, in accordance with tribal law on April 30, 1825.

During the Seminole Wars in 1836, Menawa's property was confiscated by the whites, and his family forced west. He followed later. Nothing is known of Menawa after he moved west, not even where he is buried. He fought Removal for a long time.

WILLIAM WEATHERFORD was born in 1780. He was the son of a Scottish trader and a Creek woman of the Wind clan named Sehoy. His early childhood was spent on his father's plantation near present day Wetumpka, Alabama. His mixed background enabled William to easily cross back and forth between the Creek and white worlds, a characteristic that would aid him throughout his life.

The Shawnee leader named Tecumseh came to the Creek country in 1811 to rally the Creeks to join his confederacy and rise up and rid their land of all whites. William, who is also called Red Eagle, attended the gathering of Chiefs and warriors at Tukapvche, where Tecumseh spoke. His message captured the feelings and emotions of many Creek warriors, including Weatherford. He began to spread the message throughout the Muscogee tribal towns.

In August of 1813, Weatherford and other Red Sticks attacked Ft Mims in retaliation for the Battle of Burnt Corn. About 400 people were killed including many half-blood Creeks who had taken refuge there. News of the attack caused a panic throughout much of the south. General Andrew Jackson began marching to the Creek country, intent on subduing any further attacks by the Red Sticks. He destroyed every Creek town he came to along the way. He was especially looking to capture and punish William Weatherford for Ft. Mims.

It just so happened that Weatherford was absent from Horseshoe Bend when Jackson's army attacked. After defeating the Red Sticks at Horseshoe Bend, Jackson ordered his men to capture William Weatherford. In the weeks after Horseshoe Bend, Weatherford realized that to continue fighting would destroy not only what were left of his warriors, but their families as well. The women and children were hiding in the forests where they were growing sick and dying of starvation. Out of concern for them and not for his own fate, Weatherford surrendered. Catching Jackson by surprise by bravely walking straight into his camp, Weatherford introduced himself to Jackson and told him he was not afraid of him. He was only surrendering to save his people from more disaster. Jackson admired Weatherford for his bravery and decided to trust in his promise to persuade the remaining Red Sticks to surrender. Weatherford walked out without punishment.

OPOTHELYAHOLA was born around 1798. He was a member of the Upper Creek tribal town of Tukvpcce. He was the speaker for his tribal town Mekko, Big Warrior. Opothleyahola always challenged the power of the Lower Creek Chiefs, who were friendly with the white people. He believed that anything that concerned the homelands should have the consent of the whole Creek Nation. Opothleyahola spoke out many times against treaties that ceded land to the whites. Although he signed many treaties, it was often under duress.

Under the Treaty of Indian Springs in February of 1825, the signing Creek Chiefs sold land to the U.S. which was illegal by Creek law. Opothleyahola, along with others went to Washington, D.C. to protest the terms of the treaty. Under the new treaty he insisted upon the removal of white intruders who were invading Creek lands. A new treaty was made in 1826 which nullified the Treaty of Indian Springs. This is the only time in history that the U.S. government has agreed to nullify a treaty.

Noting the success of Georgia in getting Creek lands, the state of Alabama began to exert pressure on their state government and the federal government. This pressure eventually forced the Creeks to sign a treaty in March of 1832, by which the Creeks gave up all their lands east of the Mississippi river. The Creeks were given 5 years to leave their Alabama homes, and in 1836 Opothleyahola led 8,000 of his people to Indian Territory, now Oklahoma.

The Creeks had not been in their new homeland long, when the Civil War began. This was no real affair of the Creeks, and the wiser leaders counseled the tribe to stay neutral. However, circumstances were forcing them to join either the North or the South. Both sides promised the Creeks that if they joined their side, their current homelands would be protected, and they would be able to retain them.

Wanting to remain neutral, Opothleyahola, decided to lead his people to a Union Army camp in Kansas. He led 10,000 of his followers (known as the Loyal Creeks) who traveled with all of their belongings and cattle to Kansas. They had to fight Confederate companies along the way, but the Loyal Creeks ran out of ammunition and guns, and were scattered. The survivors reached the Union camp, many wearing no warm clothes or shoes and had no food. In Kansas, 240 Creeks died of famine and exposure and many amputations occurred. Opothleyahola, broken in health, but dauntless in spirit, rode in severe winter conditions to officers in another Army camp. He was unsuccessful in getting the help that was promised his people. He never recovered from being sick and exhausted. He died the following spring, March of 1863 and was buried in an unmarked grave near the Sac and Fox agency in Kansas. His people never forgot him because of his leadership, courage and concern for the Creek people.

WARD Co-cha-my (COACHMAN) was among a small number of Creeks yet remaining in Alabama, a son of Jim Boy, he did not remove west until about 1845. Three years later he returned to Alabama to aid some of his people in immigrating to the Indian Territory. He arrived at Fort Smith, June 24, 1848, with a party of sixty-five Indians, but despite his earnest efforts, he was unable to secure a number who were held as slaves by white people. In a letter to the Commissioner of Indian Affairs in D.C. he wrote, *“I think there yet remains in Alabama not less than 100 Creeks and most of them in a deplorable condition; a man by the name of Dickerson in Coosa County has one family, a woman and her children, 7 in number. A Mr. Floyd and a Rev. Mr. Hays both of Autauga County have each a number of Creeks. I tried to get these but was prevented doing so by threats of their would-be masters. I shall get them yet - but not this season; when the waters are in good boating order next season you will hear from me again.”*¹

Ward Coachman served as clerk of the district court of Deep Fork District in 1868 and as a member and speaker of the House of Warriors in 1875. He was court clerk of the Wewoka District in 1873-4, served as a member and President of the House of Kings in 1888 and was dispatched as a delegate from the Creek Nation to Washington upon five different occasions in 1881-2.

In the fall of 1875, Ward Coachman was chosen second chief and became Principal Chief of the Creek Nation upon the impeachment of his predecessor on December 15, 1876.

CHITTO HARJO, whose English name was Wilson Jones, was a full-blood Creek Indian with traditional values. After the Green Peach War, and Isparhecher's retirement from public affairs, Harjo became the acknowledged leader of the dissident full-blood Creeks, who were opposed to the division of Creek lands in the Indian Territory. Early in the 20th century, there was great pressure to divide Creek lands into individual allotments and dissolve the tribal government. The dissident Creeks who were followers of Harjo were few, but were very determined to recapture and resume the traditional ways of the Creeks. These Creeks felt that they had been wronged by the federal government and that both the spirit and the law of past treaties had been violated. These, and their cherished hereditary rights and immunities had been destroyed. They believed the government had treated them as people of no value and in fact, there was much truth of this in the way the government's relations were held.

In 1901, Chitto Harjo tried to establish a separate political status for his followers at Hickory Ground. However, the government sent troops to take Harjo and his followers into custody. They were indicted, tried and convicted in federal court, but were later reprimanded and paroled by the court. Over the following years, Creek tribal lands were divided into allotments, and the "Snake Band" refused to select any lands for their respective allotments. Arbitrary selections were then made for them.

Late in 1906, a Special Senate Investigating Committee came to Indian Territory to investigate and report on general conditions. Chitto Harjo, with some followers, were present, and he was recognized by the Committee and given the opportunity to speak. With great dignity and solemnity, Harjo gave a spellbinding speech, telling the Senators of the dealings between his people and the federal government. He told how the Creeks were forced to give up their homelands in Georgia and Alabama for lands in the west, even though they had been promised these lands would be theirs forever. The Creeks made a recovery from the terrible march from their old homelands to the area later to become Indian Territory. Then, the Civil War began. Harjo told of how he joined the Union Army, thinking to protect his home, land and family. But after the Civil War, the federal government made the Creek people give up a major portion of their lands.

In 1907, Indian Territory became a state. A rumor started that Harjo was leading an insurrection. He knew nothing about this, until he was told the state militia was looking for him. He and some of his followers fled into Choctaw country and he lived with friend Daniel Bob, where he died in 1913. Alexander Posey, the famous Creek poet, wrote a tribute to Chitto Harjo, which was inspired by Harjo's dignified and heroic stature during his imprisonment in 1901. Harjo was one who wanted only justice, fairness and equality for his people, which was never forthcoming during his lifetime.

MUSCOGEE HISTORICAL TIMELINE

-
- 900-1350 Mississippian Period – Muscogeeans are building large earthen Mounds; society becomes more complex as they form chiefdoms; begin growing corn, beans and squash.
- 1540 Hernando De Soto’s expedition travels through the ancient Muscogean chiefdoms spreading diseases, consuming their food stores and killing thousands.
- 1670 The English establish Charlestown and begin to trade with the “Creeks”.
- 1776 The American Revolution; colonists win, creating yet another foreign government for the Creeks to deal with.
- 1790 Aug. 7th, Treaty of New York, Creeks sell land on the Oconee and the U.S. guarantees their remaining lands from encroachment. Whites are not to enter into Creek territory without a gov’t. issued passport.
- 1811 Tecumseh addresses the Creeks at Tukvypce, encouraging them to join in a general war against all whites.
- 1813-14 The Creek War:
July 27, 1813 - Battle of Burnt Corn Creek
August 30, 1813 - Fort Mims attacked
December 23, 1813 - Battle of Holy Ground
March 27, 1814 - The Battle of Horseshoe Bend, the last Battle of the Creek War
- 1814 The Treaty of Fort Jackson. The Muscogee were forced to cede 23 million acres of ancestral homeland in central Alabama and southern Georgia to the United States, leaving them a tract of land in western Georgia.
- 1824 The Treaty of Indian Springs was illegally signed by William McIntosh, selling Muscogee land to the U.S.
- 1825 Treaty of New York in which the Indian Springs treaty is nullified.
- 1834 The majority of the Muscogee (Creek) tribe are forced to move west by the U.S. government. The first 630 Creeks leave the southeast and arrive at Ft. Gibson on March 28, 1835.
- 1860s Tribal unity is tested as the U.S. creates a Civil War and Creek leaders, such as Opothle Yahola, attempt to keep the tribe neutral, although many “Arkansas Creeks” choose sides and fight.
- 1866 The Reconstruction Treaty required the Creek Nation to cede 3.2 million acres, approximately half of the Muscogee domain.

- 1867 The Muscogee people adopt a written constitution that provides for a Principal Chief and a Second Chief, a judicial branch, and a bicameral legislature composed of a House of Kings and a House of Warriors.
- 1898 Passage of the Curtis Act which dismantled tribal governments in another attempt at assimilation; the Dawes Allotment Act provided for tribal landholdings to be broken up into individual household allotments to encourage adoption of the European-American style of subsistence farming.
- 1901 293 “Snakes Indians”, including Chitto Harjo, were indicted.
- 1906 With the U.S. federal government's passage of the Five Civilized Tribes Act, national self-governance of the Creek Nation and other four tribes comes to an end.
- 1907 Indian Territory becomes part of the State of Oklahoma.
- 1919 Creeks are forced to sell the Council House and grounds to the city of Okmulgee for \$100,000 under the supervision of the Department of the Interior. The deed conveying title was executed by the Principal Chief. G. W. Grayson, proceeds of the sale being deposited in the U.S. Treasury in the name of the tribe.
- 1920s Many citizens of the City of Okmulgee do not exactly embrace the possession of the Council House in the beginning, but attempts to tear it down are not successful. Will Rogers visits Okmulgee and tells the citizens to preserve the Council House. Citizens begin to listen and future attempts to destroy the Council House are put to rest.
- 1934 Oklahoma Indian Welfare Act; tribes begin to slowly rebuild their sovereign status.
- 1970 Congress allows the Five Tribes to elect their own Chiefs.
- 1971 Claude Cox is the first elected Chief of the Muscogee (Creek) Nation since the early part of the century, all others up to this time were appointed by the President. A tribal constitution will begin to be created through the decade as well as a communal land base for offices and other tribal uses.
- 1976 The Harjo vs. Kleppe court case helps end the U.S. government’s policy of paternalism and ushers in a new Self-Determination policy for Indian tribes.
- 1979 Tribal sovereignty is fully renewed as a new constitution is adopted, replacing the 1867 constitution. Like the U.S. Constitution, 3 branches of government are formed - Executive, Legislative, and Judicial. This new constitution will help the tribe select future directions, such as forming an administration, and offices for education, health, and even gaming.
- 2010 September 30, Muscogee (Creek) Nation buys back the Creek Council House. Official ceremony held November 20, 2011.

Muscogee Customs & Traditions

Families/Clans

Clans are the basis of a family within the traditional Muscogee society. Unlike the Europeans, clan members are considered family instead of members of 'blood relation'. Clans are composed of all people who are descendants of the same ancestral clan grouping. Each person belongs to the clan of his or her mother, who belongs to clan of her mother; this is called matrilineal descent. Fathers are important within the family system, but within the clan, it is the mother's brother (the mother's nearest blood relation) who functions as the primary disciplinarian and role model. The same titles are used for both family and clan relations. For example, clan members of approximately the same age consider each other as brother and sister, even if they have never met before.

When a marriage took place, the man would leave his parents to live with his wife's family. When a home was built for them, all the property and contents belonged to the wife. A man's *hûti*, home, was not usually where he spent most of his adult life, but the home of his mother and the other women of his clan. In case a stranger visited the town and made known to what clan he belonged, it was the duty of a man married into that clan to invite him to his house. In case of separation, the woman would gather all of her husband's belongings and set them outside their home. That was a sign she wanted him to leave and go back to his mother's home.

Traditionally, the father had no care of his own child. The invariable custom was for the women to keep and rear all the children; having the entire control over them until they were able to provide for themselves, except for the disciplinarian role. The women appeared to have sufficient natural affection for them: they never struck or whipped a child for its faults.

Clan names were orally passed down to the next generation. It was important to know one's own clan. During the ceremonial dances, the men and boys were seated according to their clan. At one time, there were more than fifty known clan names, although, some may not be true clans. The elders would randomly ask the children their clan name to make sure they knew. Sometimes, a family would have a picture or sketch of their clan on pottery or a tattoo on their body to represent their clan.

Clan ties were strong; they served as a traditional bond. The clan system added structure to Muscogee society by influencing marriage choices, personal friendship and partnerships with other tribal towns in tribal affairs. For instance, if a clan family needed assistance to build a home, the clan members would come together and help build his home.

It was traditionally considered a serious offense to kill or eat one's own clan animal or to marry into one's own clan. Clan members would discipline a member if he/she committed any one of these offenses. To marry into one's own clan was the most serious offense which had severe consequences.

Tribal Towns

Tribal towns were actually villages of the Muscogee people, but the Europeans viewed them as towns because of their structural lay-out. The dwellings consisted of little squares, or rather of four dwelling-houses inclosing a square area, exactly on the plan of the public square. Every family, however, did not have four houses; some had three, others had two and some but one, each built according to the number of his family. For those who were wealthy had four

buildings, one is used as a place to cook food and used as a winter house, also known as a 'hot house', another was a summer house and hall for receiving visitors, the third house was the storage for food and other provisions. The last house was two stories high and was divided into two apartments; the lower story of one end being the potato house, where roots and fruits were stored. At the other end of this building, both upper and lower stories were open on three sides. The lower story served as a shed for their saddles, pack-saddles, gears and other lumber. The loft overhead was a very spacious, airy, and a pleasant pavilion where the chief of the family relaxed during the summer and received his guests. The fourth part of the apartment was a storage place for deer-skins, furs, and other merchandise for his customers especially if he was quite wealthy. Sometimes a porch was built in front of the house. Smaller families and the less wealthy built one, two or three houses which suffice their purposes.

Each of these groups of buildings was occupied by one family and the 'houses of daughters' were those adjoining in the same block or district. Every home had a garden and a parcel of land according to the number in his family. The boundary between each group of houses or property was a strip of grass, erection of poles or any other natural or artificial means to show a boundary. The houses were in a more elaborate pattern with several families living just several hundred feet from each other.

This organized pattern of dwellings surrounded a public square with four arbors, a council house, chooc-ofau thluc-co, which was a mound and a chunky yard. Within the square was the sacred fire or poca (grandfather) and the ceremonial ring, paskofv; both were considered sacred. This was the sacred ground where dances, songs and prayers were held. The council house or mound was the meeting place for the chief, Mekko and his advisors or warriors. The ground that contained the square and mound was considered the men's domain. Women were not allowed within the square or in the mound unless given permission by the Mekko. The chunky yard was the playing field for the stick ball and other games.

Each tribal town had names and was organized by membership in a specific Tribal Town or Etlwv. Each tvlwv acted as both an independent community and a member of the larger "Confederacy" of the Muscogee nation. When some of the towns became crowded or overpopulated, another town was built by the same Etlwv but had a different name. In the mid-1700s, there were sixty to seventy towns, besides the many villages not counted and on average about two hundred inhabitants to each town, giving approximately eleven thousand inhabitants.

It was very important to know one's own tribal town and clan. This served as identification when visiting another town or area. Although, later Europeans labeled the towns, Upper and Lower, geographically, the only distinction was their tribal town. Upper towns were located in the upper portion of Alabama near the Tallapoosa and Coosa rivers. They were considered as the traditionalist because of their resistance to European lifestyles and ways. The lower towns were located near the Chattahooche and Flint rivers and accepted the European lifestyle and allowed European men to marry their women.

Today, the tribal towns that have an active fire are known as ceremonial grounds. There are 16 active ceremonial grounds. Each still maintains a sacred fire, which was brought from the east during "Removal." Each ground is set up structurally as the ancient towns in Alabama and Georgia before the removal except for the mound or chooc-ofau thluc-co.

Beliefs

The Muscogee people were spiritual people who believed in a higher power or deity, Ebofunga, 'the one who is above us', whose power was considered above all. They also believed that every living thing had a spirit including water, earth, wind and fire. It is believed that the knowledge and wisdom of the kerrv, prophet, and the healing knowledge of the helis haya, medicine men, were given to them by Ebofunga. The following are other beliefs that tribal traditionalist still consider their own.

- Tribal elders believe children are aware of the spiritual world, thereby, can see spiritual beings around them. They also believe children can sense the good and evil in a person. This is the reason a child might cry when a stranger approaches him.

- Muscogee (Creek) people anciently considered the younger of twins more likely to make an efficient KERRV, knower or prophet. Sometimes the child was kept from nursing for four days and was made to swallow certain small roots to make him live longer. The same effect was produced by keeping him indoors for four months so no one would see him.

- The number four is a sacred number among the Muscogee people; not considered a "lucky" number. Everything is done according to this number whether a domestic activity, events, or dwellings. Ceremonies lasts four days, house posts are used in multiples of fours and burials are conducted on the fourth day. When the 'heles haya' drinks the 'black drink' of purification, smoking tobacco for protection, or bathing for cleansing; this was all done four times. The sacredness of the number four has been the traditional way of life for the Muscogee people.

- Their mode of correction was singular: if a child required punishment, the mother scratched its leg or thigh with the point of a pin or needle until it bled; some kept a jaw-bone of a gar-fish, having two teeth, entirely for the purpose.

- Muscogee stories were mostly for children, to amuse or discipline them. The characters were animals such as rabbit, who was known as a trickster. The storyteller would tell the moral at the end of a story to remind them to behave. Other stories were about the origin of the animals' appearance or characteristic (ex: How Possum got His Bare Tail) while some stories told of the origin of the earth and its inhabitants.

- Legends were actually historical records told orally of the different tribes that later became part of the Muscogee (Creek) confederacy. The elder of a tribe would often tell the origin of his tribe and the events that led them to their place in history, each story being more convincing than the one before which led the listener to believe the story as truth. But nevertheless, each tribe had their own legend of their origin and migration.

- Tribal elders spoke to their newborn grandchild because they wanted Muscogee to be the first language the child heard. Elders believed the spirit of the child would grasp the first sounds if heard more frequently during the first four days after birth. It was customary to speak to the child in Muscogee throughout the child's first year so he could hear and recognize the language. Thus, being able to speak Muscogee is the way to preserve and promote the Muscogee language for future generations.

- Creek men and women observed many signs and omens, which they believed could help them in predicting the future, assist them in daily activities, and set them on the right path of their life's journey.
- The Creeks believe that the world was originally entirely underwater. The only land was a hill, called Nunne Chaha, and on the hill was a house, wherein lived Esaugetuh Emissie ("master of breath"). He created humanity from the clay on the hill.
- The Creeks also venerated the Horned Serpent, Sint Holo, who appeared to suitably wise young men. The shaman was called an Alektca.
- In the underworld, there was only chaos and odd creatures. Master of Breath created Brother Moon and Sister Sun, as well as the four directions to hold up the world.
- The first people were the offspring of Sister Sun and the Horned Serpent. These first two Creeks were Lucky Hunter and Corn Woman, denoting their respective roles in Creek Society.

Ceremonial Dances/Stomp Dances

Today, the Muscogee people are known for their stomp dances or ceremonial dances. These dances are the most traditional part of the Muscogee (Creek) culture which still exists even today. The dances take place at 16 different ceremonial (stomp) grounds beginning in late April to mid-October. Sometimes three or four grounds will have a dance at the same time during a weekend. Each ground will have at least four dances throughout the season, one of them being the Green Corn ceremony. Although all of the five tribes from the

southeastern United States performed these dances before the removal, the Muscogee people continue to dance as their ancestors danced for thousands of years.

The term "Stomp Dance" is an English term which refers to the 'shuffle and stomp' movements of the dance. In the native Muscogee language, the dance is called *Opvkv Haco*, which can mean 'drunken,' 'crazy,' or 'inspired' dance. This usually refers to the exciting, yet meditative affect the dance and the medicine have on the participants.

A traditional ceremonial ground is often headed by the *Mekko* or "chief". The *Mekko* is assisted by his second in charge, called a "*Hennehv*" (*Heniha*), the chief medicine man is called a "*Heles havv*" (*Hillis Hiya*) and the speaker is called "*Mekko's Tvlvswv*", or *Mekko's* tongue/speaker. It is important to note that *Mekko's* are not supposed to publicly address the entire grounds. His speaker or *tvlvswv* speaks for him. A traditional Creek square ground also has four *Tvstvnvkes*, warriors, four head ladies and four alternate head ladies. These are the traditional headmen of the ancient tribal towns of the Muscogee people.

Each of the traditional grounds areas are located on private land or allotment of their ancestor. Few are still on the same area of land as the time of arrival from the trail of removal. The location is known only to the dancers but not to the public or non-natives. The Stomp Dance is a ceremony that contains both religious and social meaning to the Creeks or Muscogee people.

(locv or turtle shells)

While the men sing, the women set the rhythm by shaking turtle shells worn on their legs. The shakers are made of turtle shells or small milk cans. Shakers develop their own style of shaking in speed and rhythm which coincides with the leader or singer. Young girls are taught to shake turtle shells or milk cans at an early age by the older women in their clan.

Active ceremonial grounds: Alabama, Arbeka, Duck Creek, Fish Pond, Greenleaf, Hickory Ground, Hillabee, Sand Creek (Iron Post), Pole Cat (Kellyville), Muddy Waters, New Tulsa, Nuyaka, Okfuskee, Peach Ground, Tallahassee, Tahlahvse Ground.

Green Corn Ceremony

The Green Corn Ceremony is a celebration of the new corn and the New Year which lasts four days. It is a time of forgiveness and purification for both the ceremonial grounds and the Creek people. Old ways are cast aside as the New Year marks a fresh start and new beginning. Unlike the Europeans, the New Year begins in the month of July instead of January. Every aspect of the ceremony is symbolic of the purification and cleansing that takes place during this time.

The name of the ceremony refers to its connection with the annual harvest of the New (Green) Corn. The harvest usually occurs during July or August and no new corn is eaten before this time. Such thanksgiving and celebration of a single crop is not unusual considering its traditional importance. Corn was by far the most dependable food source, as it produces even when other crops failed or hunting was unsuccessful. Corn could be prepared in a variety of ways and could be used in numerous dishes.

The ceremony is also referred to as the “Posketv”, or “Busk”, which means “to fast” which takes place mostly in the month of July. Fasting occurs in two ways; first, as the people abstain from eating new corn until the harvest celebration, marked by the Green Corn, and second as the participants abstain from all food and consume only a traditional herbal drink on the day of the fast. The drink is a powerful emetic that serves to cleanse the body both physically and spiritually. The men are mainly the participants of the drink but women are allowed only to wash with it. According to traditionalists, the purpose of this medicine is to purify the people, so that they will be in an acceptable mental and physical state to receive the blessing of the New Year.

Traditional Churches

Today, Muscogee (Creek) churches have ties that link back to the creation story. Hesaketvmese is the name for God, and is the one being prayed to by the Muscogee (Creek) Christians. In the Bible, God blew into the nostrils of man and he came alive. The direction of east is also considered sacred in the Christian setting as well. Hesaketvmese came or blew from the east in the Muscogee (Creek) creation. Today, Muscogee (Creek) churches face the east, meaning that the entrance of the church faces the east. A deacon of the church will blow a horn four times “calling the spirit into the church” and signaling the beginning of the time of worship. This is similar to respecting the four elements of the creation story and calling upon them for help in the time of darkness. During the services, it is the custom for men to sit on the south side of the church and the women to sit on the north side. All night services and sunrise services are not uncommon for the dedicated Muscogee (Creek) Christians.

The traditional ceremonies have been a part of the Muscogee (Creek) culture for centuries. The Muscogee (Creek) Christian values have been a part of the culture for decades. Both ways of life are a testimony to the endurance and adaptability of the people of the Muscogee (Creek) Nation.

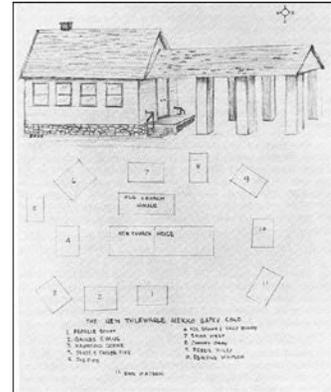

Christianity was introduced to the Muscogee (Creek) people at the arrival of the first Europeans, but missionaries targeted them heavily after their removal to Indian Territory in Oklahoma. Missionaries looked upon the Muscogee (Creek) people as hostile and uncivilized. It was thought that they could be tamed and civilized through conversion to Christianity. Most Muscogee (Creek) traditional churches share some practices with the ceremonial grounds. In traditional churches, the number four is noticeable; for example, the call to worship involves ringing the bell or blowing a horn four times. Also, as in the ceremonial grounds, all things are done facing east, and almost all older traditional churches face east. This traditional practice is done because the sun rises in the east; bringing in a new day. This concept of east as the spiritual direction goes back to the creation story of the Muscogee (Creek) people. The transition to Christianity was facilitated by the original beliefs of the Muscogee (Creek) people. The Christian religious concepts brought were not altogether different from the Indian people’s traditional belief system. Some strikingly similar concepts occur between both of the belief systems.

The leaders in the traditional churches hold responsibilities similar to the leaders at the ceremonial grounds. The Pastor of the traditional church is equal in position to the Mekko, or chief, of the ceremonial ground. The Deacon has many of the same responsibilities and duties as the Stickmen at the ceremonial grounds. Women leaders are found in the traditional churches just as they are at the ceremonial grounds. The Pastor and the Mekko both direct the people in their respected communities in matters of prayers and rededication of their lives to the Creator and to the people of the communities. The Deacons and the Stickmen uphold the order of the communities and also both positions choose song leaders during their respected ceremonies. The women leaders in both communities contribute to the well-being of the people in the community when they feel it is necessary or when called upon.

Traditional church members and ceremonial grounds members also have similar views about their worship. Members of both churches and ceremonial grounds believe in one God or Creator. In both communities, it is God or the Creator that gives each of us the blessing of life. Without God or the Creator, there would be nothing. Along with the similarities of worship

between the ceremonial grounds and the traditional churches, there was also the overwhelming presence of the Muscogee (Creek) spiritualism in these two domains. The Muscogee (Creek) people have a distinct creation story which tells about the Creator, the people and how they came to be on this earth and how we are to maintain ourselves as told in the Muscogee (Creek) language and possessed in the culture.

Around 1836, a large part of the Creeks that came to Indian Territory from their former homelands started to establish their churches. Before a church was built, services would be held under a brush arbor. Families would build camp houses around a church as soon as it was possible. The camps resembled regular houses. Nearly all the houses would have their own water well nearby. They were built for the convenience of the families who lived long distances away at a time when transportation was not too convenient. Their main purpose is for use when the church services lasted all weekend. During the Sunday meetings the owners of the camps serve dinner to all the visitors. Sometimes as many as 50 people are fed at one meal. Some of the visiting women wash a few dishes in return for the meal, but most of the work is done by the women and girls of the owner's families.

When a person dies, total respect is shown to the dead person's body from the time he dies until he is in his grave house. The funeral is held the fourth day after death. On the third day the body is brought from the funeral home to the church. The congregation prays for the body. If the family of the deceased wants to have all night services, they do. If not, family and friends stay up with the body all night. A grave house is built for the soul of the dead. This is a small house that fits over the grave. The grave house is considered to be the home of the dead, because without it he would have a home no more. When the grave houses become broken, they cannot be replaced or repaired. The Creeks believe that the older the house becomes, the newer it will seem to the spirit. Age is an opposite thing in death. When the body is taken to the cemetery, the congregation follows for graveside rites. Before the casket is lowered into the grave, the preacher reads a scripture, and a prayer is said for the body before the casket is closed. A blanket is put over the casket. It is lowered into the vault box. The people would file by and take a clod of dirt and drop it into the grave for the 'last handshake'.

Nature

All Southeastern tribes possess a rich and complex tradition of looking to nature for guidance and inspiration. The Creek have long been recognized as astute observers of the natural world. Every aspect of their environment, from basic botany to astronomy, was at some point studied and explained. All of creation was in some way inter-related with other creations.

Like other living beings, animals were viewed as having unique abilities and characteristics, which determined their purposes in life. Some animals, such as wolves and owls, were believed to possess extraordinary powers which could be used to benefit or punish human beings, depending on how they had been treated. Other animals, such as the turtle, were used as ceremonial symbols because of their special abilities.

The cycle of life could also be observed in all plants and animals. By noticing changes in their environments, the Creek learned when to hunt, when to plant, and when to begin building shelters for the winter. By studying the world around them, they learned where to find water, how to forecast the weather, and what plants were good to eat. Nature was, and still is, a great teacher. Traditionalists say that most people have simply forgotten how to observe nature.

The ability to forecast the weather was a great asset to the Creek people, as they lived so closely with the land. Only by preparing for inclement weather could they ensure the community's food supply, shelter and safety. Creek men and women observed many signs and omens, which they believed could help them in predicting the coming weather. Some examples of their observations are:

- Geese flying southward indicated the coming of winter, while geese flying northward indicated the return of spring.
- The budding of plants and trees signaled the proper time for planting.
- A flock of sparrows eating off the ground was a sign of cold weather.
- Water could be found near trees whose branches grew toward the ground.
- Rain was most likely to occur when the moon was only $\frac{1}{4}$ full.

Time

The Muscogee people did not traditionally recognize a week of seven days. Time was measured according to natural phenomena, with each "day" meaning the time from one sunrise to another. The next unit of time, similar to a week but not exactly like it, was measured by phases of the moon. Approximately 7-8 days pass between each of the four moon phases.

In studying the Muscogee terms for months and seasons, we are reminded that long before there were words to describe the cycles of nature, such cycles were constantly observed. Among the Muscogee, changes in climate influenced many aspects of life including what they wore, what foods were available to eat, which animals could be hunted, and what types of community activities should take place. The appearance and movements of stellar objects generally determined the scheduling of ceremonies.

Months were designated by the completion of the moon phases, each complete cycle lasting 28-30 days. The Muscogee term for each of these months describes a natural event that occurs during that time of the year. During *Ke Hvse* (May) the mulberries ripen while the first frost is usually during *Ehole* (November).

Sometimes, only two seasons were acknowledged: the cold season and the warm season. More often however, a reference is made to four seasons generally corresponding to Spring, Summer, Fall and Winter. There are two primary differences between the Muscogee and European concepts. Traditionally, the Muscogee year begins with *Hiyuce* (July), the completion of the harvest, and is marked by the Green Corn Ceremony. Seasons did not begin and end on specific calendar days. Ex. *Tash'ce* (Spring) began when the days became warmer, the birds began to sing, flowers started growing, and trees became green again. It ended when days became even hotter and berries and fruit began to ripe. (Compare this to current calendars, which designate March 20 to June 21 as "spring.")

Traditional Foods

The Muscogee people as a community were responsible for providing food for their families in such ways as hunting, fishing, farming and gathering of berries, nuts and other native vegetables or fruit. This way, food belonged to the entire community and everyone was fed. If for some reason a family did not have sufficient food, the clan members would share a portion of their food or provide for them in some way.

By 200 AD, the Creek were cultivating a variety of wild seed crops. After 800 AD, “modern” domesticated corn and beans were common throughout the Southeast. Wild gourds, sunflowers, and corn, or maize arrived from Mexico around 200 AD. It quickly became the most important vegetable food in the Creek diet, as they learned to prepare it in many ways and utilize it in dozens of unique dishes.

Safke

Safke or *osafke*, is a hominy dish which can be cooked as soup or drink and enjoyed by the Muscogee people. The drink is more watery and sweetened or seasoned to taste. It is best when fresh and still warm. The soup is cooked thicker with meat, pork or beef and seasoned to taste. As a drink, some of the elders in years past preferred it fermented before drinking it. Whichever way, it is considered an acquired taste.

Safke is made by cooking white cracked corn in a large supply of water, flavored with lye made from wood ash. No other seasoning is used. The mixture is cooked over moderate heat for three to four hours.

(The pictures show the women using the traditional *keco* and *kecvpe*, wood stump and pounder to pound safke, hominy.)

Wild Onion Dinners

From February to April, wild onions are gathered for a major spring event of all of the Five Civilized Tribes of eastern Oklahoma. Wild onion dinners are held privately in homes and publicly, often in churches, to raise funds. Prayer and singing in the native language sometimes accompanies dinners held in churches. The onions are usually, but not always, fried with scrambled eggs. Poke salad might be added to the onions, or it could be served alone. Corn breads of various kinds are present; some are sour, prepared with fermented meal (dug-lake dōk-see) and some are flavored with parched purple pea hulls, (cattohaga or blue bread). Both sweet (unfermented) and sour hominy is common and often contains pork. In recent times, fry bread made from wheat flour, has become popular. Red beans are a part

of every dinner served. Common meats are fried pork (salt meat) and stewed beef. Hickory nut soup is sometimes added to various dishes. Other foods might include fried chicken, rice, potatoes, cabbage, and crayfish. Grape dumplings are the traditional dessert, and various pies and cakes are present. Beverages include a traditional drink, apuske (parched corn mixed with water), iced tea, coffee, and soft drinks.

Stickball

Before the removal, the stickball game was the traditional game for all of the tribes in the southeastern United States. Although, the game was played by all, the Muscogee people continue to play the game every Fall as the last event before closing out the ceremonial dances. It was once called “Little Brother of War” by the Choctaws because the game was played to end a feud between the tribes.

It was a game with no rules; the player being a good ‘sport’ even when he was beaten. The game consisted of male players who only used sticks (dō-gōn-hee) made from hickory wood. Participants of the game were not allowed to use their hands to pick up the ball. A player had to be a swift runner and have the ability to move with such quickness to avoid being hit by his opponent.

The stick was carved out and curved on the end to form a netted scoop in which to catch the ball. The scoop was drilled with small holes. A thin string of leather was strung through the holes to form a net. Ball sticks were made only by the men to play in a social game with the women or the dee-guh-bau-kee (*stick ball game with the men*). These sticks were the men’s personal possession and only the men were allowed to touch them.

The ball was made by an elder man or the medicine man of the town using animal hair rolled up tightly and wrapped in deerskin and sewn onto the ball. A short string of leather was left hanging which was the “huh-chee”, tail. The average size of the ball was smaller than a tennis ball which made it very difficult to see when it landed on the ground.

The game was scored by points. A score counted one point. Points were kept by sticking pegs in the ground: the first team to reach a certain number of scored points was declared the winner. But here enters another original arrangement. The exact number of points needed to win, the exact size of the playing field, number of players involved, and whether betting and/or wrestling was to be permitted depended entirely upon the importance of the game.

Creek Stick Ball players at Thlopthlocco Tribal Town near Okemah, OK in 1924

Songs/Hymns

Muscogee Creek people today still sing the Muscogee hymns in the traditional churches which the elders believe their ancestors sung on the “Trail of Tears”. Most of the hymns speak of encouragement and perseverance. The hymns are sung in the Muscogee language with its own style and tune, sounding sad and lonesome while other hymns have a joyful tune.

Today, some hymns are converted from the English version into the Muscogee language (ex: Amazing Grace) for the younger generation. This makes it easier for them to sing the hymns with the tune already in place. Although, the tune is the same, the words are not translated in the exact context as the English version but in similar words.

The songs for the ceremonial dances were quite different from the hymns. The men composed their own songs and only the men sing the songs during the dances. The songs were of joyful tunes and others were lonely tunes. Sometimes, it was a story of life’s experience; a lover who has left, being away too long and longing to be back or just enjoying the fellowship of being

around his clansmen or members of his tribal town. Today, chants are heard and not the stories but the rhythm of the shell shakers brings back memories of the old songs or stories.

Modern Muscogee Life

Presently, the Muscogee (Creek) Nation capitol is located in Okmulgee, Oklahoma. There are approximately 80,493 enrolled members living in eleven counties in northeastern Oklahoma which makes up the Muscogee (Creek) Nation. The governing entity is a constitution that was adopted in 1867 and later reorganized under the U.S. government and adopted in 1976. A principal chief is elected as the highest official by the citizens of the nation. The principal chief gives final confirmation on all bills and laws proposed by the council. Council members are also elected officials who represent eight districts among the nation. Council members serve their constituents by going to the council with the needs and concerns of the people. The last branch of government is the judiciary branch, which consists of the criminal, civil and supreme courts.

The Muscogee (Creek) Nation has a strong hold on the business opportunities in northeastern Oklahoma. Along with the casino industry the nation has an agriculture business department, records management, construction contractors and thriving tourism program to generate revenues. The main portion of the revenues comes from the casinos owned and operated by the nation.

Programs designed to assist the needs of citizens with services such as higher education, housing, health care and social services make up a large portion of the workforce. Community centers offer places for Muscogee Creek language classes, story-telling and pot-luck dinners. The ceremonial grounds and the churches are now the center for language and culture, Muscogee Creek hymns and traditional stomp dance songs can still be heard at both communities to this day. Ceremonial grounds and Muscogee Creek churches receive grants providing for the restoration and the upkeep of these sacred and religious places.

Despite the many attempts of the U.S. government to eradicate Native American culture through the various policies, the Muscogee (Creek) Nation has maintained its cultural existence. Muscogee Creek spiritualism is still very prominent in both the ceremonial grounds and the traditional churches. These two very distinct settings hold a great deal of that culture intact. Practices that were deemed as vital and important to the Muscogee Creek way of life are still practiced today. During the Green Corn season, one can witness several different dances and ceremonies at any of the various Muscogee Creek stomp grounds. Each ground takes their turn having these special dances and its members observe several practices during their grounds' dance. The church ways are still in effect today as well. One can witness the various methodical ways of the Muscogee Creek churches. Each church has their one weekend a month where their church holds service for the weekend. These services still include the sunrise service. These two settings may be seen by outsiders as being two opposing spiritual settings but they are both very connected to the Muscogee Creek creation story and cultural way of life. Each of these settings is vital to the history, the present and the future of the Muscogee (Creek) Nation and its people. Both play an integral part in the persistence of the Muscogee Creek culture and should be valued as a stronghold for our identity.

Branches of Government

BRANCHES OF GOVERNMENT

The Muscogee (Creek) Nation has (3) three branches of Government:

- Executive Branch
- Judicial Branch
- Legislative Branch

The Executive Branch consists of:

- Principal Chief – James Floyd
 - Second Chief – Louis Hicks
 - The Cabinet
- The term of office for the Principal Chief is four (4) years. The term of office for the Second Chief is four (4) years.
- Cabinet members are appointed by the Principal Chief and confirmed by the National Council.

The Judicial Branch consists of:

- Two (2) District Court Judge.
 - Six (6) Supreme Court Judges.
- The term of office for the Supreme Court Judges are six (6) years. The term of office for the District Court Judges are four (4) years.
- The District Court Judges and Supreme Court Judges are nominated by the Principal Chief and confirmed by the National Council.
- The court is vested with exclusive jurisdiction over all civil and criminal matters that are under Muscogee jurisdiction and serves as the final authority on Muscogee law.

The Legislative Branch consists of:

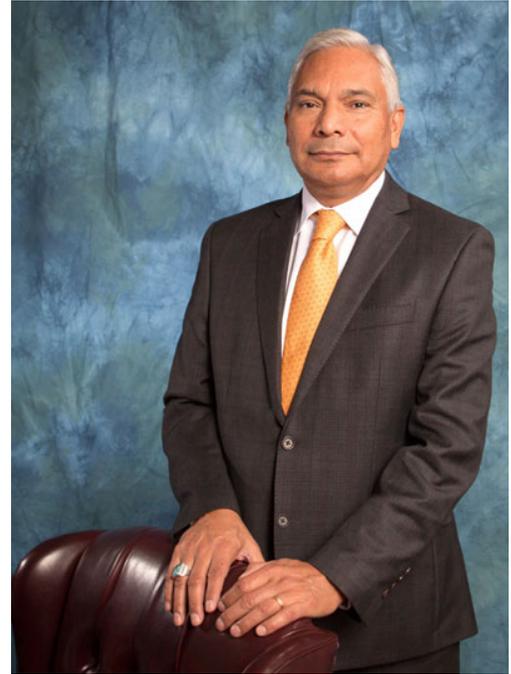

- Sixteen (16) members of the National Council – The current National Council is in their Nineteenth session (Palen-Ostvpohkaken).
 - Speaker of the House – Lucien Tiger III
 - Second Speaker – David Hill
 - Sergeant at Arms – Darrell Proctor
- The National Council representatives currently serve four (4) year terms.
- The National Council is elected by Muscogee citizens in an open election.
- The National Council representatives are elected by districts within the boundaries of the Muscogee (Creek) Nation.

PRINCIPAL CHIEF JAMES FLOYD**Personal:**

Clan: Wind
 Tribal Town: Koweta
 Ceremonial Ground: Tvlahasse Wvkokaye
 Church: Tuskegee Indian Baptist
 Family: Married to Carol (Tustison) Floyd for 36 years
 Children: son, Jacob, daughter, Erin, son-in-law, Lloyd

Education:

Eufaula High School graduate (1970)
 Associate of Science Civil Engineering Technology
 (Oklahoma State University)
 Bachelor of Science Allied Health Care
 (Northeastern State University)
 Masters of Public Administration/Health Administration
 (Portland State University)

**Experience:**

Muscogee (Creek) Nation: Environmental Health Specialist; Supervisor, Health Services Administration; Manager, Health Services Administration; Director, Community Services
 U.S.P.H.S. Indian Health Service, Portland OR: Health System Specialist; Associate Director; Area Director
 U.S. Department of Veteran Affairs: Medical Center Director; Salt Lake City, UT; Network Director, VA heartland Network, Kansas City, MO; Director, VA Eastern Oklahoma Health Care System, Muskogee, OK
 Certification: Fellow, American College of Health Care Executives since 2007

Chief James Floyd was born in Oklahoma City in 1952; the fourth of nine children. His father, the late Joe Floyd, was Bear Clan from Hanna. His mother, Margaret Vickery Floyd, is Wind Clan, Creek/Cherokee, and is known by the kids at Hanna and Stidham schools as “Granny.” When his family moved to Eufaula, he helped his Dad with his floor covering business and installed carpet in many homes throughout the area. During high school he also worked at Piggly-Wiggly and played Ironhead football, graduating in 1970. He remains active in church and traditional ceremonies.

He started his professional career at Muscogee (Creek) Nation, but left home to progress in his education and training. He retired as a senior executive for the Veterans Health Administration, where he had been the highest ranking Native American in the country. Before that, he was an Area Director for the Indian Health Service. While his career has taken him across the country, he has been blessed to gain more knowledge and experience by serving other tribes and veterans.

SECOND CHIEF LOUIS HICKS

Personal:

Tribal Town – Atvse (inactive)/Arbeka (active)
Clan – Fuswvlke (Bird)
Church – Silver Springs Indian Baptist Church
Place of Birth – Eram, Oklahoma
Father – Houston Hicks (WWII veteran)
Mother – Eliza (Freeman) Hicks
Home – Okmulgee, OK

Military Career (1969-1972):

Enlisted – 1969
Served in Vietnam with the 134th Assault Helicopter
Company, 1st Aviation Brigade
Door Gunner/Crew Chief on UH1H Huey Helicopter
Awarded – Air Crewman Badge, Air Medal
(14 times), Army Commendation Medal

Affiliations:

American Legion Post 213

Second Chief Louis Hicks was born January 7, 1951. He graduated from Choctaw High School in 1969. He received his Associates Degree in Elementary Education in 1977 from Rose State College and his Bachelor of Science in Elementary Education from Northeastern State University in 1979. In 1992, he received his Master of Science in Education (School Administration) from Northeastern State University.

Mr. Hicks worked for the Muscogee (Creek) Nation from 2007 to December 2011 as the Director of the Human Development. He supervised seven major programs: Mvskoke Revitalization Language Program, Higher Education, Johnson-O'Malley, Head Start, Eufaula Dorms, Reintegration Program and Employment & Training.

He has been married to Mrs. Gloria Hicks for 40 years. He is the father of seven children and grandfather to 16 grandchildren.

FORMER CHIEFS

SUPREME COURT JUSTICES

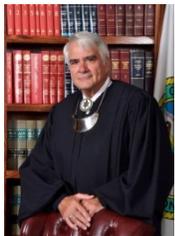

Chief Justice Andrew Adams III is a citizen of the Muscogee (Creek) Nation of Oklahoma and is a member of the Tallahassee Wvkokaye Ceremonial Grounds. He was nominated and confirmed to the Muscogee (Creek) Nation Supreme Court in January 2012 and served as Vice-Chief Justice during the 2013 term. His term as Chief Justice began on January 1, 2014.

Vice-Chief Justice George Thompson Jr. resides in Henryetta, Oklahoma. He attended Haskell Institute in Lawrence, Kansas; the University of Tulsa; and Oklahoma State University. He is a veteran of the United States Air Force and retired after serving for twenty-eight years with the City of Tulsa Engineering Services. He also served for four years as a member of the Muscogee (Creek) Nation Housing Authority Board.

Justice Leah Harjo-Ware was raised on her Mvskoke grandmother’s allotment in the southern tip of the Muscogee (Creek) Nation. She received her education from Holdenville High School, the University of Oklahoma (Bachelor of Arts), and Creighton University School of Law (Juris Doctor).

Justice Kathleen R. Supernaw graduated with Honors from the University of Oklahoma College of Law. While attending University of Oklahoma, she was Editor-in-Chief of the AMERICAN INDIAN LAW REVIEW, on the Dean’s Honor Roll, and a Research Assistant for Dr. Rennard Strickland, Editor of Felix Cohen’s HANDBOOK OF FEDERAL INDIAN LAW

Justice Montie R. Deer graduated from high school in Whitewater, Kansas. He earned a Bachelor’s degree in History and English Education from the University of Wyoming. He also studied at Emporia State University, where he earned a Master’s degree in Guidance and Counseling; and at Washburn University School of Law, where he earned his law degree.

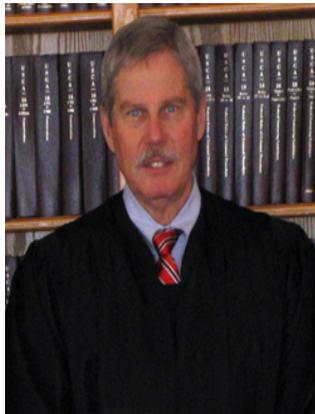

Justice Richard C. Lerblance earned an associate degree from Eastern Oklahoma State College in 1967; a bachelor's degree from Central State University (now the University of Central Oklahoma) in 1970; and a law degree from the Oklahoma City University School of Law in 1978.

DISTRICT COURT JUDGES

Honorable Gregory H. Bigler is a citizen of the Muscogee (Creek) Nation and a member of Polecat Euchee stomp ground. He attended Harvard and Wisconsin Law schools and worked for several tribes as Attorney General, Supreme Court Judge and District Court Judge. In 1993, he argued and won the U.S. Supreme Court case of Oklahoma Tax Commission v. Sac & Fox Nation. Currently, he has a private practise in Sapulpa, OK.

Honorable John T. Cripps served in the U.S. Army and was the Captain of the Special Forces. He graduated from the University of Oklahoma with a Juris Doctorate in 1975. He currently serves as judge for numerous towns within Oklahoma, the District Court Judge for Cherokee Nation and has his own private practise, Cripps Law Office. He is also the chairman of Sequoyah Memorial Hospital in Sallisaw, OK.

HOW A BILL BECOMES A LAW

STEP ONE

- Proposed bill is given to Speaker

STEP TWO

- Speaker assigns bill to appropriate committee

STEP THREE

- Committee writes report on bill and forwards to National Council
- If bill has budget items it must be considered by the Business and Government Committee

STEP FOUR

- National Council Approves Bill
- National Council forwards proposed bill to Principal Chief

STEP FIVE

- Principal Chief approves bill
- Proposed Bill becomes law

HOW A BILL MAY BE VETOED

**STEP
ONE**

- **Principal Chief sends veto message on proposed bill to the National Council**

**STEP
TWO**

- **At next official meeting, a motion must be made and a majority approval to read veto message aloud**

**STEP
THREE**

- **Any Representative, except the Speaker, may make a motion to override a veto (2/3 vote required) and adopt the legislation as law**

**STEP
FOUR**

- **If a motion is not made to override a veto, the vetoed legislation may not be reconsidered**

**STEP
FIVE**

- **Vetoed legislation may be amended and the amended legislation resent to the Principal Chief**

Muscogee Royalty

Miss Muscogee (Creek) Nation

Brittany McKane

is the daughter of Billy McKane and Terry Murphy. She is of the Ecovlke (Deer) Clan and the Fish Pond ceremonial grounds. She attends Arbeka Methodist Church. Brittany is a Junior at the University of Oklahoma where she is working on a double major in Anthropology and Native American Studies. She is also minoring in Social Justice.

Brittany would like to focus on suicide prevention and domestic violence awareness. Brittany stated, "I hope that during my reign as Miss MCN, I'll be able to learn from every person that I meet. I hope that I will be able to bring attention to the issues that are prevalent amongst our people, specifically suicide and domestic violence."

Jr. Miss Muscogee (Creek) Nation

Madeline Lamb

is the daughter of Rita Courtright and Brent Lamb. She is of the Wotkvlke (Racoon) Clan and attends Cornerstone church. Madeline is a Senior at the Sequoyah High School. She serves as the photographer of Honoring Our People's Existence (H.O.P.E.) club, president of the Student Council, member of the National Honor Society and Fellowship of Christian Athletes. She became the first student to qualify for State in Pole Vaulting and holds the current pole vaulting record at Sequoyah. She is also a member of the Mvskoke Tribal Youth Council and uses her spare time to volunteer within her community. Madeline plans on focusing on teen dating violence awareness while serving as an ambassador of the Muscogee (Creek) Nation. Madeline stated, "I want to let people know that there is help out there and that you don't have to be a survivor of violence to bring awareness to the issue. I also want the youth to be more involved and culturally aware."

Muscogee (Creek) Nation Seal

The Muscogee Nation is a confederacy of Muscogean towns originally from the southeastern region of the United States. “Muscogee” refers to the predominant language spoken among these towns. The initials “I.T.” on the circular border stand for Indian Territory, the land that was promised to the Muscogee Nation and other tribal nations for “as long as the grass grows and the rivers flow”. On that promise the Muscogee Nation was forced to leave the southeast in the early 1800’s on what has come to be known as the “Trail of Tears”.

The Muscogee people had been agriculturists since 900 A.D. Using tools hand-made from natural resources, they grew corn, beans and squash. After arriving in I.T., they resumed this practice. The center of the seal signifies the Muscogee’s agricultural background and the influence of Christianity. The sheaf of wheat refers to Joseph’s dream (Genesis 37:7), “For behold, we were binding sheaves in the field, and lo, my sheaf arose, and also stood upright...” The plow depicts a prophecy (Amos 9:13), “Behold, the days come, saith the Lord, that the plowman shall overtake the reaper...”

The Muscogee Nation National Council adopted this seal following the Civil War.

Belvin Hill Scholarship

Belvin Hill
1952-2006

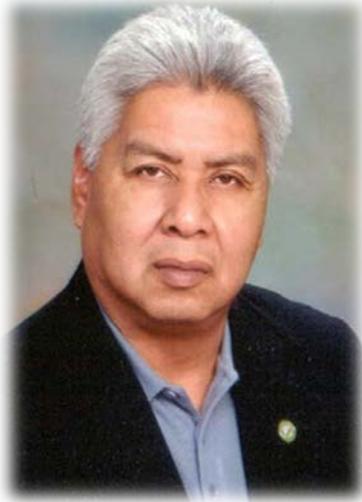

Belvin Hill was born and raised in the Eufaula, Oklahoma area. He was the son of Belvin Jesse Hill and Medella Hill and of the Deer Clan. He graduated from Eufaula high school in 1970 and went on to receive his bachelor degree in education from Northeastern State University in Tahlequah, OK. He received his master's degree in Divinity/Religious Education from Mid-Western Baptist Theological Seminary in Kansas City, Mo.

In 2000, Belvin became the Muscogee (Creek) Nation JOM Program's Field Specialist and one of the original founding members of the Muscogee (Creek) Nation Challenge Bowl. He gave workshop presentations at the Statewide JOM Conferences and National JOM Conferences. It was not unusual for him to assist a JOM program from a different tribe in a different state. He shared his knowledge and his training materials with all who were in need.

He was part of establishing the MCN JOM reputation of excellence in technical training for JOM programs on a national level. His love for children showed through each and every day. He was in charge of the meals for Challenge Bowl, making sure that each child was ready for the competition. At times you could find him serving breakfast and lunch out under a tent pitched behind the Mound building at the Creek Complex in Okmulgee. He went out of his way and made sure that the students and sponsors felt welcomed to the Challenge Bowl competition. He always had a smile and a handshake for all. He was a loving man who always took the time to talk to the students and throw in a life lesson while he was at it.

In 2006, the Challenge Bowl Committee honored Belvin by setting up a scholarship in his name in the amount of \$500 to a graduating senior who participated in the Challenge Bowl their senior year. This scholarship is based on the students' participation and their essay on "Why the Challenge Bowl is important to me". Our hope is it to keep Belvin's spirit of learning alive by providing this small scholarship to students who understand the true meaning behind the Muscogee Nation's Challenge Bowl.

**Wilbur Chebon
Gouge
Honors Team**

Wilbur Chebon Gouge
1951-2008

Wilbur Gouge was born and raised in Hanna, Oklahoma and the son of the late Albert and Sally (Spaniard) Gouge. He graduated from Capitol Hill high school in 1969 and went on to Haskell Indian Junior College. He served in the U.S. Marine Corps and received an Honorable Discharge in 1974. He is a member of the Deer Clan and a member of the Weogufkee (Muddy Waters) Ceremonial Ground and attended Arbeka Ceremonial Ground.

Wilbur Gouge served on the Muscogee (Creek) Nation's National Council for five sessions, serving in the offices of Speaker and Second Speaker along with chairing the Human Development Committee.

While on the National Council, he would greet everyone in the Muscogee language and interpret for the elders what actions were being taken. He also became a founding member of the MCN Challenge Bowl committee. He was the traditional advisor for the games and made sure that the competition didn't over-ride the true spirit of the games – the spirit of learning. His love for the games showed in his commitment to teach the volunteers and students that if you know where you come from, you will know where you are going.

In 2007, the Challenge Bowl committee officially named the sportsmanship award the “Wilbur Chebon Gouge Honors Team Award” to honor him for his contribution to the betterment of this Nation. For generations to come, children will know his name, benefit from his knowledge and credit him for teaching them what it truly means to be a noble Creek citizen.

In 2008, the Muscogee Nation honored him as a Living Legend to acknowledge his years of work and dedication to the Muscogee people. Chebon has been recognized as one of the leading forces behind making Creek Nation more accessible to our youth, parents, community members and employees. On every committee that Mr. Gouge participated in, he kept them grounded by making the Creek culture the focal point of the program or events.

The true meaning of the Challenge Bowl games is to teach our children the Creek culture, history, government and language using traditional values of brotherhood as the foundation. The Challenge Bowl was never set up to teach our children how to win in competitions but how to learn, share and be grateful to those willing to teach them. The Challenge Bowl committee made a commitment to set by example positive role models in good citizenship and tribal pride that would carry on throughout the years.

The “Wilbur Gouge Honors Team Award” is given in each of the three divisions. This award is presented to the one team who best exemplifies the true spirit of the games; knowing how to greet their tribal leadership, acknowledge their elders, show respect to their peers, showing honor in defeat, playing for the love of learning and not just to win a trophy or medal.

Chronicles of Oklahoma

Chronicles of Oklahoma
Volume 4, No. 4
December, 1926
SAPULPA

William A. Sapulpa

The life of Sapulpa, for whom the City of Sapulpa was named, reads much like the lives of other active, virile men, whose lives have merited the confidence, honor and respect of their fellowmen. He was born in Alabama. Both his parents were full-blood Creeks. His father was O-M-I-Y-A, but his mother's name and the date of his birth are unknown to his posterity. Both his parents died in Alabama when he was but two or three years old and he and his three sisters were raised by his two uncles, brothers of his father. His boyhood and early youth were spent on the hunting grounds of their then Indian country, which extended from Florida to Mississippi and the encroachment of white settlers into that country brought him into conflict with the governmental authorities and the soldiers, so he was, for a time, what may be termed a wild Indian. It seems that the white settlers of those days (very much like some of the white settlers of later days), would not recognize the rights of Indians to any property whatsoever and proceeded to help themselves to stock belonging to the Indians. The Indians proceeded to retake as much of their stock as they could find and, perhaps, taking other stock in place of the stock not found. The white settlers, of course, chose to treat the Indians as cattle thieves and shot some of them. This conduct on the part of the white settlers so aroused the manly and racial instincts of young Sapulpa to action that brought the soldiers in pursuit of him; but he was too wily and fleet of foot for the soldier boys, so they never caught him. One incident of his experience with the soldiers that he often told to his children was this: While out hunting with some other men, in Florida, they saw the soldiers with blood hounds—and the pursuit was on. Young Sapulpa ran into a swamp, with the blood hounds and soldiers on his trail. Coming to a creek that ran into a lake, he saw a big alligator in the creek. If he stopped or turned back, the hounds and soldiers would get him, so he made a desperate jump over both the alligator and the creek. But the hounds and soldiers were not so fortunate—for when they arrived at the creek, the alligator put up such a hard fight that they gave up the chase. And so the native of the swamps saved the native of the woods from his enemies.

The Creek Indians of those days often visited St. Augustine, Florida, where they did most of their trading. Here did also young Sapulpa go quite frequently and met and made many friends among the white people. His last trip to Ste. Augustine was his last trip from the old hunting grounds; for at Ste. Augustine some of his white friends induced him to go with them to Charleston, S. C. The trip was made by boat, and Mr. Sapulpa was treated to the sights of whales, etc., to be seen in the briny deep. Leaving Charleston, he continued by boat to New Orleans and then continued on to what later became the eastern part of the Creek Nation in what is now Oklahoma—thus becoming one of its pioneers and one of the leaders of his people. Soon after his arrival in the new country, he assumed the duties of a husband by marrying NaKitty, an Indian maiden, and, moving to what is now Creek County, he built his home and commenced farming on Rock Creek, about one mile southeast of Sapulpa. Sometime later, in about 1850, he

started a store at his home, where he sold coffee, sugar, tobacco, dry goods, flour, spices and other articles too numerous to mention and hauling his goods in by team and pack horses from Ft. Smith and the old agency about 7 or 8 miles northwest of Muskogee. At the end of about two years he gave up merchandising on account of the difficulties of getting in his goods. There were no other stores in the neighborhood—the nearest stores being at the old agency, near Muskogee and at Council Hill. There may be some old timers who remember when we had no railroads, no automobiles, no trucks, no interurban lines, no bridges over our streams—and no wagon roads fit to travel, but I think that the most of you would consider the traffic in merchandise, under such conditions, as unthinkable.

Three children were born of his marriage to NaKitty—James, Hanna and Sarah. Of these three, James and Sarah are still living. James Sapulpa lives about one mile south of Sapulpa, and Sarah is now the wife of Timmie Fife and lives within the city.

Sapulpa was married again to Cho-pok-sa, a sister of his first wife and by whom he had seven children—Moses, Yarna, Samuel, William, Rhoda, Becca and Nicey. All of these children are now dead, excepting William, who now is a farmer, and lives about two miles west of Sapulpa.

When the Civil War broke out, Sapulpa loaned \$1,000.00 in gold to the Confederate cause, receiving a note as evidence thereof, which note is still in existence and held for safe keeping. He joined the Creek Regiment of the Confederate Army, in which he served for three years and rose to the rank of first lieutenant, and was wounded in the battle of Elk Creek, near what is now Checotah, Oklahoma.

During the years 1871-73, about two or three hundred Osages used to come down here and camp, staying about two weeks at a time and traded with the Creeks, buying corn, sweet potatoes, peas, beans, peanuts, bacon, hogs and so forth. They put up their tepees on the land where the court house now stands and extending in a southeasterly direction about one-half mile.

In 1872, Mr. Sapulpa opened another store at his home on the hill southeast of what is now Sapulpa, buying and hauling his merchandise this time from Coffeyville, Kansas. But about a year later he closed out the business again, because of the difficulties of transportation. However, he had taken a deep interest in farming and stock raising and devoted his time, energy and talents to those industries with such success that, in due time, all the land within ten miles of his home was embraced in his ranch, and for several years he shipped cattle and hogs to the St. Louis market.

In about 1875, Mr. Sapulpa joined the Methodist Church South, and was an active member thereof from then until the time of his death and donated liberally with cattle, flour, coffee and sugar to feed the people at Camp Meetings, which always lasted several days.

In the early days, big game, consisting of antelopes, panthers, deer, buffalo, elk and bear was plentiful, and Mr. Sapulpa indulged his passionate fondness for hunting and exercised his great skill in the hunting of such game.

In about 1884 or 1885, the Frisco railroad completed the extension from Tulsa to Sapulpa and Mr. Sapulpa was invited by the Frisco officials to ride to Sapulpa on the first passenger train from Tulsa to Sapulpa.

I am pretty reliably informed that there was one store and one blacksmith shop at the end of what is now South Maple Street for several years before the Civil War, and that business was kept up there until the war broke out and that during the war all the buildings were burned.

The Okmulgee District Court of the Creek Nation was held about the year 1890 on or near the place where J. E. Rice now has his business at Park Street and Lee Avenue, and was presided over by William Anderson, as Judge, with Stand Watie as Prosecuting Attorney and myself, William Sapulpa, as Clerk of the Court.

Mr. Sapulpa was a member of the Coon Clan and his wives were members of the Fox Clan. He was a member of Osocheetown and in 1868 was elected by his town as a member of the House of Kings, which position of honor and trust he held until the date of his death, March 17, 1887.

Mr. Sapulpa was fond of the Indian ball game and was considered the best all round ball player on the Arkansas River.

THE CREEK INDIAN COUNCIL IN SESSION

By Alice Robertson

Although the Capitol of the Creek Nation was established at Okmulgee in the year 1868, I had never been there when the Council was in session in the log Council House. In 1878 I was in Indian Territory on leave of absence from the Indian Department in Washington, where at that time I was employed as a clerk, and was visiting my parents at Tullahassee Mission when I had an opportunity to see the council in session.

Early one beautiful October morning my father and I left Tullahassee with the hack and a pair of Indian ponies,—in the vernacular of that time a hack was a strong, light spring wagon without cover. We crossed the Arkansas River at Henry Texas' ferry, superseded in recent years by what is known as Spaulding Bridge. The drive was one of great charm. We did not mind the open vehicle and our ponies made six miles an hour.

The tall prairie grass waved its russet sprays above golden rod and white and purple asters. At noon we stopped for dinner and to feed our ponies on Cane Creek, where Isaac Smith an enterprising Creek Freedman had built a cluster of log cabins which were the rooms of his hotel. He catered only to white and Indian travelers and patrons usually had a whole cabin to themselves. The cabins were fairly clean though sometimes the small pests, colloquially known

as "chinchies", were annoying. Father and I spread blankets on the grass out under the trees, and while our noon day meal was prepared we indulged in a siesta in the warm October sunshine. Isaac's was notable for fried chicken with cream gravy, butter milk biscuits, fresh butter, preserves and of course plenty of coffee. After the ponies had finished their eight ears of corn apiece and all the hay they could eat, we paid two bits each for our dinner and two bits each for the ponies' dinner and went happily on our way, leaving Cane Creek bottom and driving west across the big prairie.

The first evidence that we were coming to Okmulgee as the sun began to drop toward the horizon, was the sight of Severs' pasture. This pasture was three miles square, with a split rail fence, nine rails high. In trading with the Indians Fred B. Severs bought small bunches of their surplus stock for which they took exchange in "store goods." These cattle then had the Severs' brand placed upon them and were turned into the pasture until a sufficiently large herd was ready for market. We forded Okmulgee Creek and went up the road past camps and camp houses to, Smiths' Hotel.

Smiths' Hotel was a rather large frame building a block from the Council house. A front room upstairs was assigned to me. It looked out on an upper porch and its windows were curtainless. Its furnishings comprised a low springless bedstead with a feather bed and pillows, one sheet, and a clean patchwork quilt; no mirror, no chair nor wash basin. Guests of the hotel were expected to perform their ablutions on the front porch, below, where there was a long shelf with buckets of water, gourd dippers, tin wash basins with one roller towel. I had prepared for such an emergency with a plentiful supply of soap and towels, so neither father nor I had to patronize the roller towel and I borrowed a basin so I got along very well. Out in front of the hotel, swinging from its iron frame on a high post was an iron plantation bell. A vigorous pulling of the attached rope was the signal to the town that it was meal time.

Meals at Smiths' Hotel were two bits but there were boarding places at which meals could be had for fifteen and twenty cents and not bad meals either. Each breakfast and supper at Smiths' was a replica of the others, everything that could be fried was fried, bacon, eggs, ham, potatoes, corn, etc. At dinner most foods were boiled but there was often barbecued pork or beef, and chicken appeared with dumplings and gravy. For anyone who asked there were Indian dishes, sofkey, tuklike, tooksey, ahpuskey etc. There was always coffee to drink and water if you asked for it, but it was customary to patronize the dippers in the water buckets on the front porch after each meal.

At early candlelight the Council House bell rang and in the dimly lighted hall I went with my father up the steps of the new Council House, recently completed, and used for the first time at this meeting of the Council. Hymns in their own language were being sung as a congregation gathered in the Hall of the lower house of the Warriors, The "Tustenukkulkee". Men, women and children drifted in during the singing, then a man began to pray and everybody knelt down. The service was entirely in Creek, and the Preacher was the President of the House of Kings, The "Mekkulkee", always addressed as "Liketuh Ohliketuh". The Reverend James McHenry, a notably outstanding character, was the son of a Scotch father and Indian mother. During the bloody Creek war which led to the conquering of the Creek people and their exile to Indian Territory, McHenry was a fearless fighter. He foiled all attempts to entrap him and even a

standing reward of \$1500.00 for him, dead or alive, failed to bring results. Finally taken however he was carried with his exiled brethren to Indian Territory where he began a new life. He was converted and went into the Methodist Church and was duly licensed and ordained as a minister. He had received a rudimentary education in English. No longer an outlaw, he was a leader of his people, a zealous Christian soldier. The service he conducted was not long, for the village kept early hours.

At six the next morning when Smiths' bell told that breakfast was ready; I got up and joined my father downstairs in time for bacon and eggs, hot biscuit, fried chicken and all the rest. Then we walked around awhile exchanging greetings with our Indian friends. At a quarter of nine the Council House bell rang. We had gone a little earlier to pay our respects to the Principal Chief, the "Mekko Hlakko", in the executive office. Ward Coachman was a man of much ability who was born in the "Old Nation" in Alabama and educated there before following his people west. He was a member of the Alabama Creeks and spoke English, Creek and Alabaman with equal fluency and our interview was a pleasant one. From the executive office we went across the hall to the office of the committee on schools where father placed on file his reports of Tullahassee Mission and left his books for financial audit and approval that the treasurer might issue a warrant for funds. The Contract under which Tullahassee was operated provided a division of expense between the Mission Board and the Creek Nation.

Then we went upstairs to the House of Kings. The "Light Horse" who acted as doorkeeper admitted us and gave us seats to the left of the dais, on which was the desk of Mekko McHenry. We watched the routine business of the morning hour. Then Mekko McHenry with great dignity and eloquence of voice and gesture made a personal address which brought a smile of gratification to father's face and embarrassed blushes to mine. With the musical style of Creek oratory he was describing to the Mekkulkee the good works of the Robertson family and their accomplishments for the welfare of the Creek people. The young woman present with her father, he said, was a great friend to the Muskogee people in Washington where she worked for Wuhins Mokko, the Government, and had done many things helping them. Especially he enlarged upon the recent contest among themselves in the election for chief where the papers seemed to have been laid aside and forgotten.

All the public life was at a standstill. Their treasury was empty, their Courts and schools were without funds; even the community blacksmiths had no funds till there should be legal recognition of their government and officials through whom the funds should be paid. Though as they saw she was just a girl, she had interceded, and had been allowed, upon examination of their papers, to write a report which had been adopted, the rightful government had been recognized, and peace came to their people. Then his gavel called all to their feet and as father and daughter stood he led the stately stepping band of Indian Kings through their ceremony of presentation and hand shaking, all returning to their places and remaining standing until the fall of the gavel permitted them to be seated. This was an honor never bestowed upon a woman before.

Thomas Gilcrease

By: Martin Wenger

Thomas Gilcrease, a well-known oilman of Creek Indian, descent and the founder of the Gilcrease Museum at Tulsa keenly appreciated his American heritage. Early in life he commenced to assemble the remarkable collection of paintings, sculpture, books, manuscripts and artifacts pertaining to the American Indian and the American frontier which has come to be recognized as the Nation's most outstanding collection of its kind. Thomas Gilcrease was born in Robilene, Louisiana, on February 8, 1890, one of the large family of children of William and Elizabeth (Nee Vowell) Gilcrease. When Thomas was a few months old, the family moved to Eufaula, Indian Territory, for Mrs. Gilcrease was of Creek Indian descent which gave her and her children land rights in the Creek Nation. A year later, they settled on a farm just south of Ball Mountain where they were neighbors to the Posey family. Thomas Gilcrease attended his first school in this community, taught by Alexander Posey, later the noted Creek poet in Oklahoma history. In about 1898, the Gilcrease family moved farther west to the Twin Mounds, in present Creek County, where they took their allotments of land the time the tribal rolls and allotments in severalty were made in the Creek Nation. William Gilcrease opened a little grocery store at the Twin Mounds, and later owned two cotton gins and a grist mill in the vicinity. In 1904, he moved his family to Wealaka, an old post office in the Creek Nation where he laid out a townsite and became postmaster and opened a general merchandise store. His son Thomas as a boy picked cotton and drove a wagon and team on the farms; later he worked in the cotton gins and in the store and post office at Wealaka. Oil was struck four miles from the 160 acre allotment of Thomas Gilcrease in 1905, and his land was soon in the famous Glen Pool of the great Mid-Continent Oil Field that pushed Tulsa on its way to become the "Oil Capital of the World." Young Gilcrease had thirty-two producing oil wells on his 160 acre allotment by 1917. He attended Bacone College at Muskogee, Indian Territory in 1907-08, soon after oil was struck on his land. A few years later, he attended the State Teachers College at Emporia, Kansas. He moved to Tulsa in 1908, which was really his home throughout his lifetime though he lived in California a short time; he also lived in San Antonio for a period of years, and traveled abroad for many years. Thomas Gilcrease carried on his own business interests at an early age-fanning, ranching and dealing in real estate. He purchased land two and one half miles northwest of Tulsa in Blackdog Township, of Osage County in 1912, where he built a large home and bought his first oil painting, Rural Courtship by Ridgway Knight.

Young Gilcrease had started his own oil business and entered the field of banking at the age of twenty-one. He soon owned a large interest in the bank now known as the Fourth National Bank at Tulsa, also owned outright the Bank of Bixby, the State Bank of Wagoner, the State Bank of Coweta and also, at one time, the largest bank in Stillwater.

Mr. Gilcrease formed the Gilcrease Oil Company at Tulsa in 1922. The Company brought in the first oil producer in South Central Oklahoma soon afterward, and it was during these oil

omrations that Mr. Gilcrease discovered a new oil producing strata which is known today as the Gilcrease sand. This spurred the development of the oil pools in this art of Oklahoma such as the Papoose, Sasakwa, Wewoka and others. The Gilcrease Oil Concave established an office in San Antonio in 1936, and operated in the East Texas Field. South to the Rio Grande River, west to New Mexico as well as in North Texas, Southern Oklahoma and Kansas. Later, Mr. Gilcrease also established an office in Europe. He started his extensive traveling abroad in 1925. It was in this that his interest in American culture intensified, and he accelerated his activities in collecting rare objects of art, paintings, books and manuscripts. His visits in Europe taught him that knowledge of civilizations is established by the things that remain from them. It was in Paris that he determined to assemble a record of the American Indian including the pre-historic period which could be obtained only by archaeological explorations. Much of his time during the last years of his life was spent personally excavating remains of ancient Indian cultures.

The Thomas Gilcrease Foundation was established in 1942, "to maintain an art gallery, museum and library devoted to the permanent preservation for free and public use and enjoyment of the artistic, cultural and historical records of the American Indian." A building was constructed of native sandstone by Indian artisans on land near the Gilcrease home, and the museum was opened by a formal dedication ceremony May 3, 1949. Mr. Gilcrease presented the museum collections to the City of Tulsa in 1955. He also deeded the building and thirteen acres of land surrounding it to the city three years later. Since then, the fame of the Gilcrease Collection has grown rapidly. Visitors have come from all parts of the world to see this great museum, now officially known as the Thomas Gilcrease Institute of American History and Art of Tulsa. Thomas Gilcrease passed away in the morning of Sunday, May 6, 1962, from the effects of a stroke suffered a few hours earlier. Memorial services were held on the lawn in front of his home overlooking the skyline of Tulsa on the following Wednesday. The Reverend Guy Tetrick of the Methodist Church officiated at the services which were highlighted by a eulogy written and delivered by David R. Milsten. Indian burial rites were conducted by Chief Dode McIntosh of the Creeks, Wolfrobe Hunt and other Indian friends. Burial will be in a mausoleum to be constructed nearby. Mr. Gilcrease was married twice, and is survived by two sons, Thomas, Jr., and Barton of San Antonio, Texas; and a daughter, Des Cygne Gilcrease Denney of Palos Verdes Estates, California. A friend tells that Mr. Gilcrease once said that of all the things he had ever done, the most useful to the most people something that will bring pleasure and knowledge-had been the founding of the library and art gallery of the museum. "It is my aim always to leave something more beautiful than I found it," he remarked. Thomas Gilcrease enjoyed a rich and happy life that started from humble beginnings. He gave to Oklahoma and America a gift of immeasurable value. He appreciated the ideals and the spirit of the American tradition. He appreciated them so much that he has left for posterity a marvelous and vital presentation of our American heritage that will continue to instill a greater understanding and respect for these ideals in all time to come.

Legends & Stories

HOW DAY AND NIGHT WERE DIVIDED

After the world was made, some of the animals wanted the day to last all the time. Others preferred that it be night all the time. They quarreled about this and could come to no agreement. After a while they decided to hold a meeting, and they asked Nokosi the Bear to preside.

Nokosi proposed that they vote to have night all the time, but Chew-thlock-chew, the Ground Squirrel, said: "I see that Wotko the Raccoon has rings on his tail divided equally, first a dark color then a light color, I think day and night ought to be divided like the rings on Wotko's tail."

The animals were surprised at the wisdom of Chew-thlock-chew. They voted for his plan and divided day and night like the dark and light rings on Wotko the Raccoon's tail, succeeding each other in regular order.

But Nokosi the Bear was so angry at Chew-thlock-chew for rejecting his advice that he thrust out a paw and scratched the Squirrel's back with his sharp claws. This is what caused the thirteen stripes on the backs of all his descendants, the Ground Squirrels.

THE LANGUAGE OF ANIMALS

It is said long time ago, men and animals talked to one another and later they lost the ability to do so, but the great medicine men had the gift. One time an old woman was much frightened at the sight of a yearling Bull coming toward her bellowing and she tried to escape. The Bull reassured her, however, in language she could understand, saying "Don't be afraid of me. I am just enjoying myself singing." He added that she must not tell of her experience or she would die.

After that the old woman knew the language of the animals and listened to them as they talked together. She was blind in one eye, and once when she was shelling corn she heard the Chickens say to one another,

"Get around on her blind side and steal some of the corn." She was so much tickled at this that she laughed out loud. Just then her husband, who was a very jealous man, came in and believed she must be thinking of some other man, so he said, "Why do you get so happy all by yourself?"

Then she related her adventure with the Bull and told him what the Chickens had just been saying, but the moment she finished her story she fell over dead.

THE ORPHAN

An orphan was walking about shooting arrows. One day he came to the lower end of a creek where the water was deep and heard a noise like thunder. Looking closely, he discovered a Tie-snake and the Thunder-being fighting, and when they saw him, both asked him to help them. The Tie-snake spoke first, saying, "My friend, help me, and I will tell you what I have learned." The boy was about to aim at his antagonist when the Thunder said, "Don't shoot me. Kill the Tie-snake. There is a spot under his throat and it is there that his heart is. If you shoot him there you will kill him." Upon hearing this, the boy aimed at the white spot and killed the Tie-snake. In this way he obtained all of the Thunder's power, but the Thunder told him not to tell anyone where he was getting it.

Sometime after this, some people went bear hunting, taking the orphan with them. It was in winter when the bears were hibernating. Two camps were formed, one consisting of the boy's uncles. While they were there, an owl was heard to hoot and the orphan said, "the hooting of that owl is the sign of a bear." His uncles said they did not believe it. "He doesn't know anything," said one of them, but the boy declared, "I am right." His brother-in-law believed him, so he said that they two would go out after it. They set out next morning and, sure enough, discovered a bear in a hole in the ground. They killed it and brought it back to camp. The Thunder gave this orphan such power that all he foretold came to pass. If he told the hunters a certain kind of game animal was in a tree, it was actually there and they got it.

Sometime later, war broke out. The orphan said he could fight without help from anyone, and they told him to go ahead by himself. "I will certainly do so," he answered. The brother-in-law, who had confidence in him, also went along in the party. When they got close to the hostile camp, the boy went on ahead while the others sheltered themselves behind trees. Then, the orphan caused thunder and lightning all over the camp of the enemy. Some were killed and the rest ran about in helpless terror, so that the boy's followers ran up and killed all of them.

Later, there was another war and those who know the orphan wanted him to lead. When they got close to the enemy, he told his companions to remain at some distance. Then, he went nearer and began to circle round a tree. As he did so lightning played all about and struck all over the camp of the enemy, killing everyone in it. The orphan was never seen afterwards, and so they thought that he went up in the midst of the thundering to the sky. Therefore, they claimed that the Thunder was an orphan child.

THE WATER PEOPLE

A boy carrying his bow and arrows was walking about near the water, when two women standing close to the shore said, "Follow us." Then he leaned his bow up against a tree and followed them, and presently those women said, "We are going down into the water. Go down in with us." So saying, they started on, and just as they had said, they presently went down into the water, that boy with them.

When all got in, the bottom was as if there were no water there, and before they had gone far they came to where there were some old water people. Those old men said, "There is a chair. Sit down." The chair they thus indicated to him was a very big water turtle. "They spoke to me," the youth said "and I sat down and they said 'Do you want to lie down? There is a bed. You must lie down. The tree-tyer [i. e., tie-snake] there is the bed,' they said to me.

Later they said, 'You can go hunting if you want to.' 'I cannot go hunting because I have no gun.' But the old men said, 'Go about hunting, and when you fall down somewhere come back.' After they had said this to me I set out, and while I was walking around, there was a rumbling noise and I fell down. I lay there for a while, and then came to my senses and returned to them.

When I got back the old men said, 'What did you kill?' 'I killed nothing' I answered, 'but I fell down and was unconscious. After I had lain there for a while I came back, but I did not kill anything.' 'Let us go and look at the place where you fell,' said those old men. Immediately we started, and when we got there, a very big thing of some sort was lying there dead. 'It is just as we said,' said they, and they brought it back, Then they ate.

After I had been there for a while those old men said, 'If you want to go, you may,' and I said, 'I will go.' 'You take him back,' they said to someone, and just as I thought, 'They are going to take me along' I lost consciousness.

Next I came to my senses standing close to the water, exactly where I had been when they took me off. 'My bow is standing up against a tree,' I thought, and when I got to the place, there it was just as I had thought, and I took it and started off. When I got to the place where my people lived, they were there. Then they said, 'The one who has been lost for such a long time is back.' The old men compounded medicine for me and after a while I got well," said the boy. They used to tell it so

THE ANIMAL HELPERS

A man on a considerable journey stopped to eat his lunch beside a creek. Then a big black Ant came out and said, "Give me a piece of bread. Sometime I may help you out of trouble." So he gave it some bread. By and by he heard some talking in the water, and some small Minnows came up and said the same thing. He gave the Minnows some bread also. Then a red-headed Woodpecker came and asked for bread, which he again gave to it.

After this the man went on again and came to a town (talofa). There was a lot of wheat at a certain place in that town, and the people told him that he must move it and put it in barrels by morning or they would kill him. So they tied him down on the wheat and went away. By and by up came the black Ant which he had fed and asked him what the matter was. The man told him, and the Ant immediately went away and brought back a multitude of Ants, who soon had the barrels full. Next morning the people paid him for what he had done, but said that the next night he must dig up a certain tree, root and all, or they would kill him.

This time the Woodpecker came to him and asked what the matter was. "I am in trouble," he said, and he related what had been imposed upon him. Then the Woodpecker flew up and told the lightning and the lightning came down and tore the tree up, roots and all, so that in the morning the people paid him for that. They told him, however, that a horse loaded with gold had been drowned in a neighboring creek and that they would spare him if he found it by the following morning. So they tied him again and laid him on the bank of the creek. By and by the little Fishes he had fed came and said, "My friend, what is the matter with you?" He told them, and they went down and brought all the money to land, but they said that they could not get the horse for the snakes (*hotisågi) alone could do that, and they were only orderlies (*hola`tålgı). They made a pillow of the sack of gold under his head. The town people paid him for all the work he had done, and he went home a rich man.

*This seems to be a metaphorical term meaning "those one is afraid of." Tcitto is the usual word for snake.

LITTLE JACK

During the journey of the removal from Alabama to Indian Territory, family members have written stories about a little boy who they say was marked by special powers. Little Jack and his family along with several families traveled many days before they came to the Mississippi river. There at the crossing, he almost lost his life.

Little Jack had walked along with his family for many days. His shoes were worn out and he suffered from the cold and hunger. Someone offered him a pony to ride.

When they came to the Mississippi crossing, the current of the river was very strong but everyone had to cross somehow. Some of the people went across in boats; others had to cross on their horses. Little Jack wanted to go on the boat but he didn't want to leave his pony.

Little Jack stood on the bank with his pony. He watched the elders at the water's edge praying for the safety of their people. The leader's horses plunged into the water. Other riders followed. Huge logs ere careening down the river. Before his very eyes, men and horses were being disastrously carried downstream, pulled under and dragged to the bottom.

"Let's go!" the lieutenant shouted. Soon it was little Jack's turn to cross the river. Riders reaching the far bank turned to watch the little boy and his pony. Jack nudged his pony into the water. Soon everyone was watching little Jack cross the river. Midway, something knocked him off the horse. He was swallowing water and gulping for air. Though concerned for the boy, the water raged so violently that no one could help the boy now. Somehow he was able to grab the pony's tail. The pony struggled through the heavy current until he was able to stand and walk to shore. Jack! Men lifted the boy in their arms. He had made it! Those who watched the boy crossing the raging river remarked about seeing a tiny man sitting on the head of that pony. That was strange but the little man was also directing the pony across the raging river with little Jack in tow.

It took a while for the ones swept the farthest to return upstream. In gratitude, everyone gathered that evening on the west bank. The tradition was to change the name of a child or man when something important happened in his life. Names were never given for a lifetime, but earned by deeds. Jack's new name was "Jock-o-gee". Their mind says "Jack" but their tongue says "Jock", "Gee" means "little". This modest name would mark a small boy who overcame a mighty river. The name had a second unspoken but more powerful meaning. All knew of the 'little people' but no one had seen them for at least four generations. Yet, it was clear that the mark of the Great Spirit and the 'little people' were on Jock-O-Gee. No one dare to speak the river's name. "Gee" was as close as they dared to speak the full name of the 'little people.' The Knowledge and protection by the 'little people' reside with peace-makers. From the day the river was crossed, "they" were with Jock-O-Gee, teaching him how to heal the sick people in the new land with new herbs and plants.

RABBIT GETS A TURKEY FOR WILDCAT

A Rabbit was overtaken by a Wildcat, who threatened to kill and eat him. The Rabbit said: "Do not kill me; I will bring you a turkey." The Wildcat consented to let Rabbit try, so he ran into the woods to find the turkey, first telling the Wildcat to lie down and pretend he was dead.

Rabbit soon found some Turkeys and told them the Wildcat was dead and proposed that they all go and dance and sing around his body. The Turkeys agreed and went with Rabbit and when they saw the Wildcat's body stretched on the ground and his mouth and eyes looking white as if he were flyblown (for Rabbit had rubbed rotten wood on the edges of his eyes and mouth) they were satisfied that he was really dead.

Rabbit took his place at the head of the Wildcat and began to beat his drum and to sing while the Turkeys danced around him.

After the song and dance had continued a while they heard Rabbit sing:

"Jump up and catch the red leg, Jump up and catch the red leg."

"Why, he is dead and cannot jump," they said, but they objected, so he promised not to say that any more.

So Cufe (choo fē) sang and drummed away and the Turkeys again danced around their enemy's body; but soon Chaffee sang in a low tone:

"Jump up and catch the biggest, Jump up and catch the biggest."

The Turkeys stopped their dance, but too late, for the Wildcat jumped up and caught the biggest gobbler. Rabbit ran away to the woods and the Turkeys pursued him, threatening to kill him for his trickery. They chased him round and round the trees till at last one of the Turkeys bit at his long tail and bit it off, and ever since that time all rabbits have had short tails.

THE MAN WHO TREATED A GHOST

An old woman was living at a certain place with her grandson. One day the boy said, "I am going out hunting and will come back. I will come back in four days," he said, and he started off. He crossed a big river, reached an immense thicket, and camped there. Then he heard someone shouting, but instead of going toward the sound he remained where he was until morning. In the morning he went on, killed a deer, and brought it to his camp. By the time he had roasted all of the meat it was night and he sat down and ate the roasted meat. He kept hearing a person's footsteps, and presently someone came and sat down on the other side of the camp fire. Then the hunter said, "Come and eat meat with me." "All right," answered the other. So he ate. When he had finished, both sat down. The ghost said, "Did you kill this sweet meat?" "I did," he answered. While they were sitting there he gave him more meat, and he went off with it. In a little while he came back. He gave him more, which he also took away. As before, he soon came back. Then the man was very much frightened. This kept on until almost daylight, when he sent him very far off (after meat hung upon a tree?). He went and came back quickly. That was done repeatedly until daylight came. Then he sent him very far away. And the ghost went off. The man ran away. He ran straight toward a river, but when he had almost reached it he heard the ghost shouting behind him. At that the man ran to the water and turned around and looked. When he saw the ghost following him the man dived into the water. He went down with the current and came up far off. He looked back and saw the ghost looking into the water right where he had dived. The ghost wanted to seize the man and was very sad because daylight had come. After remaining there for a time he went back. Then the man came out of the water and returned to his camp. When noon came he took fire with him and started directly toward the place from which the ghost had come. And the man traveled about in search of him. He peeped into an old hollow tree and saw his meat disposed all around inside of it. Then he hunted for dry dead wood, put it into the hole and set it afire. The ghost inside shouted, but his shoutings died away. Then the man went back, but he was afraid and went home. Arrived there, he related the experience to his grandmother and she gave him medicine to quiet his fear. He was somewhat sick for a long time, but finally he got well.

STRONGEST MAN IN THE WORLD

Dad's brother Nathan had the best stories about "little people". Uncle Nathan told this story about a good friend.

It had rained most of the night. The big thunder would shake the house, and then lightning flashed. Sleep came in fits to the Indian man and his wife. Finally, the storm ended and both slept again. As the sun raised its face the next morning, the skies were clear. The man was awakened by the birds' wake-up songs. He put on his clothes and went outdoors. Ah, there was an early morning rainbow in the sky. Yes, today would be a good day!

His wife was still asleep. Maybe there was time to take a little walk. As he walked along, it was easy to imagine some of the good things that she would cook for his breakfast. Ham and biscuits and coffee. While distracted, he heard a small voice, "Ho, man, you want to come see our place?" He was startled by three tiny men standing in his path. "They are too small to hurt me," he thought. His curiosity overcame the thoughts of food. He followed the little men, walking through the underbrush in a south and westerly direction.

Soon, the little men reached a small stream. The leader gathered them near the water. Their little voices sounded like many bumble bees. He gestured and talked, then turned and looked directly at the man. The leader spoke to him, "The rains last night have made the river too wide and deep for us to cross. We need your help to go home." The water may have been chest deep to the man. He didn't want to wade cold water, much less carry three little men. Instead, the man began the search for a felled tree. He returned with a sapling chewed to the ground by a beaver. It was just the right size, about six inches across. He dragged it to the edge of the stream, walked his hands up the trunk to make it stand erect. It toppled over, crashing down across the stream. The little men jumped up and down and shouted and cheered, "You are the strongest man in the World!" The man smiled. Their encouragement made him feel good. Next, the little men took up the line formation and led him safely across the "bridge". They looked like ants crossing the log. Reaching the other side of the stream, they again cried, "You are the strongest man in the World!"

This procession reached a big hill covered with trees. The leader stopped. He pointed to a hole in the side of the hill. "Ho, man, you want to go inside our house?" Even before an answer came, the men popped through the hole. Dropping to his knees, the man squeezed his head and shoulders through then struggled in. Once inside, he sat up. A good hunter learns to use his nose, especially when it's dark. What he smelled was danger! There was a heavy pungent, musky odor in the room.

In the rear of the dark hole, he could see light shining through another opening. Slowly his eyes began to adjust to the darkness. Snake! Big snake! His eyes locked on the snake, coiled, with its head in the air. Its tongue was flicking in and out as it peered into the man's eyes! Then he was aware of hissing. He didn't dare to move his head, but looked sideways. The room was filled with hundreds of snakes of all sizes. There were red and yellow and green and black snakes. Most of the big snakes were coiled and hissing at the man. Smaller snakes were entwined about others like little children playing.

The man was so frightened at the terrible sight of the snakes. He regretted following these little people. Maybe he could escape. Then his eye was attracted by the leader of the little men, waving his hand, “Stop, don’t be afraid. We keep them here so that people won’t bother us. You can see the guard snakes with rattle tails are quiet.” Then, he gestured across the room to the second hole. He turned and walked with others following. “Come with us,” they cried out. The little men walked through the hissing snakes as if they were nothing but a field of daisies waving in the breeze.

The man backed against the wall of the cave to keep his eye on the snakes in front of him. With his fingers touching the cold damp wall, he inched his way. Reaching the opening, he turned and leaped headfirst through the hole. He fell to the floor of the second cave. The little men were standing near, looking him in the eye. One at a time, they would stick out their tongue at the big man and hiss—like one of the snakes. All laughed. They were making fun of him. After watching them walk through the snakes, he admired their courage. Lying on the floor, he no longer felt like the “Strongest man in the World”. His heart was still pounding. He had much to learn about courage.

As he was prostrate on the floor, they turned to talk to themselves in their little voices. The leader walked up close to his face, “Ho, man, you hungry? Have you eaten today?” He answered, “Well, yes, I would eat. What do you eat, acorns and berries?” They were talking again to themselves. The leader turned to a little warrior. The underling drew himself to full attention as if to salute, then picked his bow and arrows and left the room. The other two sat cross-legged on the floor and started a small fire. The flames danced and the smoke wisped from the room. “They” seemed to waiting for the hunter to return.

It wasn’t long until the hunter came back with the “kill” slung over his tiny shoulder. He entered the cave and threw it to the floor before the cooks. It was big yellow grasshopper with a small arrow sticking from its side. He said, “Man, I have killed a big turkey for you to eat. It will taste so good.” The cooks began to roast the grasshopper. When it was done “just right”, the head cook tore off a leg and passed it to the man, “Have you ever eaten grasshopper, even *roasted* grasshopper?” It took great courage for the man to take a small bite from the roasted leg. He was quite surprised to learn its taste *was* like wild turkey. He was hungry. It surprised him that his stomach was so full even though this grasshopper was so small—to him. The little men patiently waited and watched the man eat his fill. Then, each one ate small portions. When finished, they wiped the last trace of turkey grease from their little hands on their little bare legs. They smacked their little lips and clapped their little hands, and smiled. Once the meal was done the chattering began again. The leader stepped forward, “Man, you stay with us for a few day. We want to show you more of our ways.” The man was captivated with their courage and skills and rather disappointed with his own. Leaving meant to cross that snake pit. He was pleased to stay with them.

Three days later, he returned home. His wife remembered the rainbow she saw the morning that he had left home. He left before breakfast and returned days later, happy and so peaceful. Not hungry and not talking about where he had been.

She would not have questioned the children and she wouldn’t question him either. Breakfast was served and good luck seemed to follow them. The man was right. This had turned into a good day.

THE STORY OF THE BIRDS

Now the young man had made a pact with the plants, and he was well satisfied, but he thought about this for a long time. He thought about the voices that he had heard. He said: "They are alive just as I am. They too get tired, just like I get tired. I was given the responsibility to take care of these plants. They too will need a rest. How do I give these plants a rest?" He thought about it a long time and he remembered the birds in the sky. "All animals that fly, that has wings will be the carriers. They will have the chore of bringing the changing weather."

So he called them all together. They were gathered, and he gave them a choice. He didn't say certain ones would migrate south; they had the choice. "You will bring in the changing of weather in order that these plants may rest. As you begin to migrate south you will sing and let the trees and other plants throughout the land know that you are bringing a change of weather and to be prepared." Then the plants' leaves begin to fall. (So that's why when you hear these geese, these birds go by, they sing. They sing as they go to let the plants know that they are bringing in the changing weather.) The birds bring in the cold weather so that the trees will go dormant, giving the plants a chance to rest. All the sap, life-sustaining minerals and substances that they have inside them will have a chance to go back to the ground, to Mother Nature, to purify itself again and come back again come spring. Just like the medicine men who always clean themselves to keep strong, the plants are no different. The young man told the birds: "You will sing as you come back and the plants will hear you. They will awaken."

The migrating birds will be responsible for bringing in the cold, and they will bring back the warmth for the plants to grow again when it is time. (You notice that it is almost four month, November, December, January, February, that the plants are dormant.)

Then, he went a little further. He told the birds that didn't leave that they were being given a choice again, which birds will stay up at night. "I need the birds of the night to watch over the people throughout the night. You will be up all night." Then he gave the other birds the chore of being the ones to relieve these birds of the night. They would rise early in order that the others can rest and they will take over from there the rest of that day. That is why they are already up before the suns up; the birds are already doing their work. So the birds are up twenty-four hours. You've got some during the day, then the night birds take over.

Everything that we do is built around plants and animals. Everything that we do, the medicine way, it's all built around Mother Nature.

HOW THE MVSKOKE GOT THEIR MAIN MEDICINES

Long ago, there was a great Holy Man who lived some distance from a tribal town of our people, it is said that the people did not know where he came from, nor did they inquire. This Holy Man, they say, was very powerful for he could make people well by touching them with his hands.

It was the custom of the Mvskoke people to meet the needs of their holy men. They would bring food, till or care for his garden, repair or build his house. Whatever he needed to be done, it was the duty of the people to take care of the Holy Man. This was done out of love and great respect.

One day as he was passing through the village he noticed a young boy. The Holy Man had seen that this boy was mistreated and was kind of an outcast. He also knew that this boy was the kind of person that could learn the sacred ways that the Holy Man must pass on. So the Old Man took the boy to teach him the medicine ways and the sacred ways.

The Holy Man said: “I have seen the purity of your heart and know you will keep the sacred ways of healing and not misuse the power which I have given you. For every healing chant shown to the chosen one, he is also shown a destructive word. There will be others selected just as I have selected you. The time is coming when you too will select a sole replacement to carry on the sacred way for your people.”

The boy said: “Will the sole replacement be a boy or a girl?”

The Holy Man responded: “You know not if it is going to be a boy or girl, but the medicine people will know by a sign if the child can be selected.”

The Young Man asked: “Why do I have to look for a sign to select my replacement?”

The Holy Man said: “So you will know the future of that child, what that person will be like until he dies. You will be shown what you need to use so the child will learn and not forget.”

The boy made a comment: “With all the power that you have, will I have the same kind of power that enabled you to heal?”

The Holy Man said: “You will be able to do the things that are provided for you. In your dreams, you will be told the type of medicine and the chants and how to use them.”

The boy had in his mind that he would have the power the Holy Man had. That is why the Holy Man had to keep telling him, bringing him back to nature. The boy was not going to have his power. He would need the help of the plants and animals.

The Holy Man just slowly turned to him and answered him: “Be patient. All things the chosen people will ever need to know to carry on after I’m gone have been laid out for all the medicine people to follow. The chosen people will have a choice of selecting their helpers (carriers), but the helpers will be limited to what the chosen ones will be willing to give and share with them. Carriers will not be given the origin of the medicine way, will not see new cures in visions but must maintain a strict disciplined way of life for the good of their people.”

The Holy Man continued: “The medicine people will not have the power to heal by touch. Only I have been given that power. The medicine people will use what is shown in their dreams and visions and what has been put on this Mother Earth for them to use. All of their words will be

built around three things which will always be here: human beings, animals, and plants. The sacred words are to have a sound of nature such as the sound of the wind or the cry of an animal.”

And he said: “I have shown and taught you all the things you will need to help your people now and I will show you the new cures of the future in time. Be prepared to receive my instructions at all times, just as all medicine people must follow more instructions in the future.”

The Holy Man noticed that the young man was curious why they always went to that certain place. The Holy Man said: “You have been wondering about this place for some time so I’ll tell you why we meet here. This is a sacred ground and negative energies cannot come within the boundary of the four sacred poles in the ground. All selected medicine people will also have a sacred ground. All negative things are blocked out within that square. Within this square you will be able to communicate with me. This is where you will purify the sacred words and strengthen them. This is where you will strengthen your body and your mind in order to be prepared to receive any instruction which I might give at any time.

“There will be a time when medicine people will find their mate and this is where they will unite. All the negative things will be left out. Within this square, there will be a circle, enough space for the two to step in and once both step in, they put their medicine down and close the circle. When they close the circle, everything they have done, good or bad, is locked in the circle. Everything else is locked out. Each has the power to remove the past from the other, just these two. Each one of them will have a feather. The woman will put one in the man’s hair and she will remove all the things of yesterday. The man does the same thing. In case there’s a time when this woman cannot bear a child for him to carry on, he would have the right to choose another mate, but once they have been in that circle that woman will live with him the rest of their lives.”

The Holy Man showed and taught him about the sacred ground. The young man was told to make one. So the Holy Man told the young man he was to go fast four days at his sacred ground and then come back to him and he would tell him more things. The boy told him: “I will get sacred words that you keep holy will take care of you. When you are sleepy, the words are your sleep. Whenever you are hungry, that is your bread. Whenever you are thirsty, that is your water. This is why you keep these words sacred and they will take care of you in time of need.”

The Holy Man said to the young man: “You know the purpose of a sacred ground. You purify the sacred word, strengthen your body and mind. Keep in mind, when problems arise and there seem to be no answers, come and communicate with me and get some of your answers to your problems. There is one more thing I must ask you to do. You must go and build you a sweat house as near as possible to a running water. This will be a place only chosen medicine person will be able to use. You will be shown the things that are to be used and the sacred words to use in preparing for sweat. In this sweat house you will expel impurity from within in form of water.

As you sit and sweat you must also sing the sacred song you have learned. As you sing, these sacred words will be washed and purified. When you have finished what you have been instructed to do, you will quickly go to the running water and wash off the impurity that has been expelled from within in form of water. I asked you to build a sweat as near as possible to running water for an important reason. You must never let the sweat on your body dry on you. The water will carry away all your impurity of your body.”

The time came when the Old Man said that he had to go away. And so, the time came when one last time they would sit and talk like they had done many times before. The Old Man recounted many things to the boy and what he must do. The Old Man was sitting where he always sat when he would tell the boy of good things, even funny things, but most of all, very serious sacred teachings. He said that if the boy was troubled at any time, he should remember that the Old Man would always be with him and to come back to where they sat and talked, and he would find the answer there and everything would be all right. This was very sad for the Old Man, but he was happy also for he had taught the boy and had someone to take his place.

Now it was necessary for him to leave, for his work was done. As their day together came to an end, the birds and the little things that make noises seemed to sound very lonesome. The Old Man bowed his head and began to cry and as he shed great tears, they fell to the ground and became a pool of tears. The Old Man held up his hand to the east and said: “This is the Blood of Life.” The blood fell to the ground and made a small pool. His life was on the ground in tears and blood; only a great love and sadness would make this happen. Now he must leave. They said goodbye and the Holy Man left. The boy wanted to go with him so he ran after him, but could not find him. He tried to find his tracks but the Old Man left none. He disappeared.

Days went by and the boy helped the people with his powers and shared many sacred ways with them. One day the people became ill with a very bad illness. The boy tried to heal them by touching them with his hands. This did not work. The people became increasingly ill. The boy became very troubled and remembered what the Holy Man had told him, so he returned to the place where the Old Man had lived and to the place where they had sat when the Old Man went away. The old place was still familiar, recalling old times. The boy felt the Old Man was still there. But there was something different about the place where they had sat, for there were two bushes in front of the place where the Old Man had sat. The boy immediately knew that these plants were sacred medicines, for one bush grew from the place where his blood had fallen to the ground.

When placed in water, the roots of the bush that grew from the blood made the water red in color. Water remained clear or white when the roots of the bush that grew from the tears were placed in it. The boy knew that the Old Man was with him as he had said, for in his spirit he knew he was to use these sacred plants. He prepared himself and the medicines. He then took the medicines and cured the people of the great illness. To this very day these medicines remain sacred and are used by the Mvskoke people.

The name by which the Holy Man was called was because he was a great Holy Man and passed through the tribal towns of the people and lived a distance from them. His name was Mekko-hoyvnecv or “King passing through.” The bush or the roots that grew from his blood is called by the same name today and is commonly known to the Mvskoke people as “red root.”

The sacred bush and its roots that grew from the Holy Man’s tears is called Heles-hvtke or “white medicine.” This medicine is known to non-Indians as American ginseng.

THE STORY OF THE GATHERING

This young man had a dream. In this dream he was told that there would be a big gathering, that he would be surrounded by many, and he was told that he would be given instructions that he would follow. The dream did not mention whether the many would be men. The young man thought it would be people.

When he woke up the next morning, he thought it was very strange dream that he had had. And he said: “Where will all these people come from? Where will the gathering take place and why are they going to gather?” Those are things that he was thinking about at that time. It was just a dream.

The time came for him to do his annual fast and sweat. When he got to his sacred ground, there was something that wasn’t just right. He sensed that there was something strange about that day. He sat down and he was hearing all the little night creatures, the birds and crickets. He was hearing these little night creatures during the day. That’s why he said: “This is strange, very strange.” Then he looked up and he saw the birds flying over, circling. That was unusual for some of the birds were too far from the water. And he thought about that a while. He said: “That’s very strange, the birds circling and these little night creatures chirping and singing during the day.”

Then it hit him. “This is the day that I had the dream about that there would be a gathering.” Then he looked up to the sky and told the Creator: “Now I know that this is the day that the gathering is to take place. I am ready for the instructions and I will obey.” When the sun was getting high, he was looking for the people but he didn’t see anybody. Then the sun was getting low and he was still thinking of people because he looked around and said: “Where are all these people? They should be getting here.” He didn’t know where they were to come from. Then he thought maybe he was wrong. Maybe it was not the day of the gathering. Then the breeze in his face and breeze that was coming through the trees; it was almost as if it were singing. There was almost a song in the wind, in the breeze. Then he said: “It’s not people the dream was talking about.” He said: “All of these things that are around me, the plants and all, these are the things the dream was telling me when it said that I would be surrounded by many.” And then he repeated: “Whatever instruction is to be given, I am ready.”

All the medicine people that go to a sacred ground, they use medicine there and then they settle down. He had already used his medicine so he was ready for anything; he was ready for any instructions to be given and he would obey. Well, that's when he heard the voice. He knew the voice was the trees, the plants, whispering to him. "You can go to a place a lot faster than we can. We are permanent. But in time, when you need us, you will also find us there. We'll also be there." (That is why the plants that were here before, next time you see the plants they're in another place. If you ever need them the plants will begin to grow there too.) And there was a pact made then.

The whisper he heard said: "You have the power. You were given the power to heal with sacred words. We also have been given the power to heal. We are equal; we have the same power you have. The medicine people and the plants working together, we will be able to cure people. We will make a pact with you." The young man answered that he would accept the pact. The voice gave him the words to a chant. "These words you will use and we will listen to you. These words will be used before you remove us from this mother Earth. You meet us halfway and we will meet you halfway. These are the sacred words you will say to us and when you use them, we will listen to what you say and then you have the power to remove us from this Mother Earth." With that permission, the plant was saying that we will meet you halfway and we will listen.

And the young man answered; "I will follow your instructions. I will use these sacred words before I ever remove you from this Mother Earth. I too will meet you halfway and we will work together to cure our people."

And so the plants answered back and said: "From this day on, all the medicine people will be known as the keepers of the plants."

So this is how it is going to be. All the medicine people will be keepers of the plants. The actual words of the chant that they use before removing plants were given to that man. Most of the time medicine people are shown what to do through vision, but this time the plants said this. This is the only time a plant gave instructions to a human being.

It started when that Holy Man made a selection. He taught the boy about the plants. He was really prophesying about a lot of things. The prophecy was that the plants were going to be used: You will be shown what plants to use in your visions. You will watch the tree from seeding to maturity and then it will get old and die right before your eyes. You will also be shown the sickness, the symptoms of particular sicknesses. These will be the plants that you will use. Then you will be given the sacred words to use for each sickness. In other words, you will be shown the plants, the symptoms, and the chants at the last.

In books, it always says this was learned by trial and error. There was no trial and error for the old people. They already knew exactly what they were going to use.

Muscogee Authors & Artisans

Section 1 - Authors

ALEXANDER POSEY (1873-1908)

Early Life – Alexander Posey was born on August 3, 1873, near Eufaula, Oklahoma. He was the oldest of twelve children. His parents were Lewis Hence Posey, who was Scots-Irish, and Nancy Phillips Posey (Creek name Pohas Harjo), who was Muscogee Creek. Posey was a Wind Clan member of Tuskegee.

Although Posey’s father was born to European-American parents, he called himself Creek. Lewis H. Posey was raised in the Creek Nation and he spoke the Muscogee language. He was a member of the Broken Arrow tribal town. When Alexander Posey was fourteen, his father only let him speak English and punished him if he spoke in his native language.

Career – Posey went to college, including three years at Bacone Indian University in Muskogee, Oklahoma where he studied writing. He read books by John Burroughs and Henry David Thoreau, who inspired him to write about the landscape of his childhood.

Posey worked at the *Indian Journal*, where he published poems. In 1895, he became a member of the Creek National Council. He was also the director of the Creek Orphanage. In 1901, Posey edited the journal *Eufaula Indian Journal* and received national recognition for founding the first Indian-published daily newspaper. Posey was secretary for the Sequoyah Constitutional Convention in 1906. According to the Encyclopedia of Oklahoma, he is credited with having written most of that constitution. Posey was also superintendent of the school at Wetumka mission.

Posey created a fictional person by the name of Fus Fixico, Muscogee Creek for “Heartless Bird”. Fus Fixico’s wrote letters which were published in the *Indian Journal*. He was a full blood Muscogee traditionalist. He wrote letters about his everyday life or detailed accounts that he had heard from the fictional Muscogee medicine man Hotgun. These stories are written in the Creek language.

The Fus Fixico letters talk about Muscogee Nation, Indian Territory and United States politics. This was a time of big political change. The Curtis Act of 1898 destroyed tribes, paving the way for Indian Territory to become the state of Oklahoma. Experienced politicians from the Five Civilized Tribes attempted to create an indigenous-controlled State of Sequoyah, but their proposals were rejected by the US Federal Government.

Posey served as secretary for the 1905 State of Sequoyah convention. His Fus Fixico letters poked fun of the statehood debate. Various U.S. newspapers proposed printing the Fus Fixico letters nationwide, but Posey refused. His readers were in Indian Territory, and he didn’t believe a non-Native audience would understand the humor.

Alexander Posey and a friend tried to cross the North Canadian River on April 28, 1908. He drowned in the flooded river at the age of 34. He is buried at the Greenhill Cemetery in Muskogee, OK.

MARCELLUS “BEAR HEART” WILLIAMS (1918-2008)

Marcellus Williams was born in Okemah, OK into the Muscogee (Creek) Nation Tribe. He was the author of *The Wind Is My Mother*, Random House, which is now published in 14 languages. One of the last traditionally trained "medicine persons", Bear Heart, who speaks in 13 native languages, was also an American Baptist Minister and holds an honorary PhD in humanities. He served for 7 years as a member of the advisory board for the Institute of Public Health - Native American and Alaskan Natives at Johns Hopkin's School of Medicine.

Significant to Bear Heart are the lives he has touched. He prayed with the firefighters at Ground Zero in New York City in November 2001, gave advice to rescue workers and their families after the Oklahoma City tragedy and once met with President Truman.

“Traditionally the chief was the poorest man in the tribe. If he went on a hunt and brought back a lot of game, he gave it to widows who could not hunt for themselves. He was there to serve the people and he did it without resentment, with a sense of duty. When people lined up to eat, the chief stayed in the back and let others eat first. You don’t see that today-the leadership is always the first to eat. I’m not saying we must return to the old way, but it was a way of life that supported the beliefs and respect of the people.”

JEAN CHAUDHURI (1937-1997)

Ella Jean Hill-Chaudhuri or Hiyvtke (early dawn in Muscogee) a member of the Muscogee (Creek) Nation and Bear Clan, was born in 1937 and grew up in Okemah, OK. Jean Chaudhuri learned Muscogee (Creek) values from James Scott, her grandfather, who walked the Trail of Tears as a young boy. He was the only member of his family to survive the journey to new Indian Territory. “She grew up knowing the ceremonial grounds lifestyle and those old stories from James Scott”, said her son Jon Chaudhuri. Other members of their family attended church, which she also found interesting.

Jean fought alongside her parents for the Indians right to elect their own officials among their people, instead of the U.S. Government choosing for them. She moved to Arizona in 1972 where she became the Executive Director of the Tucson Indian Center and Director of the Traditional Indian Alliance. The Center assisted in service programs for Native Americans in the Tucson area. She was also the founder of the first off-reservation Indian Health clinic in Tucson.

As founder and President of the Arizona Indian Women in Progress (IWP), Jean built a network of Indian women on and off the reservation that influenced issues of Native American cultural survival in education and the arts. During the 500th anniversary of Christopher Columbus, she wrote and produced a musical, “Indians Discover Christopher Columbus,” a comedy about his misadventures and the welcoming spirit of the American Indian. Jean was a traditional Indian storyteller and spoke at many public meetings on the importance of Native American cultural heritage, the traditions of tribal peoples.

In 1986 she founded and co-chaired the Native American Heritage Preservation Coalition. She worked to educate community and governmental leaders about the importance of honoring the legacy of the Phoenix Indian School, where Indian children learned to read, write and adapt into American culture for 100+ years. In 1992, she and her group worked especially hard to prevent the construction of commercial buildings and high rise condos on the Indian School land. Through her leadership and the work of many others, a part of the Indian School land was preserved for public use.

Jean co-authored *A Sacred Path: the Way of the Muscogee Creeks* with her husband, Joy Chaudhuri. For her work in Tucson, in 1977 she received the American Institute of Public Service's Jefferson Medal at a ceremony in the U.S. Supreme Court Building in Washington, D.C.

Jean died in 1997 at the age of 59. In 2000, after her death, she was given the Outstanding Native American Leader Award and in 2003, the Dr. Martin Luther King Living the Dream Award.

BILLIE JANE MCINTOSH

Billie Jane McIntosh is a Muscogee (Creek) who currently resides in Flagstaff, Ariz. She was born in Okmulgee and went on to earn a bachelor's degree in editorial journalism from the University of Tulsa. She also attended the University of Arizona. As a young mother, McIntosh had a thirst for writing but she put that aside while she raised her four children and later went back to quench her literary palette. "I began thinking about writing when I was 22, after I married and began asking question (about her heritage)", explained McIntosh. A compulsion to give back to the tribe, its people and her own children helped drive McIntosh through the obstacles of tiring research and exhausting travel. McIntosh related a hope that people today can take away from her books, an understanding of how much tribal leaders have contributed to the present world we all enjoy. She also agreed that the writing of these books was somewhat of a therapeutic process for her. After growing up in a time when it was less than desirable to be of Native decent, McIntosh found comfort in exploring her heritage and sharing it with others. Her latest publication is based on the life of her great-great grandfather, Chilly McIntosh. Titled '*From Georgia Tragedy to Oklahoma Frontier – A Biography of Scots Creek Indian Chief Chilly McIntosh*', it has been called "expertly woven" in reviews. This book, rich in the history of the McIntosh's ancestors and the Creek people, follows Chilly McIntosh through the different roles he filled while defining a young Muscogee (Creek) Nation and laying foundations for what the tribe is today. Her other published work is '*Ah-Ko-Kee, American Sovereign*' and she completed a screenplay about a Native American family 200 years ago that is currently being marketed.

CYNTHIA LEITICH SMITH

Cynthia Leitich Smith is the bestselling author of several books for young readers, including *Jingle Dancer*, *Indian Shoes*, *Rain Is Not My Indian Name*, the Tantalize series and the Feral series.

She grew up an only child in the Kansas City area and regularly visited her family in Oklahoma. She is a member of the Muscogee (Creek) Nation through her great-grandfather's family. He was in the U.S. Air Force and passed away the year she was born, but she came to know him through stories. She began writing poetry in elementary school and entered many school competitions but never won or placed. She didn't give up. In sixth grade, she had a column called *Dear Gabby*, offering advice and encouragement to her classmates. Cynthia went on to become editor of her junior high and high school newspapers.

She majored in journalism (news/editorial and public relations) at the University of Kansas and earned a law degree at The University of Michigan Law School, where she co-founded a gender-rights law journal, *The Michigan Journal of Gender and Law*, and served as president of the Native American Law Students Association.

While in college and law school, Cynthia completed internships at small-town newspapers, *The Dallas Morning News*, *The Detroit Legal News*, Hallmark Cards in Kansas City, Phillip's Petroleum in Bartlesville, the Muscular Dystrophy Association in Topeka and the Legal Aid Society of Hawaii. Her initial career goal was to become a newspaper reporter, a professor at journalism school or law school. However, after the Oklahoma City bombing, she resigned from the Office of Health and Human Services in Chicago to write full-time for kids and teens.

JENNIFER ELISE FOERSTER

Muscogee (Creek) Nation citizen Jennifer Elise Foerster was on the shortlist for one of the world's most prestigious prizes in literature. She was a contender in the PEN Literary Awards' \$5,000 Open Book prize for her poetry anthology *Leaving Tulsa*. Besides her Muscogee (Creek) heritage, Foerster is of Dutch and German descent. Jennifer grew up attending international schools in Europe – her father was a diplomat for the U.S. Air Force – and spending summers in Tulsa, Oklahoma, with her grandmother. The dual upbringing is reflected by and enhances her work, reviewers noted. "*Leaving Tulsa* scorches the boundaries of time, place, and self as the speaker both explores and challenges her Muscogee and European heritage within a contested America," wrote the Missouri Review.

Jennifer Elise Foerster received her MFA in Writing from Vermont College of Fine Arts (July 2007) and her BFA from the Institute of American Indian Arts in Santa Fe, New Mexico (2003). She has received fellowships to attend Soul Mountain Retreat, the Naropa Summer Writing Program, the Idyllwild Summer Poetry Program, Dorland Mountain Arts Colony, and the Vermont Studio Center. From 2008-2010, Jennifer was a Wallace Stegner Fellow in Poetry at Stanford University. Jennifer now lives in San Francisco.

Muscogee Authors & Artisans

Section 2 - Artists

CHEBON DACON

Chebon Dacon (Chee-bon Day-cun) accepted a scholarship offer from the University of Oklahoma in April 1965. He was co-captain of a squad in the 1965 All-State football game. But while playing in that game, he suffered a knee injury. He underwent surgery, attempted a comeback and hurt his other knee. "I went from the quickest to the slowest," Dacon said. "I tried to hang on another year or so, but it finally just took its toll on me." That was the end of Dacon's football career.

An accomplished ceremonial dancer, Dacon said he could dance pretty good when he was young, never mind the knee injuries. So, he danced at powwows and rode bareback horses at all-Indian rodeos, and also set up tables to sell his artwork. He went from show to show and built a career as an artist who specializes in Native and Western art. "I just kept drawing cowboys and Indians because that's where my heart was," said Dacon, who has a gallery in Mountain Home, Arkansas.

JOAN HILL

Joan Hill, also known as Che-se-quah, is a Muscogee Creek-Cherokee artists. She is one of the most awarded women artists in the Native American art world. She was born in Muskogee, OK in 1930. She was named Che-se-quah, Muscogee for "Redbird", after her great-grandfather, Redbird Harris.

Hill attended Bacone College. In 1952, she received her BA degree in Education from Northeastern State University of Tahlequah, OK in 1952. In 1953, Hill took the Famous Artists Course. She was a public art teacher for four years before becoming a full-time artist.

She has received more than 290 awards from countries including Great Britain and Italy. Other honors include over 20 Grand Awards, and the Waite Phillips Artist Trophy. In addition, Hill was the winner of a prestigious mural competition at the Daybreak Star Performing Arts Center from the Seattle Arts Commission in Washington. In 1974, Hill was given the title "Master Artist" by the Five Civilized Tribes Museum in Muskogee. Over 110 of her works are in permanent collections, including the Sequoyah National Research Center in Little Rock, Arkansas, the United States Department of Interior Museums of the Indian Arts and Crafts Board, Washington, D.C. and the Smithsonian Museum of the American Indian, New York City. In 2000, Hill was the "Honored One" of the Red Earth Festival in Oklahoma City, Oklahoma.

Hill is known most for her acrylic paintings which use colors of neutrals, oranges, reds and purples. She also works in watercolors, especially when painting landscapes and nature. She mainly paints Creek and Cherokee women and frequently paints the nude figure.

JEROME TIGER (1941-1967)

Jerome Richard Tiger was a Native American painter from Oklahoma. Tiger produced hundreds of paintings from 1962 until his death in 1967.

A full blood Muscogee Creek-Seminole, Tiger's style is said to combine "spiritual vision, human understanding and technical virtuosity" but with traditional subject matter and composition. His paintings first gained recognition at the Philbrook Museum of Art.

Born in Tahlequah, Oklahoma on July 8, 1941, Tiger attended public schools in Eufaula and Muskogee. English was not his first language. Dropping out of high school at the age of 16, Tiger joined the United States Navy and served in the Naval Reserve from 1958 to 1960.

In 1962, a friend encouraged Tiger to submit his paintings to the American Indian Artists Annual at the Philbrook Museum of Art in Tulsa, Oklahoma. He began to produce a number of paintings over the next several years, winning numerous awards. In 1965, the Philbrook Museum of Art displayed a solo exhibit of Tiger's art.

Tiger was compared to Rembrandt and Francisco Goya because of his ability to draw an object or person after a short glance. He worked in oil, watercolor, tempera, casein, pencil, pen and ink.

His art can be found at the Philbrook and Gilcrease Museums in Tulsa, the OSU Museum of Art in Stillwater, the Five Civilized Tribes Museum in Muskogee, the Wolaroc Museum near Bartlesville, the Museum of New Mexico in Santa Fe, New Mexico, the Smithsonian National Museum of the American Indian in Washington DC and the Bureau of Indian Affairs.

**DANA TIGER**

Dana Tiger is an award winning, nationally acclaimed artist. She is a member of the Muscogee (Creek) Nation and is of Creek/Seminole/Cherokee descent. Dana was just five years old when her father, legendary artist Jerome Tiger, passed away. She turned to his art as a way to know him and that engagement, coupled with the tutelage of her uncle, renowned painter Johnny Tiger Jr., exposed Dana both to the richness of her Native American culture and to the bounty of her family's artistic tradition.

Best known for her watercolors and acrylic paintings depicting the strength and determination of Native American women, Dana's paintings now hang in galleries, universities, Native American institutions and state buildings nationwide. She has won numerous awards and art competitions including the Five Tribes Masters Art Show, the Cherokee National Holiday Art Competition and the Creek Nation Artist of the Year

Award. In recognition of her accomplishments as an artist as well as an activist and community leader, Dana was inducted into the Oklahoma Women’s Hall of Fame in 2001.

Dana and her husband, Donnie Blair, run the Tiger Art Gallery in Muskogee, Oklahoma, and have two children, Christie and Lisan, also gifted artists. In 2002, Dana founded the non-profit Legacy Cultural Learning Community, dedicated to nurturing Native youth via the celebration and sharing of tribal languages and culture through the arts.

DAN BROOK

Muscogee-Creek Native American artist Dan Brook was born in ranch life in the Creek Nation of Oklahoma. Memories of his father, a second-generation rancher and Indian cowboy, and his vivid tales of turn of the century ranch life are preserved in Brook’s mind. The fellow Native playmates of his childhood, the cowboys and neighboring farmers, themselves descendants of early pioneers of Indian Territory, have provided a rich tapestry of images, culture and history for the artist to draw upon. The isolation of rural ranch life provided long hours of sketching, which continues to this day, in sessions in his studio. In the fourth grade, he entered a youth art show. The judges refused to believe that he had not traced the pen and ink drawing.

The artist attended Baylor University on a football scholarship. Upon graduation, Brook studied art in the old-world tradition of apprenticeship, with renowned portrait sculptor, Dr. B.N. Walker. It was then that the artist’s God-given talents were combined with the techniques of the old masters. It seems only fitting that one of Brook’s early commissions was a portrait of the Creek Nations’ great chief, Claude A. Cox, now placed in the tribal capitol. He has since done several busts of famous native leaders.

Twenty five years later, Brook continues his exploration of sculpture, recently completing the Trail of Tears monument in Tulsa, Oklahoma. One of the few sculptors that create in both figurative and contemporary styles, the artist is a master in bronze, terra cotta and lucite. His work has been collected in public and private sectors in the United States. His reputation has now crossed the ocean, as he has been commissioned to create works in the Middle East and Europe. Dan Brook has successfully completed 18 large scale relief sculptures for Texas Christian University's new football stadium. The artist happily lives and works in Dallas, Texas.

SANDY FIFE WILSON

Sandy Fife Wilson was introduced to art at a young age, her mother was an artist and teacher. She attended the Indian Art Teachers program on the same campus Sandy attended high school in Santa Fe, New Mexico. Her grandfather carved in wood and stone. She never knew him, but his canes are still used by

the deacons at Thewarle Indian Baptist Church. Her mother showed her how to get clay from the pasture and prepare it for pottery making, how to fingerweave and how to paint in various media, sewing and needlework.

She attended high school at the Institute of American Indian Arts in Santa Fe, New Mexico. While there she took painting, printmaking, jewelry, and traditional techniques. She was chosen to demonstrate her art at the Wichita Art Museum, Wichita, Kansas. After graduating in 1969, she was chosen along with several other alumni to exhibit and demonstrate art at Woodstock Art and Music Festival in upstate New York. She earned her degree from NSU in art and education and taught art at Dewey Public School for two years. She eventually returned to IAIA as a traditional techniques instructor. She taught weaving, leather work, beadwork, and other traditional techniques and fashions. Her family ties led her back to Oklahoma where she taught at Chilocco Indian School. After Chilocco she took a teaching position in Morris, OK.

Her parents stressed the importance of education. Since retirement, she has continued her education at the College of the Muscogee Nation. She has completed classes in Shell Carving, Creek Pottery, Flute Making and Mvskoke Hymns I and II. She has also learned to make the traditional Creek cane baskets and how to split and trim river cane.

MARY SMITH

Mary Edwards Smith was born in Broken Arrow, Oklahoma. She has a rich family history of Muscogee Creek leaders with roots in Tuckabatchee (Alabama). She is known for her beautiful river cane weaving. In addition to basketry, Mary's talent lie in pottery, beading, leather work, feather work, textiles (finger weaving and twinning), and stained glass. She graciously shares her knowledge with others through demonstrations and teaching. She has received numerous awards and recognition in these art forms. Her most recent accomplishments are; 2016 *Mvskoke Women's Leadership Award – Artist of the Year* and the 2016 *Council House Art Market – Best Mvskoke Artist*.

In 2005, she revived the double false braid rim technique. This rimming method is unique to Creek baskets and had not been done for 100-150 years. In 2009, Mary was elected to the Creek Council House Board of Trustees. She was chosen by the Muscogee (Creek) Nation to exhibit her art at the National Museum of the American Indian, Washington, D.C. during the *Mvskoke Etlwv*, both in 2012 and 2014. She is included in the Oklahoma Native Artist Oral History Project, Oklahoma State University.

Muscogee

Authors & Artisans

Section 3 – Musicians & Actors

WILL SAMPSON (1933-1987)

Will Sampson was an American actor and artist. Sampson, a Native American Muscogee (Creek), was born in Okmulgee, Oklahoma. He was given the Muscogee name Kvs-Kvna, meaning left-handed. He was known to his family as Sonny Sampson. He began painting as a child and then met large success in the art world as an adult. His paintings and sketches of Western and traditional Native themes are distributed across the United States in the Smithsonian Institute, the Denver Art Gallery, the Gilcrease Institute, the Philbrook Art Museum in Tulsa, Oklahoma, the Creek Council House in Okmulgee, Oklahoma and in private collections. Art was his first love, he became an actor by happenstance while in Yakima, Washington, painting and sketching the local scenery.

He was cast in *One Flew Over the Cuckoo's Nest* in 1975, as the mute Indian. The film won five Academy Awards and earned Sampson critical praise. Sampson's other notable roles were as "Taylor the Medicine Man" in the horror film *Poltergeist II*. He had a recurring role on the TV series *Vega\$*, as Harlon Two Leaf and starred in the movies *Fish Hawk*, *The Outlaw Josey Wales*, and *Orca*. Sampson is largely credited with becoming the first Native American actor to break out of demeaning and stereotypical Indian roles. He was nominated for "Best Performance by a Foreign Actor" Genie award for *Fish Hawk* in 1980.

Sampson appeared in the production of *Black Elk Speaks* with the American Indian Theater Company in Tulsa, Oklahoma. In 1983, Sampson became a founding member of the American Indian Registry for the Performing Arts, which helped American Indian performers and technicians get work, and which pushed for cultural accuracy in scripts in the last decades of the 20th century. Will Sampson died on June 3, 1987 after a heart and lung transplant. He was 53 years old. He is buried at Graves Creek Cemetery in Hitchita, Oklahoma.

**JOY HARJO**

Joy Harjo was born in Tulsa, Oklahoma and is a member of the Muscogee (Creek) Nation. She has released four award-winning CD's of original music and won a Native American Music Award (NAMMY) for *Best Female Artist of the Year*. She performs nationally and internationally solo and with her band, The Arrow Dynamics.

She has appeared on *HBO's Def Poetry Jam*, in venues in every major U.S. city and internationally. Most recently she performed *We Were There When Jazz Was Invented* at the Chan Centre at UBC in Vancouver, BC, and appeared at the *San Miguel Writer's Conference* in San Miguel de Allende, Mexico. Her one-woman show, *Wings of Night Sky, Wings of Morning Light*, which features guitarist Larry Mitchell premiered in Los Angeles in 2009, with recent performances at Joe's Pub in New York City, LaJolla Playhouse as part of the Native Voices at the Autry, and the University of British Columbia.

Her seven books of poetry include such well-known titles as *How We Became Human- New and Selected Poems* and *She Had Some Horses*. Her awards include the *New Mexico Governor's Award for Excellence in the Arts*, the *Lifetime Achievement Award from the Native Writers Circle of the Americas*, and the *William Carlos Williams Award from the Poetry Society of America*. She was recently awarded *2011 Artist of the Year from the Mvskoke Women's Leadership Initiative*, and a *Rasmuson US Artists Fellowship*.

She is a founding board member of the *Native Arts and Cultures Foundation*. *Soul Talk, Song Language, Conversations with Joy Harjo* was recently released from Wesleyan University Press. *Crazy Brave*, a memoir is her newest publication from W.W. Norton, and a new album of music is being produced by the drummer/producer Barrett Martin. She is at work on a new show, commissioned by the Public Theater: *We Were There When Jazz Was Invented*, a musical story that proves southeastern indigenous tribes are part of the origins of American music. She just accepted a tenured professor position at the University of Illinois, Urbana-Champaign. She lives in Oklahoma.

NELSON HARJO

Nelson Harjo was born in Weleetka, Oklahoma. He now lives in the Wilson community just north of Henryetta, Oklahoma. In 1982, he married Georgia Burgess and together they have two sons, Nelson and Julian and one grandson Jaice.

He is of the Muscogee (Creek) people and belongs to the Alabama Tribal Town. He is also a headman at a sweat lodge. Mr. Nelson currently serves as Chairman of the Citizenship Board for the Creek Tribe and has taught at the College of the Muscogee Nation for three years and served as a Methodist minister.

Mr. Harjo specializes in making Native American flutes and has taught others how to make them at several camps throughout the United States for the past fifteen years. He made his first traditional flute in 1995 and it took him five years to perfect the process. His ancestors used Alabama river cane, but he uses bamboo because Oklahoma has plenty of it. It can take him only one hour to complete a flute. His flutes have been sold around the world including, Germany, Sweden, Australia, France, England, Italy. He also has given many as gifts to dignitaries.

Harjo now has two recordings that are available on CD. He was given the honor to play at the North American Native American Smithsonian Museum in Washington, D.C. during the Mvskoke Etlwv Festival. His flute playing can also be heard on local television commercials for the Muscogee (Creek) Nation.

Veterans Affairs

VETERANS AFFAIRS

Funding for the Muscogee Veteran's Affairs department and construction of the special building was approved in early 2006 with firm support from Chief A.D. Ellis and, now director, Mr. Ken Davis (Marine Veteran). The construction of the building was completed in 2007 and the Veterans Affairs Administration moved in September 1, 2007.

The Muscogee (Creek) Nation Veterans vests are issued to citizens of the tribe who are retired from the military or left with an honorable discharge. Started in 2006 the Veterans Affairs office has issued more than 700 vests to date. These are the vest colors for each branch of the military:

- U.S. Coast Guard – White
- U.S. Navy – Gray
- U.S. Army – Green
- U.S. Air Force – Blue
- U.S. Marine Corps – Red

VETERANS AFFAIRS SEAL

The Words on the seal: “MUSKOGEE SULETAWYLKE ESTOFIS EKVNV HOMVN SAPAKLEARES” meaning “Muscogee Soldiers- Always have been – Always will be.” The words represent our soldiers who have always been there to fight, not only for America but for our Native people and our lands.

The 10 stars: Represent the different wars our veterans have fought in and continue to fight in today. Starting with the War of 1812 (also known as the Redstick War), Civil War, where many Creeks fought on both sides, World War I, World War II, Korea, Vietnam War, Panama, Kuwait, Afghanistan and Iraq.

The Red Eagle and the Pentagon: In the Center of the seal there is a red eagle that symbolizes our Native people, and behind the red eagle there is a pentagon that represents the Veterans Affairs building, a monument of the Muscogee Veterans and the only pentagon shaped building west of the Mississippi River.

The Crossed Weapons, the Cross and the Fire: In honor of our ancestral warriors, there is the Crossed Weapons at the top center of the seal. To the left and right of the eagle is a Cross and Fire, the Cross represents the Native people who follow the Christian faith and the Fire represents the Native people who follow the traditional ways or the ceremonial way of life.

Note The four traditional war colors are blue, white, black and red (note the colors are on the top of the Veterans building). These colors represent the lifestyle of a warrior. They are as follows:

Blue: Back to the Creator
 White: Peace
 Black: Death
 Red: War

MVSKOKE NATION HONOR GUARD**MVSKOKE NATION HONOR GUARD**

In 1993, a group of Mvskoke veterans formed the “Este Cate Veterans” which developed into the Mvskoke Nation Honor Guard. The Honor Guard was formally established and recognized in 1995 and consists of veterans from all branches of the military. The Mvskoke Nation Honor Guard assembles to give military honors to our veterans who have passed on without receiving proper military respect and honors. Since being established, our Honor Guard has been uninterrupted in their ability to render honors. They proudly come together in representation and honor of our tribe, our veterans and Mvskoke people. The Mvskoke Nation Honor Guard is considered the premier Honor Guard in the state of Oklahoma.

Died of Wounds in Action***

Notable Muscogee Veterans

ERNEST CHILDERS (1918-2005)

Ernest Childers passed away on Thursday, March 17 at the age of 87. Childers was the only member of the tribe to ever receive the Congressional Medal of Honor and only one of five Native Americans to be recognized with such distinction. Childers’ heroic actions came as a young soldier in World War II. “Oklahoma has lost a genuine hero with the passing of Lt. Col. Ernest Childers,” said Oklahoma Governor Brad Henry. “His life was and is a true inspiration.”

Ernest Childers was born on February 1, 1918 in Broken Arrow, Oklahoma. He grew up on a farm that was part of his father’s original Creek allotment. Childers grew up in a Christian home, attending church at Springtown Indian Church about ten miles north of Coweta. In high school, he attended Chilocco Indian School.

Childers, as well as other Indian students, sought ways to better themselves financially and saw joining the Oklahoma National Guard as that opportunity. The Indian boys at Chilocco had their own group, Company C, or Charlie Company of the 45th Infantry division. ‘The Fighting Thunderbirds’ was the division’s nickname. These Indian boys would become part of a unique fighting group. Upon the liberation of Sicily in WW II, General George S. Patton would pay them the ultimate honor. “Born at sea, baptized in blood, your fame will never die. You are one of the best, if not the best division in the history of American arms.”

For conspicuous gallantry and intrepidity at the risk of life above and beyond the call of duty in action, Second Lieutenant Ernest Childers was awarded the Medal of Honor on April 8, 1944. The young Creek boy from Oklahoma would have his life changed forever. He was sent to Washington, D.C. to meet President Franklin Delano Roosevelt. Childers described the Commander-In-Chief as pleasant and a very capable leader.

As the years passed, Childers would obtain the rank of Lieutenant Colonel. He would train young recruits for future events such as the Korean and Vietnam Wars. In 1965, Ernest Childers would retire from the military. A remarkable career had come to an end. “The American Indian has only one country, and when you’re picked on, the American Indian never turns his back,” Childers proudly proclaimed.

PHILLIP COON (1919-2014)

Phillip W. Coon, a full-blooded Creek, was born on May 28, 1919, in Okemah, Oklahoma. He graduated from Haskell Institute in Lawrence, Kansas on May 14, 1941. On September 19, 1941, he volunteered for overseas assignment with the U.S. Army and spent the following month traveling to his first duty station. Mr. Coon arrived in Manila on October 23, 1941 where he went through rigorous Basic Training and Jungle Warfare training. Upon completion of training, he was assigned to 4th Squad, H Company, 31st Infantry Regiment as a machine gunner.

On April 11, 1942, Mr. Coon was captured by the Japanese Army and forced on the “Bataan Death March.” He initially stayed at O’Donnell Prison Camp at Capas Tarlac for two months and went to Camp Cabantuan for nine months. In January 1943, he was transferred to Camp Lipa and then in September 1944 was transferred to Camp Murphy. His final journey as a POW was from September 1944 to January 1945 when the Japanese began a movement to take him and his unit out of the Philippines to Tokyo, Japan.

Mr. Coon was discharged as a Corporal from Fort Sam Houston, TX on June 24, 1946. After being discharged he entered the Job Training Corps where he earned a two year apprenticeship in welding, painting, and decorating. He graduated in 1949 from the apprenticeship program and became a union worker.

Mr. Coon retired in 1981 from the local Painters and Decorators of America Union #1895. He is active in and is a life member of the national Ex-Prisoners of War, Inc. (Korea, Pacific, and Vietnam), the American Defenders of Bataan and Corregidor, Inc., and the 31st Infantry Association. Mr. Coon is a member of the Oklahoma Haskell Alumni Association and a member of the Little Cussetah Baptist Church in Sapulpa. He attends the annual conventions of these organizations and has served as Secretary-Treasurer and Vice-Commander of the 31st Association.

Mr. Coon’s awards and decorations include the American Defense Service Ribbon with one Bronze Star, an Asiatic Pacific Campaign Ribbon with two Bronze Stars, the Philippine Defense Ribbon, with one Bronze Star, and a Distinguished Unit Award with two Oak Leaf Clusters. In 1979, he received the Cross of Valor from Oklahoma Veterans Commission, which is the highest award that the State gave to its war veterans.

Mr. Coon passed away Monday, June 23, 2014. He is buried at Fort Gibson National Cemetery, he was 95 years old.

OTHER NOTABLE VETERANS

Dick B. Breeding, WWI, US Army, received Distinguished Service Cross (posthumously) for killing enemy while searching for missing Army member during combat in France, May 1918.

Anna King, Korea, US Army, served as surgical nurse who landed with the invasion force at Inchon, South Korea to help and heal the wounded.

Jorene Coker (left) saw active duty at Pearl Harbor during WWII in the Women Accepted for Volunteer Emergency Services (WAVES).

Riley R. Bruner, Korea and Vietnam, US Army, was a Prisoner Of War in Korea and Wounded In Action at Korea and Vietnam.

Vernon Wright, Korea, US Air Force, was shot down over North Korea and became a Prisoner Of War.

John Sloan, Vietnam, US Army is a recipient of 4 Purple Hearts.

Joe R. Taylor, US Marine Corps, was awarded the Bronze Star with V (for valor).

Bennie M. Gooden, US Marine Corps, was Wounded in Action and awarded the Silver Star.

Stephanie M. Jefferson, US Army, was awarded the Combat Medical Badge. She is the first Muscogee woman to be awarded a signifier for actions in combat.

Notable Muscogee Women

VALERIA LITTLECREEK

Valeria Littlecreek has been dedicated to Indian Education for five decades. She has worked with several tribes and their Indian Education departments. Her name and reputation has given her a quality endorsement, even from other tribes throughout the country. When she was considering an educational position in New Mexico a few years ago, then State Superintendent Sandy Garrett phoned her personally and asked her to stay. Ms. Littlecreek soon worked at the Oklahoma Department of Education in their Tribal Affairs program. Because of ill health, she had to resign from that position in 2011. Ms. Littlecreek, who grew up in Okemah and went to school at Mason, has slowed down in her activities, but she continues to make her voice known when it comes to ensuring Native American kids are well represented in education.

She began teaching at Holdenville schools in 1976 where she worked as a tutor and curriculum specialist and also taught American Indian studies. During this time, she learned more about Indian Education assistance. She later went to work for East Central University in Ada for the Seminole Bilingual program. At East Central University, she found herself hearing from the Native American community about Indian kids needing help in the educational system. She realized she wanted to dedicate her life to help Indian students.

Ms. Littlecreek recalls when she began teaching, how different it was. “Back then, we didn’t have any counselors to tell us what we should do and how to do things. So that’s what I wanted to do, I wanted to be there to help Indian students who may not have anyone to tell them what to do.” She can relate to how tough it can be for an Indian child to ask for assistance in the classroom, but to also obtain that special ‘guidance’ that every student needs, regardless of race.

She found herself listening to the call of Native American students at the state level as well. “I felt like I could always help more kids on the legislative side of things, but that’s always been my passion and it’s great to see kids graduate and go on. I’ve had a few come and tell me, “thank you for being so hard on us and making us stay in school. It’s always been a joy to see the students walk across the stage and get their diploma and that maybe, just a little bit, I had something to do with that by helping them stay in school.”

She does see the landscape of Indian Education changing, both positively and negatively. “The Indian students of today, many of them do not have that traditional background and upbringing and teaching that I went through. My mom was very strict on us when we went to school and we were raised in a traditional environment and I still live that way today, ...there’s a lot more assistance out there for students and with the technical age, there’s no reason why a student cannot go to college. The assistance is there, they just got to know that they can do it. That hasn’t changed. Many of our students lack the confidence in themselves-they don’t believe in themselves and they don’t like who they are. Many of our students come from poverty stricken areas...if they could just believe in themselves and know that...they can do whatever they want to do and there’s so much counseling available and assistance, they just need to take the steps and get it.”

JOYCE BEAR

Joyce Bear is a member of the Muscogee (Creek) Nation and belongs to the Lochapoka (Tulsa) Tribal Town and Sweet Potato Clan. She has worked in various forms of education for 11 years and was the Cultural Preservation office manager and officer for 13 years. Joyce was instrumental in collecting and creating the “Old Creek Series” collection for the Muscogee (Creek) Nation library. She has served as Chairperson for the Intertribal Council of the Five Civilized Tribes Cultural Preservation Committee and has served as a cultural advisor for the Birmingham Art Museum, the Art Institute of Chicago, the Smithsonian’s National Museum of the American Indian and the National Park Services at Horseshoe Bend Military Park.

In 2007, Joyce was honored with the Lifetime Achievement Award from the Greater Tulsa Area Indian Affairs Commission, as well as the Guardian of Languages Memory and Life Ways Award from the National Conference of Indian Archives, Libraries and Museums. Currently she is working with the Coweta Public Schools, Southside Elementary as a Reading Specialist.

MARGARET MCKANE MAULDIN

Muscogee (Creek) citizen Margaret Mauldin is best known for creating a 10,000 word dictionary of the Creek language that was published by the University of Nebraska. She also co-authored several children’s books and recorded Creek hymns. Ms. Mauldin worked to preserve the Mvskoke language through teaching, recording hymns and creating the Mvskoke to English dictionary “A Dictionary of Creek/Muskogee”.

She worked extensively with Jack Martin, Professor of Linguistics at the College of William and Mary, to translate and edit a collection of stories written by Creek citizens, Ernest Gouge and James Hill. The stories were written in 1915 and the 1930’s.

Her career has included the following:

- Instructor of the Creek language at the University of Oklahoma
- Instructor of Curriculum Development at the University of Oklahoma
- Adjunct Instructor of the Creek language at the University of Oklahoma
- Workshop Leader for the Oklahoma Native Languages Association

Her awards include the following:

- 2005–LHD-Doctor of Humane Letters from the College of William and Mary
- 2011–MCN Council honored Margaret Mauldin with a resolution for Language Revitalization
- 2011–Citation of Merit awarded by the Native American Caucus at the University of Oklahoma

PEGGY BERRYHILL

Peggy Berryhill is a producer of public radio about contemporary Native America for national audiences. Peggy has been providing a Native voice to public broadcasting and support for Native radio for over 38 years. She is known as the “First Lady of Native Radio”.

Ms. Berryhill began her career in broadcasting in 1973. She is the only Native person to work as a full-time producer at National Public Radio (NPR) in the Specialized Audience Programs Department (1978-1979).

In 1997, Peggy Berryhill founded the Native Media Resource Center. The Resource Center has worked in collaboration with the Smithsonian National Museum of the American Indian, the Corporation for Public Broadcasting, Koahnic Broadcasting Corporation, Northern California Cultural Communication, Inc. and the Native American Public Telecommunication, Inc.

She was instrumental in forming the 2001 Native Radio Summit, where discussions were held forming a group to promote and facilitate American Indian radio programming content. This summit led to the creation of The Center for Native American Public Radio.

Ms. Berryhill serves on the board of the Native American Resource Center, the Native Media Resource center and the National Federation of Community Broadcasters. She has received numerous awards for her work, including the American Indian Local Heroes Award in 2005 and the Bader Award, a Native Radio Honor, in 2011.

VIRGINIA THOMAS

Virginia has worked in the field of Indian Education for the past 45 years and has worked primarily in California, Alaska and Oklahoma. She is recognized throughout the Nation as an expert in the field of the Johnson-O’Malley Act and its mode of operation. She has been acknowledged by two Presidents for her service in the field of Indian Education and has provided hundreds of training workshops to both tribal leaders, school administrators, parents and students.

Virginia is most proud of founding the Muscogee Nation Challenge Bowl in 2000. Realizing there was a lack of teaching material in the schools regarding the Muscogee Nation, she formed a committee of MCN employees and community members and coordinated the first Challenge Bowl in 2000. She chaired the Committee up until 2011. Her desire was to instill a sense of cultural pride within the students, which it did, and radiated to the employees and volunteers who now assist in conducting the event. The Creek Language has always been a major portion of the Challenge Bowl and over the years the language is slowly returning with our youth.

She wrote the first Challenge Bowl guidelines, handbook and study questions then presented it before the MCN National Council seeking tribal funding of the event, which was approved. The Challenge Bowl began as an event by the Creek Nation JOM program and with the tribal funding it now belongs to the Nation. Her dream is that the Challenge Bowl will continue for generations to come and persist in making our youth proud of being Muscogee (Creek).

- 14 years as the Johnson-O'Malley manager (1999-2011)
- Founder of the Muscogee Nation Challenge Bowl (2000)
- Chair of the Muscogee Nation Challenge Bowl Committee (2000-2011)
- Muscogee Nation Scholarship Pageant Coordinator for 7 ½ years (2003-2011)
- Founder of the Muscogee Nation Revitalization Language Program
- Muscogee Nation Revitalization Language Program Manager
- Served on the Language Revitalization Committee for 8 years
- Served on the Okmulgee Community Board for 3 years
- National Johnson-O'Malley Association (NJOMA) as a founding member
- Served as the NJOMA Board President for 16 years
- Served as the first NJOMA Executive Director
- Presently serves on the National Resource Center 4 Tribes Advisory Council for issue with Indian Child Welfare
- Presidential appointment to the National Advisory Council for Indian Education through the US Department of Education appointed by President George Bush (2004-2009)
- Presidential appointment to the National Advisory Council for Indian Education through the US Department of Education appointed by President Barak Obama (2009-present)

Living Legends

Lillian Thomas is a Muscogee (Creek) citizen who is a fluent Mvskoke speaker, traditional artisan and performed in several plays in the Mvskoke language. Lillian graduated from Southeastern University with a Bachelor of Science. She is retired from the Social Security Administration after 33 years of service. She currently works for the Muscogee (Creek) Nation in the Social Security Assistance Program. She attends Belvin Baptist Church where she assists the song leader in teaching the children song the Mvskoke language.

Lillian has performed several skits in the Mvskoke language for the Thunder Road Theatre. She has also been featured in the plays “Two Sisters” and “The Dawes Commission” which were later turned into movies. In addition to appearing in the plays, Lillian assisted with the translation of the lines in the Mvskoke language.

Lillian’s knowledge of the Mvskoke language has greatly influenced her community and tribal community. The Muscogee (Creek) Nation made a move to preserve and perpetuate the language with the development of a mobile application. Lillian played a key role in “Train the Trainer” and launching of this application. Her knowledge of the Mvskoke language serves as a valuable tool that enables all Muscogee (Creek) citizens the opportunity to learn the language. Lillian also serves as mentor to young citizens that complete in the annual Scholarship Pageant who have an interest of learning the language. She actively participates in Senior games and meetings. Lillian’s character, accomplishments and love for the Mvskoke people exemplifies a Living Legend.

Stephen (Wotko) Long is a full blood Muscogee (Creek) citizen and of the Echawv clan and a Vietnam Veteran and keeper of the traditional Mvskoke hymns. Wotko graduated from Capital High School in Oklahoma City, Oklahoma before serving four (4) years in the service including one (1) year in Vietnam. While in Vietnam, Wotko made the decision to return home and learn who we are as Mvskokvlike people and where we come from through our traditional hymns.

Wotko has appeared in two Sterling Harjo films including “*This May Be the Last Time*” and “*Mekko*” and produced three Mvskoke hymn cd’s. In 2014, Wotko received the Principal Chief Medal of Valor for rescuing a man from a burning vehicle. His latest achievement includes finishing classes through the Bow Society to become a bow maker. Wotko plans to teach our youth his knowledge of bow making so that the tradition will continue for future generations. When Long isn’t traveling over North American opening festivals or other events with traditional Mvskoke hymns, he is at home performing sweat lodges for spiritual healing.

Mvskoke hymns are an integral role in the life of the Mvskokvlke. The hymns are used for ceremonial purposes, recreation, expression, and healing. It is through the work of people like Wotko Long that keeps our traditional hymns from being lost.

Perry Anderson, a Muscogee (Creek) citizen, is a retired athletic coach and teacher at Eufaula Public Schools and retired employee of the Muscogee (Creek) Nation. He has served as an experienced, educated and dedicated professional in many capacities that has enhanced and improved the lives of all that he taught, coached and assisted throughout his career.

Anderson graduated from high school at Spring Hill High in Pharoah, Oklahoma. He was involved in basketball and baseball and earned an athletic scholarship for baseball to the University of Oklahoma. He would later transfer to Oklahoma State University where he played baseball. Eventually, he landed at Northeastern State University where he would play basketball and baseball. After graduating with his Bachelor's and Master's Degrees in education and counseling from NSU, Anderson played minor league professional baseball for the San Antonio (Texas) Missions and the Wichita Aeroes.

Anderson began his coaching career with Eufaula High School in 1964. He would continue to coach at Eufaula High School until he retired in 1987. Anderson started the baseball program at Eufaula High School. During his coaching career, he was chosen Coach of the Year three times. Anderson was inducted into the Oklahoma Coaches Hall of Fame in 1994. That same year, the street leading to the high school was re-named Anderson-Bell Street in honor of Anderson and longtime Eufaula football coach Paul Bell. In 2011, the Eufaula gymnasium was dedicated in his honor as Perry Anderson Field House.

In addition to his service as a teacher and coach, Anderson started the Eufaula Summer Youth Program in 1964. This program offered area youth the opportunity to participate in baseball, swimming lessons and recreation activities in the summer months. He operated the program for 13 years.

Mr. Anderson was a part of the Muscogee (Creek) Nation work force since the mid 1970's. He was instrumental in developing the MCN Summer Youth Employment Program and served as a supervisor and youth counselor in the program for over a decade.

A full blood Euchee and Muscogee (Creek) citizen, **Josephine Wildcat Bigler**, was born and raised on a Euchee allotment near Kellyville, Oklahoma. She was one of four remaining elders that were born fluent Euchee speakers. She graduated from Southeastern Oklahoma State University in 1945 with a B.A. in education. During the 1960's, she attended the University of Wisconsin at Oshkosh for special education training, later becoming a special needs teacher, which was a new field during this time. While in Wisconsin, Josephine remained active in Native

American activities. She would later be elected chairwoman of the Milwaukee Indian Health Board and serve as a representative to Milwaukee Southeastern Malpractice Compensation Committee.

She was active in the United Methodist Church, especially as it serves the needs and ministered to Native American's. She served as the Milwaukee Indian Community representative to Wisconsin Council of Indian Reservations. In 1982-1988, she worked for the Global Ministries of the United Methodist Church. In this role, she travelled predominantly through Indian Country coordinating Native American ministries.

Josephine returned to Oklahoma in 1988 and spent the next 27 years working to preserve the Euchee language. She was instrumental in creating some of the best, extensive documentation of the language in existence. Her stories, historical narratives, folk tales, recipes, and "how to" too many traditional activities would become learning tools for children's classes. This was the stepping stone in shaping the first new speakers and teachers of the Euchee language. Josephine continued to teach young Eucheas their language and how to be teachers at the Euchee Language Project. Josephine spoke about the importance of the Euchee language and hoped that the work she had done would be carried on to future generations.

Past Honorees: Living Legends

2005 – Hepsy (Randall) Gilroy, Rev. Harry Long, R. Perry Beaver, Amos McNac

2006 – Bob Arrington, Helen Coon, Phillip Coon, Edwin Moore

2007 – Lizzie Bruner, Jimmy Anderson

2008 – Wilber Gouge, Johnnie Brasuell

2009 – Dr. James King, Michael Berryhill

2010 – Patrick Moore, Dr. Pete Cosar

2011 – Jimmy Alexander, Monte Deer

Hall of Fame inductees:

2012 – Joy Harjo, Simon Harry Elsie Mae Martin, Allie P. Reynolds

2013 – Dr. Phyllis Fife, Jack Jacobs, George Thompson

2014 – Peggy Berryhill, Eli Grayson, William Sampson

2015 – Chebon Dacon, Sarah Deer, Jerome Tiger

Muscogee (Creek) Nation Departments

MUSCOGEE NATION SCHOLARSHIP FOUNDATION

There are 29 available scholarships ranging from \$500 to \$2000. All scholarships are competitive-based and available for spring and fall semesters only. The foundation utilizes the summer time to plan/prepare fundraisers to generate money for these scholarships. Fundraising activities include a 5K run, a golf tournament and a silent auction. Gifts and donations are other sources of revenue.

Requirements:

- Must be a member of the Muscogee (Creek) Nation.
- Completed application.
- Enrolled as a full-time student.
- Attending an accredited institution of higher education.
- A one page typed personal statement including your goals, career choice, and tribal community involvement with an emphasis on how this scholarship will affect your college career.
 - If you are a **HIGH SCHOOL SENIOR** or **FIRST-TIME ENTERING STUDENT** you must submit the following : A copy of your high school transcript or GED certificate.
 - College Admission letter and class schedule of the semester you are requesting funding.
- If you are a **CURRENT COLLEGE STUDENT** you must submit the following:
 - A copy of your college transcript(s).
- Class schedule of the semester you are requesting funding.

LIGHTHORSE TRIBAL POLICE EXPLORER PROGRAM

The Muscogee (Creek) Nation Lighthorse Tribal Police Department is proud to be the first Tribal Police Exploring Post in the state of Oklahoma, as well as just one of the few in the United States. Law Enforcement Exploring is a program created by the Boys Scouts of America, for young people, boys and girls, with an interest in law enforcement as a possible career. The

program is also a way to get young people involved in their communities through the community service that the post takes part in. The program is open to people ages 14-20.

Through their experience, Explorers learn and practice leadership skills similar to law enforcement personnel. Those Explorers in leadership positions within the explorer post learn the realities of being responsible for all subordinates' achievements and short falls.

"Lighthouse Explorer Post 106, founded in 2003, is committed to the education and enforcement of Muscogee (Creek) Nation laws and cultural traditions. As responsible citizens of our communities, we will promote good leadership skills, healthy lifestyles and strive to be positive examples to our peers, families and tribal nations."

MUSKOKE NATION YOUTH SERVICES

The Mvskoke Nation Youth Services (MNYS) program was created in October 2014. Citizens of the Muscogee (Creek) Nation ages 12-24 are eligible to participate in services. The mission of MNYS is to empowering Mvskoke youth by connecting to culture, community and resources.

The Mvskoke Youth Opportunity Grant

To assist Muscogee (Creek) Nation citizens, up to the age of 24, to participate in activities and opportunities that are not specifically a part of the school curriculum. Examples include but are not limited to: leadership opportunities, non-school related athletic or arts competitions, rodeo, cultural activities, etc. There are three levels of assistance: in-state, out-of-state, and international. Participants can only be awarded for one level. The grant cannot exceed half of the total cost or the maximum amount for each category. Participants are encouraged to complete volunteer hours as a pay pack for the assistance.

The Mvskoke Nation Youth Council

The Mvskoke Nation Youth Council (MNYC) was officially formed on June 20, 2015 after several months of planning by youth. The group is made up of Muscogee (Creek) Nation citizens ages 12-24. The MNYC focuses on personal and peer advocacy, creating and participating in service learning projects, and keeping the Mvskoke customs and traditions alive and active. The MNYC meets the second Saturday of each month at 10:00 am at the Mound building on the Muscogee (Creek) Nation complex in Okmulgee, OK.

DEPARTMENT OF EDUCATION AND TRAINING

The Department of Education and Training provides support and direction to the management of educational programs which results in educational opportunities for Muscogee (Creek) people from early childhood through college. The Department of Education and Training consists of the following programs: Employment and Training, Eufaula Dormitory, Head Start, Higher Education, Higher Education Scholarship Foundation, Johnson O'Malley, MCN Literacy Program, Mvskoke Language Program, Yuchi Language Program, Reintegration and TERO.

The Special Academic/Extra Curricular Activities Program grant is administered under the Dept. of Education & Training and was created to address the needs Muscogee (Creek) students who have exhausted all other funding sources and who are not receiving any type of financial assistance from any other tribal education program. The one-time only grant will assist eligible students with approved need to a maximum of \$500.

HIGER EDUCATION

The Department of Higher Education administers grants and scholarship program to enrolled citizens of the Muscogee (Creek) Nation. The purpose is to provide supplemental financial assistance to Creek students pursuing a college level education.

Undergraduate Grants - the Higher Education administers three (3) grant programs for students pursuing an Associate's or Bachelor's Degree from an accredited college or university.

1-Tribal Funds Grant - will be awarded to enrolled citizens of the MCN attending an accredited college or university with no blood minimum quantity required. Funding for this grant does not require Pell-eligibility. Undergraduate students are eligible for this grant. The award amount will be determined by the number of hours in which student is enrolled up to a maximum of 18 hours. Award rate = \$125.00 per credit hour.

2-Creek Nation of Oklahoma Scholarship Grant (BIA Grant) - The MCN Higher Education Program will expend funds through self-governance to award educational grants to our tribal citizens, with no minimum blood quantum required, attending accredited institutions of higher learning. Funding for this grant is limited to Pell-eligible undergraduate students only.

3-Tribal Incentive Grant - will award citizens of the Muscogee Nation who meet the grade point requirements at an accredited school. Students attending college with a GPA of 3.0 or better during the semester are able to apply for this program.

Post Graduate Program – Established to provide financial aid opportunities for members of the Muscogee (Creek) Nation to further their education beyond a bachelor's degree for a first time Masters' Degree. The award amount is determined by the number of hours in which the student is enrolled up to a maximum of 9 hours. The award rate = \$250 per credit hour.

Doctoral Degree Program – New students will be required to complete an application to determine eligibility. After eligibility is determined, awards will be completed upon review of the needs analysis that is finalized by the university. The awards will be sent directly to the school to use towards tuition, books, and fees as determined through the needs analysis.

The office of Employment & Training provides career and educational opportunities such as financial assistance for full-time students attending the College of the Muscogee Nation, OSUIT, or approved technical schools. Part-time students may receive assistance with tuition, books, equipment and other related fees for the following approved technical schools: Central Tech, Green Country, Gordon Cooper, Indian Capital, Kiamichi, Northeast, Tulsa Tech, Wes Watkins. Assistance also available enrolled in Allied Health core classes at Bacone, Carl Albert, Connors, Seminole State and Tulsa Community College.

Other services:

- GED Test-incentive of \$300 for completion of testing, must turn in scores within 90 days of completion.
- New Employment-financial assistance for employment related expenses when obtaining new employment after having a least a 30 day break in employment.
- College Internship-for juniors, seniors and graduate students, depending on funding and employment availability.
- Tribal Grant & Incentive-for high school students enrolled concurrently at public universities or technical schools in the state of Oklahoma.
- ACT Test-assistance with one ACT test fee per year for Summer Youth participants or Muscogee citizens meeting income guideline.
- Summer Youth-eight weeks of summer employment for youth ages 16-21.

JOHNSON-O'MALLEY

Mission Statement: To provide a comprehensive program that encumbers academic education, cultural awareness and community involvement.

JOM PROGRAM GOALS

- To provide technical assistance to all school sites within the Muscogee (Creek) Nation for IEC training, program design, goals & objectives and budget revision.
- To provide an opportunity for parents to become involved in the design of the JOM program.

- To provide a mechanism which allows Indian parents and public school administrators to work together to establish educational programs.
- To provide in-service training for the program coordinators, IEC, program staff, and school administrators in regards to program compliance and to develop a network system between programs.
- To provide an annual parent committee training specifically to meet the needs of the parents on the Indian Education Committee.
- To provide an annual monitoring of each of the 45 school programs for compliance with the federal regulations and Creek Nation policies.

Each school program is designed based on a ‘Needs Assessment’ conducted by the Indian Education Committee. Programs may include; tutoring, school supplies, student incentives, cultural activities, seniors fees, ACT/SAT fees.

JOM PROGRAM EVENTS

Education and Career Expo – annual event for high school students that allow students to explore education and career possibilities, the Expo is done in collaboration with the Department of Education and Training programs.

In-Service Training – service provided to JOM IEC members, coordinators, superintendents and administrators to ensure compliance requirements for the MCN required by the Bureau of Indian Affairs for federal regulations.

Statewide JOM Conference – collaboration of Creek, Cherokee, Choctaw, Chickasaw and Seminole Nation JOM programs which provides workshop training for parent committees, coordinators and administrators.

JOM INCENTIVES

Academic Incentive – each year a \$500 incentive is awarded to 16 Muscogee (Creek) JOM seniors within the 45 school districts of the Muscogee (Creek) Nation.

Belvin Hill Memorial Incentive - \$500 incentive awarded to two seniors participating in the annual Challenge Bowl competition.

Advanced Placement Incentive – the purpose of the Advanced Placement Test Incentive is to provide a service to Muscogee (Creek) high school students that will enable them to participate in advanced placement tests in order to receive college level credits.

CHALLENGE BOWL

The Challenge Bowl is a Muscogee (Creek) Nation event that is administered through the Johnson-O’Malley program. The purpose of the MCN Challenge Bowl is to promote our children to learn about Creek cultural, history, government and language using traditional values of brotherhood as a foundation. The Challenge Bowl committee made a commitment to set by example, positive role models in good citizenship and tribal pride that would carry on throughout the year and not just during the few days of the competition.

Each year Creek Nation employees and community members prepare for the competition by having monthly core group sessions to prepare the study guides, competition questions and conducting training sessions for the volunteers. It is a great deal of work but seeing the faces of the students, parents, and sponsors during the competition and awards ceremony is worthwhile. The Challenge Bowl brings schools, community, employees, and citizens together with the common goal of developing tribal pride within our youth.

LITERACY PROGRAM

The Muscogee (Creek) Nation Literacy Program was established to provide all Muscogee Creek citizens and its community the opportunity to improve their literacy and preserve the Mvskoke language through a partnership with myON reader, an online digital library of more than 7,000 books. The program will help with challenges that our students might face in regards to being proficient in reading, comprehension and vocabulary, enabling them to be college and career ready. We will provide the reader with a custom Muscogee Creek book set, all converted and/or created in the Mvskoke language to assist in preserving the language, through visual and audible learning.

Up Coming Challenges!

Get in the Game & Read!

Reading during the summer is vital to our students' success. To help promote and encourage reading we are holding a summer reading challenge from May 15 to August 31, 2016. Everyone that reads at least 10 books will be entered into a random drawing and the winner will receive an iPad Mini! We will also award top readers in elementary school (PreK-5th) and Middle/High School (6th grade +). The top 4 readers will compete for iPad Mini or a \$100 Visa Gift Card. Winners will be announced by the end of August 2016. Winners will be invited to the Back to School Bash to accept the prize.

Lights, Camera, Read!

Students are headed back to school and we want to make sure they get a jumpstart. Challenge starts on September 1 and will run until the end of May 2015. The winner will be selected on based on the amount of time-spent reading during this challenge. We will have three winners. 1st place will receive an iPad Mini, 2nd & 3rd Place will receive a Visa Gift Card.

Up Coming Events!

Back to School Event!

This event is to celebrate all our students have accomplished for the school year 2015-2016 and summer 2016. Students (3rd to 7th grade) from each district will receive a ticket based on time spent reading and number of books read. Also, the top readings for the summer challenge will be invited and presented with their awards. All readers invited will receive a reading certificate; along with participation in fun activities and treats.

Family Literacy Night

Families and the community are one of the most important aspects of a student's success. In order to increase awareness and participation of families in their student's success, we can hold a Family Literacy Night at either your school or community. These events are in collaboration with the schools and communities within the district and their Native families. Muscogee (Creek)

Nation Reads gets the opportunity to explain the program, educate families on how to use myON and how myON can be a great literacy tool for their entire family.

For all the latest! Follow us on Facebook: Muscogee Creek Nation Reads! <http://about.myon.com/muscogee-creek-nation-reads>

Back to School Reading Challenge winners of iPad Mini and \$100 gift card.

Tourism & Recreation

The Muscogee (Creek) Nation opened its new \$4 million multipurpose facility in 2011. The 20,000-square-foot facility includes spectator seating, classrooms, concessions and several multi-use areas. It will be used for the many events the Muscogee (Creek) Nation hosts each year.

Creek Fit is a new program that began Dec. 29, 2014 to help everyone who participates to get a fresh start through exercise. The class can help treat common health problems facing Native Americans including: Type-2 diabetes, heart disease and high cholesterol. It is an open invitation to anyone that wants to try Creek Fit. Creek Fit is held on Monday, Wednesday and Friday from 11:30 a.m. – 12:30 p.m. at the Mvskoke Dome building in Okmulgee.

Council Oak Ceremony-In 1988, the Tulsa City Council called for a meeting with members of the Muscogee (Creek) Nation to begin an annual celebration of the ancestors at the Council Oak Tree, located at 18th Street & Cheyenne Avenue in Tulsa. Tribal citizens and dignitaries along with city and officials gather to listen to the history of the site and special keynote speakers. Held every October, stickball games, traditional foods dinner, stomp dance.

Indian Fall Festival- Recently revived by the Muscogee (Creek) Nation, the tribe hopes to bring back its legacy. held in October, activities include fry bread cook off, chili cook off, 5k run, native arts & crafts, exhibition stomp dance, art contest, live entertainment.

Mvskoke Nation Festival-started in 1974, this year was the 41st annual Mvskoke Nation Festival. Events included 5k run, rodeo at the Bob Arrington Rodea Arena, live entertainment by BJ Thomas, Lee Greenwood, Blues Traveler and Bret Michaels. Each year, thousands of people attend from all over the U.S. and abroad.

MUSCOGEE (CREEK) NATION
**FAMILY VIOLENCE
 PREVENTION PROGRAM**

Teen Dating Violence

Services include: assistance in locating emergency shelter, assistance with filing protective orders, court advocacy, crisis intervention, legal advocacy, safety planning, emergency transportation, support groups, counseling, limited financial assistance, referrals for additional services depending on an individual's needs.

Community outreach: presentations can be provided to your community, agency, school, or organization on the topics of domestic violence, sexual assault, dating violence and stalking. Specific presentations for youth are available on the topics of healthy dating relationships, teen dating violence, sexting and sexual assault and consent.

Ask yourself: does my boyfriend or girlfriend...

- Call or text me frequently to find out where I am, who I'm with, or what I'm doing?
- Tell me what to wear?
- Have to be with me all the time?
- Call me names, insult me, or criticize me?
- Act jealous, possessive, controlling, or bossy?
- Give me orders or make all the decisions?
- Get angry very quickly, or fight a lot?
- Threaten to hurt me or someone in my family if I don't do what they want?
- Threaten to hurt themselves if I don't do what they want?
- Follow me or track where I go? Show up repeatedly at my home or work uninvited? Check up on me all the time?
- Refuse to allow me normal contact with my family and friends?
- Shove, punch, slap, pinch, kick, or hit me?
- Touch or kiss me when I don't want to? Force me to have sex? Not let me use birth control?
- Use alcohol or drugs and pressure me to do it too?
- Refuse to accept that the relationship isn't working or is over?

If so, you are in an abusive relationship. We can help.

An advocate is available 24 hours a day, 7 days a week to speak with you and provide support. These services and support will be provided to you without judgement.

Independent Entities

THE COLLEGE OF THE MUSCOGEE NATION

The College of the Muscogee Nation is the institution of higher education for the Muscogee (Creek) Nation emphasizing native culture, values, language and self-determination. The College provides a positive learning environment for tribal and non-tribal students. On our campus all are free to speak Native languages, share culture and participate in traditions. Vrakkuueckv (Respect) is cultivated. The College of the Muscogee Nation (CMN) is a tribal college created September 1, 2004.

The College of the Muscogee Nation has degree programs to meet the unique needs of students seeking careers in the tribal sector. Degrees and certificates offered:

- Associate in Applied Science in Police Science
- Associate in Applied Science in Gaming
- Associate of Arts in Native American Studies
- Associate of Science in Tribal Services
- Certificate in Gaming
- Certificate in Mvskoke Language

Muscogee (Creek) Nation Citizenship Board

The Citizenship Board office is governed by a Citizenship Board. This office provides services to citizens of the Muscogee (Creek) Nation of Oklahoma or to potential citizens in giving direction or assisting in the lineage verification process of the Muscogee (Creek) people. The mission of this office is to verify the lineage of descendants of persons listed on the 1906 Dawes Roll.

Citizenship Criteria: you must be Creek by blood and trace back to a direct ancestor listed on the 1906 Dawes Roll by issuance of birth and/or death certificate. Required documentation includes a completed Citizenship application, state certified full image birth certificate, copy of social security card, and if 18 years old or over, a state identification or driver's license.

- New cards are issued at no cost, replacement cards are \$5.
- Cards will expire 5 years from date of print.
- Relinquishing citizenship is absolute and irrevocable (final) for anyone 18 years and over. You may be reinstated as a citizen if your citizenship was relinquished as a minor.

Muscogee (Creek) Nation Election Board

It is the purpose of the Muscogee (Creek) Nation Election Board to maintain the highest level of integrity in conducting the Muscogee (Creek) Nation elections according to the election codes, title 19 of the Muscogee (Creek) Nation code and enforce the election codes in a responsible, impartial and unbiased manner. Also to inform all enrolled registered voters of elections and promote voter registration throughout the Muscogee (Creek) Nation eight districts, as well as to the absentee voters outside the Muscogee (Creek) Nation boundaries.

Voter registration requirements are you must be an enrolled citizen of the Muscogee (Creek) Nation and 18 years of age or older. Candidates for tribal elections pay the following fees: \$1500 fee for Chief, \$1000 fee for second chief and \$500 fee for national council.

Muskoke Media aims to be the voice of the Muskoke people through the distribution of information to the Muscogee (Creek) Nation through its newspaper, radio show, TV broadcasts, graphic design and printing services.

Divisions:

The **Muscogee Nation News** is the newspaper of the Muscogee (Creek) Nation. The MNN has been informing citizens since 1970. Muscogee Nation News is a bi-weekly publication, published on the 1st and 15th of every month. Any enrolled citizen of the Muscogee (Creek) Nation can receive a newspaper subscription free of charge.

Native News Today is a weekly TV broadcast covering issues concerning Indian Country. NNT airs in the Tulsa area on Saturdays at 1 pm on CW 19. Episodes are also available on the Native News Today youtube page.

Muskoke Radio is an hour long weekly radio broadcast covering an array of topics. Listen live Wednesdays at 10 am CST on 1240 AM/www.1240thebrew.com.

Muskoke Media Graphic Design and Printing accepts work from both inside and outside Muscogee (Creek) Nation. Available products range from the design and printing of business cards to banners.

Muscogee Nation Business Enterprise (MNBE) is owned by the Muscogee (Creek) Nation. It was created in 1999 to diversify the types of businesses operated by the Nation and to provide an additional revenue stream to help fund other tribal needs. We also wanted to develop the skill sets of our tribal members to become proficient in Government Contracting.

Profits generated by the businesses of MNBE are returned to the tribal treasury department to be distributed by the National Council to programs, social services and to further economic development within the Muscogee (Creek) Nation.

Profession Services Division specializes in providing Enterprise Information Technology Services, Project/Program Management, and Scientific and Research Support for customers at locations across the US as well as abroad.

The MNBE Technologies Group specializes in providing surveillance, access control and alert systems to universities, public schools, law enforcement, tribal governments and casinos

The Muscogee (Creek) Nation Department of Health is one of the largest Tribal Health Systems in Oklahoma. On November 4, 1977, the Muscogee (Creek) Nation signed a sub-lease agreement with the Trustees of the Okfuskee Memorial Hospital Authority to occupy and operate the former Okfuskee County Hospital in Okemah on a thirty-year lease purchase. That facility is now the Creek Nation Community Hospital in Okemah, Oklahoma.

From 1976 through 1988, the Health System was operated under the guidance of the inter-Tribal Council of the Five Civilized Tribes. In 1992, the Health System management moved under the Executive Branch of the Nation. In 1994, the Health System was established as an independent agency of the tribe. In 2009, the Health System returned to the supervision of the Executive Branch of the tribe, with the Secretary of Health appointed by the Principal Chief and confirmed by the National Council.

Current facilities include: MCN Department of Health Centers: Eufaula Indian Health Center, Koweta Indian Health Facility, Okmulgee Indian Health Center, Sapulpa Indian Health Center, Wetumka Indian Health Center. Muscogee (Creek) Nation Medical Center. Express Care Clinic.

Muscogee Language

MUSCOGEE LANGUAGE

The Muscogee (Creek) language is a part of the Muskogean language family. It consists of a 20 letter alphabet modeled after the English alphabet. The sentence structure is (subject, object, verb) and is a highly descriptive language. Affixes are used in verbs to create nouns and to conjugate sentences into future, present, and past tenses.

The Muscogee (Creek) Nation maintains a language program within the Human Development Department that serves the citizens within the boundaries of the nation. The language program offers several community classes and operates in cooperation with several public schools to offer Muscogee (Creek) as a foreign language credit. The language program develops the curriculum and lesson plans for the public school classes and supplies teachers for the public schools and community classes as well. The language program offers immersion summer camps, online language materials, and instructional language CDs to the citizens which help to broaden the domains of the language through exposure to the language. Additionally, the nation serves the citizens by offering language classes at the College of the Muscogee Nation designed to provide a foundation for students who wish to increase their fluency level. The language classes are set up as part of the college curriculum for students seeking an associate's degree. The Muscogee (Creek) Nation has many programs in place to enhance the development of the language. However, Muscogee (Creek) people are the keys to the revitalization of the language. Today, the people are not using the language in all aspects of their lives.

The loss of language domains was a product of United States programs designed to assimilate Native American people by destroying their cultures by eliminating the use of their languages. Language domains were separated and dispersed by the Allotment Act, and boarding schools disconnected children from their language and culture, by allowing English only to dominate those domains. Language shifted from Muscogee (Creek) to English/Creek bilingualism and finally, to English being the first language. The prestige of the Muscogee (Creek) language diminished as economic and social hardships forced Muscogee (Creek) people into unfamiliar environments of the American workforce. However, Muscogee (Creek) people endured through their connectedness to spiritualism by ceremonies and church services specific to Muscogee (Creek) culture and customs. Language and culture have defined Muscogee (Creek) people through those two specific domains. These domains as well as many others are rapidly being taken over by the presence of the English language. All aspects of being Muscogee (Creek) are in danger of being lost forever without a movement aimed at maintaining and reclaiming all of the domains within the Muscogee (Creek) Nation.

English	Mvskoke	Phonetics
1. How are you?	Estonko?	(is-stone-go)
2. Purple	Pvrko Ome	(buth-ko o-me)
3. Basketball	Pokko Rakko	(bok-go thock-go)
4. Money	Toknawv	(dok-naw-wah)
5. Flute	Fehpv	(fih-buh)
6. Tomato	Tomatv	(doe-ma-da)
7. Apple	Svtv Rakko	(suh-duh thock-go)
8. Standup	Ahuervs	(ah-whe-thus)
9. Turtle	Locv	(low-juh)
10. Basket	Svmpv	(sum-buh)
